1945-1995 Franz Rothenbacher,2013-11-11 The intention of this book is to give a picture of the complex material that has been published in the field of social and economic statistics in Western Europe Although there are many guides

bibliographies and reference books on special topics of this broad theme a general overview has been missing With this book

I hope to fill this gap The frame of reference is a scientific one enabling and facilitating comparative social research on

Western Europe In some respect this book enlarges and updates the bibliography written by Peter Flora Quantitative

Historical Sociology published in Current Sociology in 1975 In principle this guide is an annotated bibliography of the most

important printed material in the field of official statistics The legitimacy of such an approach lies in the fact that even today

printed statistics are the most important form of dissemination of statistical results although microcomputers CD ROMs and

the Internet have changed this situation In any case a special section on statistical databases is included for every country

describing the main databases of the statistical offices Furthermore the Internet address of each international or national

statistical institute is provided in the introductory paragraph This enables the reader to get fast access to online databases

and supplementary online information on statistics via the Internet      Key Indicators of the Labour Market International
