Kerr, Josh Lerner, Scott Stern, 2016-04-22 The papers in the sixteenth volume of the National Bureau of Economic Research's *Innovation Policy and the Economy* offer insights into the changing landscape of innovation by highlighting recent developments in the financing of innovation and entrepreneurship and in the economics of innovation and intellectual property The first chapter by Ramana Nanda and Matthew Rhodes Kropf explores the process of experimentation in the context of financing of technology start ups by venture capitalists The second by Yael Hochberg also analyzes the role of entrepreneurial experimentation by systematically examining the rise of start up accelerators The third chapter by Heidi Williams studies the relationship between the strength of intellectual property rights and innovation The fourth paper by Fiona Scott Morton and Carl Shapiro discusses recent changes to the patent system and whether they align the rewards from intellectual property with the marginal contributions made by innovators and other stakeholders The final chapter by Karim Lakhani and Kevin Boudreau focuses on the potential use of field innovation experiments and contests to inform innovation policy and management Together these essays continue to highlight the importance of economic theory and empirical analysis in innovation policy research

**The Economics of Persistent Innovation: An Evolutionary View** Christian Bas, William Latham, 2009-06-04 William Latham Christian Le Bas Persistence of firm innovative behavior became an important topic in applied industrial organization with the publication of the seminal empirical work of P Geroski and his colleagues 1997 Evidence that firms innovate persistently has led previous studies to focus on the determinants of innovation persistence and on its heterogeneity across industries technologies and countries The aims of this book are 1 to illumine the scale and scope of the phenomenon of persistence in innovation and 2 to account for the principal factors that explain why some firms innovates persistently and others do not Because this book

deals intensively and extensively with the subject of firm innovation persistence which is not as yet a well known term we need to provide a nontrivial definition of it that encompasses the full range topics we want to address and aids our understanding of how they are related to each other We begin with a careful identification of innovation Our first definition is drawn from K Pavitt 2003 innovation processes involve the exploration and exploitation of opportunities for a new or improved product process or service based either on an advance in technical practice or a change in market demand or a combination of the two While this definition is clear and conforms well to both our empirical and theoretical perspectives some elaboration may help to clarify the concept
