Economics Principles And Tools Custom Edition:

Economics, Volume 1: Economic Principles Frank A. Fetter, 2020 Professor Fetter's Economic Principles is the first half of a two volume treatise on economics The second half Modern Economic Problems deals with the applications of principles In general Professor Fetter's theory may be described as mechanistic and Austrian To call it mechanistic signifies that like the usual type of economic theory it treats the industrial and business system as being somewhat analogous to a mechanism in that the operations of this system are explained in terms of practically contemporaneous causes and effects without reference to the changes in its structure which take place with the passage of time Here mechanistic is substituted for the less appropriate deductive as a description of the classical type of theory Mechanistic explanation contrasts especially with genetical explanation though it seems doubtful if a precise line can in the last analysis be drawn between the two Fetter's book shows a pride in its own novelties but as far as methodology is concerned it is as mechanistic as the work of Ricardo or the theory of interest of Irving Fisher or the theory of distribution of John Bates Clark And this is as it should be For economics is best described as the study of the structure and action of the industrial system with an object in view namely that of making us good judges of questions of the policy of the state or of any body of persons such as organized labor or capital toward the industrial system That is the touchstone of importance and relevancy in economics is applicability to questions of public policy It is on the strength of this test of relevancy that Fetter's methodology is pronounced the right one It is also merely the dominant methodology of all the leading general texts past and present

Vol. II John Rogers Commons, *Constructing Economic Science* Keith Tribe,2022 Constructing Economic Science shows how the new science of economics was primarily an institutional creation of the modern university Keith Tribe charts the path through commercial education to the discipline of economics and the creation of an economics curriculum that could be replicated around the world **Medieval Islamic**

Loja, 2022-09-22 This book examines whether international agreements between non-state actors can be identified as a source of international law using objective criteria It asks whether beyond Article 38 of the Statute of the International Court of Justice there is a system of rules processes beliefs or semantics by which these agreements can be objectively identified as a source of international law Departing from the more usual state-centric analysis it adopts postmodern legal positivism as its analytical tool This allows for the reality that international law making takes place in subjective social landscapes To test the effectiveness of this approach it is applied to agreements between petroleum agencies and corporations which allow two or more states to exploit disputed resources across boundaries looking in particular at arrangements involving China Vietnam and the Philippines By so doing it illustrates an alternative way that states can manage disputes without having to resort to conflict It will appeal to both scholars and practitioners of public international law as well as civil servants **Indonesia's**

Theory and Economic Progress: The Institutional Economics of J. Fagg Foster Marc R. Tool, 2012-12-06 J Fagg Foster 1907 1985 was one of the most significant creators of institutionalist economic theory in the twentieth century He wrote and taught in the American intellectual tradition of Thorstein Veblen John R Commons John Dewey and Clarence E Ayres This tradition shares purpose and philosophy with the European contributors Gunnar Myrdal and K William Kapp Because little of Foster s scholarly work was formally published professional knowledge of his extraordinary contribution is quite limited beyond the circle of his students and colleagues Value Theory and Economic Progress attempts to correct that deficiency by providing an extended characterization of this missing and crucial component of the development of American heterodox economic thought Its purpose is to demonstrate the timely relevance and significance of this model of inquiry in political economy In addition this volume explains that contemporary problem solving means changing what is into what ought to be through institutional adjustments such a demonstration is at the heart of Foster s contribution to institutional thought

Economics and Performativity Nicolas Brisset, 2018-07-27 Economists do more than merely describe an external economic world They shape it in the image of their theories and models This idea following the philosophy of language puts forward that economic theories are performative and not only descriptive This idea has become a powerful critique of the scientificity of economics since it removes the idea of an external world against which our description could be evaluated as truth If any theory can become true there are no true theories per se because there is no such thing as a pre existing economy to describe Is such a relativist stance a fatality This is the question at stake in this book Furthermore the author asks if any theory is able to perform the social reality or are there actually some limits to performativity For philosophers a

performative statement is a statement that cannot fail to mean something but can fail to do what it calls for The state of the world may or may not be changed the performative statement may be happy or unhappy In economic terms this can be interpreted as some theories change the world while some do not This book argues that this possibility of failure a perspective previously missing from discussions on the subject should be at the heart of any definition of failure Taking on the question of why some theories change the world while others do not this volume will be of interest to those studying advances courses on the philosophy of economics as well as those studying and researching in the areas of the philosophy of sciences and sociology of science and economics
