Wilson,1997-02-24 There is a revival of interest by economists in ethical issues and beliefs and by moral philosophers and theologians in economics This book is intended to make a contribution to this cross fertilisation of ideas Rodney Wilson has undertaken an extensive survey of Jewish Christian and Muslim views on economics and reviewed the rapidly expanding business ethics literature from a religious perspective The juxtaposition of the work of theologians and moral philosophers with that of economists results in some interesting comparisons *Advanced Placement Economics* John S. Morton,Rae Jean B. in environmental sciences without a background in economics It also serves as a companion for economists interested in a presentation of the micro and macro foundations of environmental economics in a nutshell The second edition has been revised updated and extended in many ways for instance by adding a microeconomic section on environmental technical change a discussion of the significance of technical change for a sustainable development and a considerably extended macroeconomic section on economic growth

The Reciprocal Modular Brain in Economics and Politics Gerald A.

Cory Jr.,2012-12-06 The present work is an extension of my doctoral thesis done at Stanford in the early 1970s In one clear sense it responds to the call for consilience by Edward O Wilson I agree with Wilson that there is a pressing need in the sciences today for the unification of the social with the natural sciences I consider the present work to proceed from the perspective of behavioral ecology specifically a subfield which I choose to call interpersonal behavioral ecology Ecology as a general field has emerged in the last quarter of the 20 century as a major theme of concern as we have become increasingly aware that we must preserve the planet whose limited resources we share with all other earthly creatures Interpersonal behavioral ecology however focuses not on the physical environment but upon our social environment It concerns our interpersonal behavioral interactions at all levels from simple dyadic one to one personal interactions to our larger even global social economic and political interactions Interpersonal behavioral ecology as I see it then is concerned with our behavior toward each other from the most obvious behaviors of war between nations to excessive competition exploitation crime abuse and even to the ways in which we interact with each other as individuals in the family in our social lives in the workplace and in the marketplace

Economics as an Empirical Social Science Daniel Weißbrodt,2024-07-08 Economics still adheres entirely unreflectively to a mechanistic worldview and machine thinking Epistemologically it thus remains in the 19th century and its assumptions and theories methods and models therefore stand in stark contradiction to the findings of all other social and natural sciences as well as a multitude of empirical facts Through a discourse analytical examination of sixteen basic concepts in economics based on twelve standard economics textbooks their ideahistorical origin and use are worked out and compared and related to the current state of knowledge of other disciplines This reveals the structural methodological and content errors of economics in a clear manner Especially for critical students who have long been demanding an economics that is in line with the current state of research and faces the challenges of the 21st century this opens up the possibility of a new approach to economics The Content Discourse analytical examination of fundamental assumptions and concepts of economics from labor to wealth Structural methodological and content critique of economic thinking from an epistemological perspective Critical examination of the use of empirical and statistical data the method of gaining knowledge and the model thinking in economics Principles of Agricultural Economics Andrew Barkley,Paul W.
