Myrick Freeman III,Robert H. Haveman,Allen V.

Kneese,1984 Controversial Issues In Environmental Policy Kent E. Portney,1992-09-03 Most controversies in environmental policy are rooted in clashes of values involving science and technology versus humanism economic efficiency versus humanism the role of nature in society and the role of government in society The author discusses how America makes environmental policy at the Federal and State levels as well as their enforcement agencies designed to protect and regulate

Economics of Environmental Policy in Oligopolistic Markets Mahelet G. Fikru,Matt Insall,2015 With the rising public and political concern about greener production there is unrelenting pressure on individual companies to mitigate and abate pollution and adopt cleaner technologies Governments adopt several types of environmental policies and regulations that are aimed at protecting the

environment and encouraging efficient use of natural resources Instruments such as carbon tax emission quota and abatement subsidy are being proposed and implemented in several countries Such policies affect firms strategic decision making such as creating joint ventures product differentiation R D expansion and outsourcing This book examines the relationship between firms strategic decision making environmental policies and its resulting effect on society Each chapter builds a theoretical model in which the market structure is imperfect competition *Empirical Studies of Environmental Policies in Europe* John W. Maxwell, Jürgen von Hagen, 2000-06-30 The visible encroachment of industrial development on the environment and its unintended consequences has increased public demand for better environmental management and policy As policy makers struggle to meet these demands empirical analysis of the effects of environmental policies is crucial for guiding the development the implementation and the evaluation of alternative government interventions and regulatory approaches Such analysis is scarce however The need for empirical studies is particularly large in Europe where environmental policy debates are still mainly theoretical and tend to reflect different ideological positions more than informed assessments of alternative policies *Empirical Studies of Environmental Policies in Europe* presents contributions on empirical environmental policy evaluation The individual chapters written by authors from Europe and the US contain quantitative studies of proposed and implemented environmental policies at both the micro and macroeconomic levels The policy issues studied in this volume include the double dividend hypothesis of carbon taxation the political economy of en
