Ecology And Land Use In Upland Scotland:

Ecology and Land Use in Upland Scotland Donald N. McVean, James Donaldson Lockie, 1969 **Ecology and Management of Atlantic Salmon** D. Mills, 1991-09-30 From reviews of the hardback edition No matter how experienced a salmon man the reader is I cannot believe he will study this extremely informative book without learning a great deal and gaining much enjoyment from doing so The biology and life of the salmon are all dealt with in a most interesting manner Highly recommended A book not to be read just once but often to be consulted This book is dedicated to Salar the Salmon and what a tribute it is to this unique fish Supporters of the Trust would be wise to purchase this book and to keep it on the shelf for future reference Atlantic Salmon Trust Progress Report *The Cultured Landscape* Sheila Harvey, Ken Fieldhouse, 2005 A team of eminent practitioners and writers contribute to an assessment of the philosophy of landscape and collectively form a new approach to creative design EPA-600/5 , 1974-02 *Decolonizing Nature* William Adams, Martin Mulligan, 2012-04-27 British imperialism was almost unparalleled in its historical and geographical reach leaving a legacy of entrenched social transformation in nations and cultures in every part of the globe Colonial annexation and government were based on an all encompassing system that integrated and controlled political economic social and ethnic relations and required a similar annexation and control of natural resources and nature itself Colonial ideologies were expressed not only in the progressive exploitation of nature but also in the emerging discourses of conservation At the start of the 21st century the conservation of nature is of undiminished importance in post colonial societies yet the legacy of colonial thinking endures What should conservation look like today and what indeed whose ideas should it be based upon Decolonizing Nature explores the influence of the colonial legacy on contemporary conservation and on ideas about the relationships between people politics and nature in countries and cultures that were once part of the British Empire It locates the historical development of the theory and practice of conservation at both the periphery and the centre firmly within the context of this legacy and considers its significance today It highlights the present and future challenges to conservationists of contemporary global neo colonialism The contributors to this volume include both academics and conservation practitioners They provide wide ranging and insightful perspectives on the need for and practical ways to achieve new forms of informed ethical engagement between people and nature **The Making of the Scottish Rural Landscape** David Turnock, 2016-12-05 This book looks at the evolution of rural settlement in Scotland from the Mesolithic period through to the improving movement of the 18th and 19th centuries The main emphasis is on changes in society and technology but the book also considers how the development of the physical landscape laid the foundation for such changes The author strikes a balance between general perspectives including relevant contextual materials such as the political structures and local studies with much emphasis on individual sites Lack of documentation prior to the 10th century places particular importance on the archaeological evidence but imaginative interpretation of this evidence has led to a major re evaluation Ideas emphasizing continuity of settlement

and local adaptation are replacing older invasionist theories emphasizing Celtic war lords and broch building pirates

Upland Habitats Alan F. Fielding, Paul F. Haworth, 2002-01-31 Upland Habitats presents a comprehensive illustrated guide to the habits wildlife and conservation of Britain's last wilderness areas. These include heather moors, sheep walk deer forest, blanket bogs, montane and sub montane forests. The book examines the unique characteristics of uplands and the ecological processes and historical events that have shaped them since the end of the last glaciation. Among the key conservation and management issues explored are modern agricultural practices and economics, habitat degradation through overgrazing, commercial forest plantations, the persecution of wildlife, recreation in the uplands, the funding of upland farming.

Advances in Ecological Research, 1987-04-14 Advances in Ecological Research first published in 1962 is one of Academic Press's most successful and prestigious series. In 1999 the Institute for Scientific Information released figures showing that the serial has an Impact Factor of 9.6 with a half life of 10.0 years placing it 1st in the highly competitive category of Ecology. The Editors have always striven to provide a wide range of top quality papers on all aspects of ecology such as animal plant physiology, population, community, landscape and ecosystem ecology. Eclectic volumes in the serial are supplemented by thematic volumes on such topics as Estuaries and Ancient Lakes. Now edited by Dr Hal Caswell of Woods Hole Oceanographic Institution, Advances in Ecological Research continues to publish topical and important reviews interpreting ecology as widely as in the past to include all material that contributes to our understanding of the field.

Basic Biogeography N.V. Pears, 2014-06-06 First published in 1985, this is the second edition of a study looking at ecology and biogeography with updated chapters including current research. It starts with the study of plants to gain an understanding of the complexities of ecological relationships.

The Politics of Environment Malcolm Slessor, 2021-10-12 Originally published in 1972 and ahead of its time in many respects, this book was the first to take a constructive approach to the problems facing the human race in the 20th Century. It remains enduringly relevant today and discusses over population, under employment, atmospheric pollution, exhaustion of global resources and geo politics. It shows how all these issues are interconnected and therefore how conventional attempts to solve some of them merely exacerbate others. It asserts that the solution rests in the evolution of a realistic form of politics which puts the community first.

Wellbeing and Self-Transformation in Natural Landscapes Rebecca Crowther, 2018-09-20 This book explores how natural landscapes are linked to positive mental wellbeing. While natural landscapes have long been represented and portrayed as transformative, the link to mental wellbeing is an area that researchers are still aiming to comprehend. Accompanying five groups of people to rural Scotland, the author considers

individual external and group motivations for journeying from urban environments examining in what ways these excursions are personally and socially transformative Far more than traversing mere physical boundaries this book illustrates the new challenges experiences territories and cultures provided by these excursions firmly anchored in the Scottish countryside In doing so the author questions the extent to which people s own narratives link to the perception that the outdoors are positively transformative and what indeed does have the power to influence transformation Grounded in extensive qualitative research this contemplative and ethnographic book will be of interest and value to students and scholars of the outdoors and its connection to wellbeing

Heritage J.D. Fladmark,2014-02-04 This volume deals with policy methods and techniques for the stewardship of our land and our cultural assets The focus is on interpretation and presentation of heritage themes and the papers should be of interest to those concerned with school and university curricula those working in museums and galleries and those in charge of parks and tourist enterprises Individual contributions celebrate achievements and debate issues relating to the natural and built environment the future of green tourism planning and interpretation in museums parks and private estates The authors include Professor David Lowenthal on cultural landscapes Charles McKean on architecture David Macmillan on the arts John Purser on music Elisabeth Luard on cooking the Earl of Glasgow on the opening of a family estate to the public and Gordon Baxter on the heritage of one of Scotland s great enterprise stories in the food industry The main theme of the book is that we do not always take enough pride in our heritage which is often undervalued and neglected Positive action is required to raise awareness to foster respect for our inheritance and to generate a new kind of enterprise that will not endanger the heritage resources on which we depend for enjoyment and jobs

Gulls and Plovers C.J. Barnard,D.B.A. Thompson,2012-12-06 In the early years of this century a Scottish doctor speculated on the evolutionary origin of human tears It seemed to him that with the increase in brain size and cognitive powers of our early ancestors many events in the struggle for existence would be just too distressing to observe How comforting then for the mother distraught by the sight of her child being devoured by a lion to cloud her vision with a flood of tears Just so though if the good doctor had pondered further the following picture might have occurred to him comfortable in his speculative armchair and given him some pause for thought u _ vii viii

SERIES EDITOR S FOREWORD

These stories do not of course get us very far in understanding the evolution of tears or anything else but they do remind us how far the study of behavioural adaptation has come this century This is in fact an exciting time for students of behaviour The last twenty years have seen a great advance in the theoretical armoury for tackling questions of behavioural evolution and adaptation and a parallel expansion in empirical studies particularly in the field The concepts of inclusive fitness and the evolutionarily stable strategy for example have helped to explain major features of social behaviour and have generated entirely new questions and predictions for the field worker to examine

Restoration and History Marcus Hall,2010-02

Papers from a meeting of an interdisciplinary group of ecologists geographers anthropologists sociologists historians and philosophers held July 2006 in Zurich Switzerland **The Nature of the Cairngorms** Philip Shaw, Des B.A.

Thompson, 2006-06-12 The Cairngorms area is arguably the most significant for nature conservation in the British Isles and contains its largest National Park In this book 35 authors drawing on published and unpublished sources present an up to date review of the area s natural features including plants animals habitats geology and landforms The review falls into three parts The first and largest part describes the area s rich diversity of nature with each chapter summarising recent research findings trends and conservation issues for a different landform habitat or species group The second part considers deer management recreation and projected climate change impacts Part three focuses on rare and threatened species and identifies areas and habitats rich in species for which the Cairngorms are nationally and internationally important Bird Habitats in Britain R. J. Fuller, 2010-09-30 The book describes all the main habitat types the structure and composition of bird communities and reviews bird sites and their distribution throughout Britain Rob Fuller s book would not have been possible but for the nationwide cooperative endeavour by amateur and professional ornithologists naturalists and conservationists which led to the British Trust for Ornithology s Register of Ornithological Sites sponsored by the Nature Conservancy Council Hitherto few books have dealt primarily with bird habitats but the subject is of urgent importance now that exploitation of the environment has left few corners of Britain untouched or unthreatened Even so the book is much more than timely it also extends the reader s interest to an area of bird study that has perhaps been too little considered The text is supported by more than 100 diagrams and maps and over 50 photographs in addition there are 53 superbly evocative drawings by Donald Watson For the birdwatcher and all involved with conservation this is stimulating reading and an essential reference *An Introduction to Heathland Ecology* C. H. Gimingham, 1975
