Econometrics Of Demand Systems With Applications To Food Demand In The Nordic Countries:

The Econometrics of Demand Systems David L. Edgerton, Bengt Assarsson, Anders Hummelmoose, Ilkka P.

Laurila, Kyrre Rickertsen, Per Halvor Vale, 2012-12-06 This book contains some of the results from the research project Demand for Food in the Nordic Countries which was initiated in 1988 by Professor Olof Bolin of the Agricultural University in Ultuna Sweden and by Professor Karl Iohan Weckman of the University of Helsinki Finland A pilot study was carried out by Bengt Assarsson which in 1989 led to a successful application for a research grant from the NKJ The Nordic Contact Body for Agricultural Research through the national research councils for agricultural research in Denmark Finland Norway and Sweden We are very grateful to Olof Bolin and Karl Iohan Weckman without whom this project would not have come about and to the national research councils in the Nordic countries for the generous financial support we have received for this project We have received comments and suggestions from many colleagues and this has improved our work substantially At the start of the project a reference group was formed consisting of Professor Olof Bolin Professor Anders Klevmarken Agr lie Gert Aage Nielsen Professor Karl Iohan Weckman and Cando oecon Per Halvor Vale Gert Aage Nielsen left the group early in the project for a position in Landbanken and was replaced by Professor Lars Otto while Per Halvor Vale soon joined the research staff The reference group has given us useful suggestions and encouraged us in our work We are very grateful to them

The Advanced Econometrics of Tourism Demand Haiyan Song, Stephen F. Witt, Gang Li, 2008-12-09 Tourism demand is the foundation on which all tourism related business decisions ultimately rest This book introduces students researchers and practitioners to the modern developments in advanced econometric methodology within the context of tourism demand analysis and illustrates these developments with actual tourism applications

Economic Development and Consumption Patterns in Asian Countries Shashika D. Rathnayaka, Saroja Selvanathan, Eliyathamby A. Selvanathan, 2024-07-05 This book analyzes consumption patterns in Asian countries that are at different stages of economic development and highlights the similarities and disparities of consumption patterns across countries using a system wide framework In a departure from previous studies in the literature which mainly present only single country analysis this book aims to provide a comprehensive analysis of cross country consumption patterns considering several Asian countries using the most recent consumption expenditure data for aggregate commodity groups In comparing consumption patterns across countries the book use unit free measurements such as budget shares and changes in logarithms of price and quantities thus avoiding problems associated with exchange rate conversions The book also analyses the dynamic behaviour in the consumption patterns of the Asian consumers The findings of this book will be invaluable to researchers in development economics as well as policymakers in the formulation of fiscal policy or other types of economic control

Short-cut Demand Elasticities and Other Convenient Approaches to Consumer Demand Kenneth

W. Clements, Haiyan Liu, Marc Jim M. Mariano, Eliyathamby A. Selvanathan, Saroja Selvanathan, George Verikios, 2025-07-14
This book provides answers to analysts need to know about elasticities of demand with a unique two track approach The first gives a self contained non technical rendition accessible to those with limited background The second track contains the underlying theory derivations and some more advanced material Subsequent chapters deal with the demand for food and other groups of goods the system wide approach and the demand side of EDM and CGE models This convenient source book will be valuable to students consultants business economists and government policy analysts Clarity of exposition and economic intuition is emphasised throughout In this remarkable book the authors bridge the gap between sophisticated consumer demand theory and the practical world of economic modeling Their guidance will be invaluable to anyone aiming to shed light on the economic impact of public policies Thomas W Hertel Distinguished Professor and Executive Director Center for Global Trade Analysis Purdue University The elasticity of demand is a key parameter in economics whether for micro studies or large scale models This book illuminates on short cut approaches for measuring this elasticity and provides derivations and applications It is a valuable resource for both students and seasoned economists Paul Burke Professor and Head Arndt Corden Department of Economics and Deputy Director Crawford School of Public Policy ANU College of Law Governance and Policy Australian National University This book endears itself to me with its honest approach to determining elasticities for use in policy analysis In Chapter 1 it tells us about the rule of one half if you can't do any better set own price elasticities for household demands for broadly defined commodities at 0.5 Then through ten chapters Ken Clements and his co authors demonstrate that you can do better by combining economic theory with relatively straightforward econometrics The book deserves wide readership among applied economic modellers who want to take their field forward by supplementing judgement with statistical evidence Peter Dixon AO Professor Centre of Policy Studies Victoria University

Water management for sustainable agriculture Prof. T. Oweis, 2018-07-09 Comprehensive review of the range of water resources from groundwater and surface water to rainwater floodwater and waste water Discusses advances in irrigation techniques from surface irrigation to micro drip irrigation and fertigation Assesses methods for optimising agricultural water use in rainfed and other systems *Improving Compliance with Food Safety Legislation* Chris Griffith, 2005 The BRG also welcomed a number of guests who spent time working with the Group on their own projects The focus has been primarily on biomedical research and clinical medicine although some work has been done in other areas The new methods allow subject based analysis to take place in ways that have not previously been possible and have led to many reports for clients and publications in journals **Contemporary Issues in Sustainable Development** Tanika Chakraborty, Deep Mukherjee, Sarani Saha, 2020-12-28 This book analyzes different perspectives around sustainable development risk management and managing demand across various sectors in India Diverse theories and analytical methods from various disciplines as well as case studies are brought together to present an in depth study The book discusses the

challenges of achieving sustainability the role of quantitative research to assess current scenarios and the role of policy making to bring improvements in the Indian context It examines the socioeconomic ways of pursuing sustainable development in the areas of agriculture climate change and energy the environment and natural resources health and society It also analyzes important quantitative models for sustainability policy analysis and provides case studies to understand the practical implementations of the models This book will be a great reference manual that covers a whole gamut of analytical techniques that are useful for students research scholars and practitioners of economics environmental studies development studies sociology South Asian studies and public policy among others

Trust as a Determinant of Consumer Behaviour Under Uncertainty Leef H. Dierks, 2005

The Skeptical Environmentalist Bjørn Lomborg, 2001-08-30 The Skeptical Environmentalist challenges widely held beliefs that the environmental situation is getting worse and worse The author himself a former member of Greenpeace is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence Using the best available statistical information from internationally recognised research institutes Bjørn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world His arguments are presented in non technical accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves Concluding that there are more reasons for optimism than pessimism Bjørn Lomborg stresses the need for clear headed prioritisation of resources to tackle real not imagined problems The Skeptical Environmentalist offers readers a non partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media

Estimation of Elasticities of Demand for Imported Meat in Russia Alexei Leonidovich Soshnin, 1998

Economics of Micronutrient Malnutrition Olivier Ecker, 2009

Micronutrient malnutrition is a serious public health problem especially in developing countries Hence evaluating the

nutritional impacts of market and policy changes requires more than just a calorie focus This work extends the traditional perspective and analyzes the effects of income food price and sociodemographic developments on vitamin and mineral adequacies at the household level The author proposes two approaches to estimate income and price elasticities of nutrient consumption and presents a procedure for assessing the nutrition situation in populations based on food consumption data Using both approaches demand models are applied in two empirical studies with data from rural East Africa and Malawi Results suggest that the nutritional status is highly income responsive Price elasticities are lower in absolute values albeit with notable differences between nutrients Policy implications are discussed
