DeMartino,2022-07-26 The tragic science The tragedy of economics Economic paternalism heroic economics Harm s complexity The origins of econogenic harm The unevenness of econogenic impact The specter of irreparable ignorance Counterfactual fictions in economic explanation and harm assessment Economic moral geometry Managing harm via economic moral geometry Moral geometry An assessment Beyond moral geometry interests social harm capabilities Confronting econogenic harm responsibly Economic harm profile analysis Decision making under deep uncertainty Conclusion from reckless to responsible economics **Why the Economists Got it Wrong** Alessandro Roncaglia,2010-08-01 Why the Economists Got It Wrong illustrates the origins and development of the financial crisis tracing its cultural origins in mainstream views which favoured financial liberalization policies These views are contrasted with those of Keynes and Keynesian economists such as Minsky pointing to an interpretation of economic events where uncertainty plays a central role and economic policy is aimed at building institutional and regulatory structures in order to counter financial fragility *General and Periodic Crises of Overproduction* Jean Lescure,2023-11-14 Jean Lescure s two volume General and Periodic Crises of Overproduction is a pioneering study of the causes and consequences of industrial crises in capitalist economies in the nineteenth and early twentieth centuries The author who held doctorates in political economy and law is most remembered as a founder of the French historical school and a staunch advocate of empiricism in the economic sciences Lescure called his approach the complex historical method by which he sought to revise classical and quantitative economic theory through the historical analysis and statistical observation of cyclical phenomena Ever the controversialist Lescure wrote in an engaging style accessible to non specialists and economists alike and critiqued the leading monetary theorists of the period insisting that observation of the movements in production costs industrial orders and profits be given priority over circulation and credit in understanding the periodic crises of capitalist economies In Lescure s view crises were inevitable in both market and command economies and their onset and consequences were predictable with the help of the more detailed production statistics newly available to economists and entrepreneurs at the time Observation of corporate profits the margin between cost price and selling price provided the means to predict crises and measure their impact not only on industry and trade but also on the working classes who would endure unemployment and the many social ills that accompany it Lescure unlike many of the liberal economists of the time was always careful to include in his historical account statistical analysis of unemployment figures as well as those on crime marriage and birth rates homelessness and suicide

Although he remained sceptical of government intervention in the form of monetary policies adjusting the money supply and lauded the success of industrial concentration and trusts in reducing costs and prices Lescure admitted the state's role in the recovery of the 1930s when social insurance schemes and investment in public works mitigated the worst effects of unemployment for industrial labour This treatise which grew out of his doctoral work was a lifetime project for Lescure who updated it periodically over five editions to include each new cycle of growth crisis depression and recovery Volume one provides a historical study of economic crises from the post Napoleonic period through the Great Depression and the recovery of the late 1930s Volume two offers a critique of the theories of crises their causes and potential remedies in which Lescure outlines his preference for organic theories that focus on the production process and qualitative statistical observation of the movements in costs selling prices industrial orders and profits The text of the fifth edition appears here in English for the first time unabridged and complete with editorial materials designed to help the English reader understand the work on its own terms and situate its author's prominent place in the history of economic thought *The Death of*

The Contribution of Economics to International Disorder Jan Tumlir,1981 Coming Reaction Legislator,1903 **The Coming Reaction** William Arthur Shaw,1903 International Economic Disintegration Wilhelm Röpke,2007 Röpke wrote this book in the late 30s and it was published in 1942 He explains how the world unraveled the 1930s from a combination of protectionism and monetary destruction And while his analysis is robust he also relays what seems to be an epiphany for him there are non economic reasons the world collapsed The rise of nationalism frightened him and what is its source The old code of morals and manners even the code of honor among people seems to have been shredded People long for more than prosperity they want cultural and social coherence and stability and states with a mission The market cannot provide this It must come tradition or religion or something else Observing this he seems to suggest that the old liberal creed failed He proposes a new direction that unites freedom with a new concern for cultural coherence and morality The Mystery of the Trade Depression Frederic E. Holsinger,1929 **Illusions Lost - An Elegy in Three Parts** Derryl Hermanutz,2020-06-12
