Ecology And Land Management In Amazonia:

Ecology and Land Management in Amazonia Michael John Eden,1990 *Ecology and Land Management in Amazonia*
Michael J. Eden,1994-02-28 Ecology and Land Management in Amazonia Michael John Eden,1990 **Human Impacts
on Amazonia** Darrell Addison Posey,Michael J. Balick,2006 Of late religion seems to be everywhere suffusing U S politics
and popular culture and acting as both a unifying and a divisive force This collection of manifestos Supreme Court decisions
congressional testimonies speeches articles book excerpts pastoral letters interviews song lyrics memoirs and poems reflects
the vitality diversity and changing nature of religious belief and practice in American public and private life over the last half
century Encompassing a range of perspectives this book illustrates the ways in which individuals from all along the religious
and political spectrum have engaged religion and viewed it as a crucial aspect of society The anthology begins with
documents that reflect the close relationship of religion especially mainline Protestantism to essential ideas undergirding
Cold War America Covering both the center and the margins of American religious life this volume devotes extended
attention to how issues of politics race gender and sexuality have influenced the religious mainstream A series of documents
reflects the role of religion and theology in the civil rights feminist and gay rights movements as well as in conservative
responses Issues regarding religion and contemporary American culture are explored in documents about the rise of the
evangelical movement and the religious right the impact of new post 1965 immigrant communities on the religious landscape
the popularity of alternative New Age and non Western beliefs and the relationship between religion and popular culture The
editors conclude with selections exploring major themes of American religious life at the millennium including both
conservative and New Age millennialism as well as excerpts that speculate on the future of religion in the United States The
documents are grouped by theme into nine chapters and arranged chronologically therein Each chapter features an extensive
introduction providing context for and analysis of the critical issues raised by the primary sources **Cultivated
Landscapes of Native Amazonia and the Andes** William M. Denevan,2002 Cultivated Landscapes of Native Amazonia and
the Andes examines Indian agriculture in South America The focus is on field types and field technologies including
agricultural landforms such as terraces canals and drained fields which have persisted for hundreds of years What emerges
is a picture of mostly successful indigenous farming practices in difficult environments rain forests savannahs swamps
rugged mountains and deserts **Perspectives In Resource Management In Developing Countries (volume Iv: Land
Appraisal And Development)** Baleshwar Thakur,2009 *In Amazonia* Hugh Raffles,2014-09-15 The Amazon is not what it
seems As Hugh Raffles shows us in this captivating and innovative book the world s last great wilderness has been
transformed again and again by human activity In Amazonia brings to life an Amazon whose allure and reality lie as much or
more in what people have made of it as in what nature has wrought It casts new light on centuries of encounter while
describing the dramatic remaking of a sweeping landscape by residents of one small community in the Brazilian Amazon

Combining richly textured ethnographic research and lively historical analysis Raffles weaves a fascinating story that changes our understanding of this region and challenges us to rethink what we mean by nature Raffles draws from a wide range of material to demonstrate in contrast to the tendency to downplay human agency in the Amazon that the region is an outcome of the intimately intertwined histories of humans and nonhumans He moves between a detailed narrative that analyzes the production of scientific knowledge about Amazonia over the centuries and an absorbing account of the extraordinary transformations to the fluvial landscape carried out over the past forty years by the inhabitants of Igarap Guariba four hours downstream from the nearest city Engagingly written theoretically inventive and vividly illustrated the book introduces a diverse range of characters from sixteenth century explorers and their native rivals to nineteenth century naturalists and contemporary ecologists logging company executives and river traders A natural history of a different kind In Amazonia shows how humans animals rivers and forests all participate in the making of a region that remains today at the center of debates in environmental politics

The Physical Geography of South America Thomas T. Veblen, Kenneth R. Young, Antony R. Orme, 2015-04-01 The Physical Geography of South America presents an enduring statement of the continents fascinating environments Written by international specialists it addresses themes ranging from tectonism and climate change to biotic endemism analyzes specific regions from the Amazon forests to the Patagonian steppes and evaluates human impacts on the environment over time

Advances in Historical Ecology William L. Balée, 2012-09-18 Ecology is an attempt to understand the reciprocal relationship between living and nonliving elements of the earth For years however the discipline either neglected the human element entirely or presumed its effect on natural ecosystems to be invariably negative Among social scientists notably in geography and anthropology efforts to address this human environment interaction have been criticized as deterministic and mechanistic Bridging the divide between social and natural sciences the contributors to this book use a more holistic perspective to explore the relationships between humans and their environment Exploring short and long term local and global change eighteen specialists in anthropology geography history ethnobiology and related disciplines present new perspectives on historical ecology A broad theoretical background on the material factors central to the field is presented such as anthropogenic fire soils and pathogens A series of regional applications of this knowledge base investigates landscape transformations over time in South America the Mississippi Delta the Great Basin Thailand and India The contributors focus on traditional societies where lands are most at risk from the incursions of complex state level societies This book lays the groundwork for a more meaningful understanding of humankind's interaction with its biosphere Scholars and environmental policymakers alike will appreciate this new critical vocabulary for grasping biocultural phenomena

The Forest Frontier Peter A. Furley, 2024-06-25 Originally published in 1994 this book analysed land developments deforestation and pasture substitution colonisation schemes and spontaneous settlement during the latter part of the 20th Century In so doing The Forest Frontier presents an overview of the intrinsic environmental

and socio economic resources of the Roraima the most northerly of the Brazilian Amazon states Roraima is of special environmental interest because of its extensive savannas and varied forests the home of some of the largest and most diverse groups of indigenous Indians This critical assessment of the nature and pace of agricultural advance into Roraima examines the range of strategies which have been proposed to cope with the inevitable development With the conflict between preserving the natural environment and development still major issues for Brazil this book remains as relevant now as when it was first published Developing The Environment C Barrow,2014-09-19 This book presents a comprehensive overview of global environmental problems past present and future examining their roots and implications and suggesting where possible ways in which they might be mitigated or avoided by careful management **Soil Biodiversity in Amazonian and Other Brazilian Ecosystems** F. M. S. Moreira,J. O. Siqueira,L. Brussaard,2006 The loss of biological diversity has become an increased concern over recent years and is now enshrined in international conventions Most biodiversity in fact occurs in the soil Soil organisms especially bacteria fungi and soil invertebrates play a major role in the formation of soil structure and are primary agents of decomposition and are drivers of nutrient cycling and hence agricultural production This book reviews soil biodiversity in one of the key biodiversity hotspots of the world i e the Amazon and nearby regions of Brazil It covers both the tropical savannah and rain forests The work reported is based on a project Conservation and Sustainable Management of Below Ground Biodiversity executed by TSBF CIAT with co financing from the Global Environment Facility GEF and implementation support from the United Nations Environment Programme UNEP The book represents a major contribution to the literature and will interest those in biodiversity conservation soil scienceand ecology and biodiversity conservation

Climate Change and Cultural Dynamics David G. Anderson,Kirk Maasch,Daniel H. Sandweiss,2011-07-28 The Middle Holocene epoch 8 000 to 3 000 years ago was a time of dramatic changes in the physical world and in human cultures Across this span climatic conditions changed rapidly with cooling in the high to mid latitudes and drying in the tropics In many parts of the world human groups became more complex with early horticultural systems replaced by intensive agriculture and small scale societies being replaced by larger more hierarchial organizations *Climate Change and Cultural Dynamics* explores the cause and effect relationship between climatic change and cultural transformations across the mid Holocene c 4000 B C Explores the role of climatic change on the development of society around the world Chapters detail diverse geographical regions Co written by noted archaeologists and paleoclimatologists for non specialists **Amazonian Caboclo Society** Stephen Nugent,2021-01-06 Amazonian Caboclo Society is concerned with peasant society in Brazilian Amazonia Most anthropological work in Amazonia has focused on Indian groups and caboclos peasants of mixed ancestry have generally been regarded as relics of the haphazard development of Amazonia and have received little serious attention This volume aims to analyze the reasons for the relative invisibility of caboclo society It traces the development of caboclo societies and argues that much of the current discussion of sustainable development fails to recognize the important legacy

of historical caboclo society *An Environmental History of the World* Johnson Donald Hughes,2001 This original work follows a chronological path through the history of mankind in relationship to ecosystems around the world Each chapter concentrates on a general period in human history each also has three case studies which illustrate the significant patterns occurring at that time [Tropical Rain Forest: A Wider Perspective](#) F.B. Goldsmith,2012-12-06 The international perspective for this book is the unprecedented level of concern over deforestation recognized by the meeting of world leaders at the 1992 Earth Summit in Rio do Janeiro and culminating in the appointment of the Intergovernmental Panel on Forests IPF under the auspices of the UN Commission on Sustainable Development The wide range of issues covered by the authors in this volume reflects the breadth of the international debate from national policies and activist campaigning through economic and social objectives to the sustainable management of forest and soil resources Since the conservation campaigns of the 1980s the focus of international concern has widened from tropical rain forests to all forest formations in all regions with increased recognition of global values and common responsibilities However while forest cover in some temperate countries is increasing irrational deforestation at historically unprecedented levels of damage to biodiversity and to other environmental values remains most acute in tropical countries where the need to use the natural resources for sustainable development is greatest and the capability weakest While accepting the urgency of the situation and the need for greater coherence of action at a global level the 1997 report of the IPF to the UN Commission emphasized the powers and responsibilities of national governments and the importance of National Forest Programmes but with the fuller participation of local communities and with enhanced access to international assistance *Ethnozoology* Romulo Romeu Nobrega Alves,Ulysses Paulino Albuquerque,2017-10-23 *Ethnozoology* Animals In Our Lives represents the first book about this discipline providing a discussion on key themes on human animal interactions and their implications along with recent major advances in research Humans share the world with a bewildering variety of other animals and have interacted with them in different ways This variety of interactions both past and present is investigated through ethnozoology which is a hybrid discipline structured with elements from both the natural and social sciences as it seeks to understand how humans have perceived and interacted with faunal resources throughout history In a broader context ethnozoology and its companion discipline ethnobotany form part of the larger body of the science of ethnobiology In recent years the importance of ethnozoological ethnobiological studies has increasingly been recognized unsurprisingly given the strong human influence on biodiversity From the perspective of ethnozoology the book addresses all aspects of human connection animals and health from its use in traditional medicine to bioprospecting derivatives of fauna for pharmaceuticals with expert contributions from leading researchers in the field Draws on editors and contributors extensive research experience and studies covering ethnozoology and ethnobiology Covers all aspects of human animal interaction through the lens of this emerging discipline with coverage of both domestic and wild animal topics Presents topics of great interest to a variety of researchers including

those in wildlife conservation biologists ecologists conservationists and domestic related disciplines psychologists sociologists Participatory Action Research in Natural Resource Management Christian Castellanet, Carl F. Jordan, 2004-06-02 This work evaluates the merits of a widely used approach to natural resource management participatory action research PAR an approach to resource management that strives to link researchers with farmers and other local residents whose lives are effected by long range conservation programmes The authors begin the book with the history of PAR and then use a variety of case studies that chronicle sustainable development efforts in Brazil They evaluate the strengths and weaknesses of these efforts and suggest specific ways to improve on future PAR efforts **Amazonia Without Myths** Commission on Development and Environment for Amazonia, 2001-12 This report prepared by the Commission on Development and Environment for Amazonia at the initiative of the Amazon Cooperation Treaty and supported by the Inter American Development Bank and the United Nations Development Programme is based on the concept of an Amazonia that exists above and beyond the world of fantasy and myth an Amazonia of flesh and blood of human toil of human history of human faces and hopes and future human beings It is an analysis based not only on the experiences and technologies of today's world but also and with greater emphasis on the wisdom accumulated for centuries by Amazonia itself standing Amazonia The Amazon region has the largest area of tropical forest on the planet and concern for its environmental deterioration extends well beyond the borders of the eight countries that form a part of it With support from the IDB and UNDP the Commission on Development and Environment for Amazonia prepared this report that provides data on the region's natural resources population health and infrastructure *The SAGE Handbook of Biogeography* Andrew Millington, Mark Blumler, Udo Schickhoff, 2011-09-22 A superb resource for understanding the diversity of the modern discipline of biogeography and its history and future especially within geography departments I expect to refer to it often Professor Sally Horn University of Tennessee As you browse through this fine book you will be struck by the diverse topics that biogeographers investigate and the many research methods they use Biogeography is interdisciplinary and a commonly voiced concern is that one biogeographer may not readily understand another's research findings A handbook like this is important for synthesising situating explaining and evaluating a large literature and pointing the reader to informative publications Geographical Research A valuable contribution in both a research and teaching context If you are biologically trained it provides an extensive look into the geographical tradition of biogeography covering some topics that may be less familiar to those with an evolution ecology background Alternatively if you are a geography student researcher or lecturer it will provide a useful reference and will be invaluable to the non biogeographer who suddenly has the teaching of an introductory biogeography course thrust upon them Adam C Algar *Frontiers of Biogeography* The SAGE Handbook of Biogeography is a manual for scoping the past present and future of biogeography that enable readers to consider where relevant how similar biogeographical issues are tackled by researchers in different schools In line with the concept of all

SAGE Handbooks this is a retrospective and prospective overview of biogeography that will Consider the main areas of biogeography researched by geographers Detail a global perspective by incorporating the work of different schools of biogeographers Ecplore the divergent evolution of biogeography as a discipline and consider how this diversity can be harnessed Examine the interdisciplinary debates that biogeographers are contributing to within geography and the biological sciences Aimed at an international audience of research students academics researchers and practitioners in biogeography the text will attract interest from environmental scientists ecologists biologists and geographers alike
