Indispensable Outcasts Frank Tobias Higbie, 2003 Often overlooked in the history of Progressive Era labor the hoboes who rode the rails in search of seasonal work have nevertheless secured a place in the American imagination The stories of the men who hunted work between city and countryside men alternately portrayed as either romantic adventurers or degenerate outsiders have not been easy to find Nor have these stories found a comfortable home in either rural or labor histories *Indispensable Outcasts* weaves together history anthropology gender studies and literary analysis to reposition these workers at the center of Progressive Era debates over class race manly responsibility community and citizenship Combining incisive cultural criticism with the empiricism of a more traditional labor history Frank Tobias Higbie illustrates how these so called marginal figures were in fact integral to the communities they briefly inhabited and to the cultural conflicts over class masculinity and sexuality they embodied He draws from life histories the investigations of social reformers and the organizing materials of the Industrial Workers of the World and presents a complex and compelling portrait of hobo life from its often violent and dangerous working conditions to its ethic of transient mutuality that enabled survival and resistance on the road More than a study of hobo life this interdisciplinary book is also a meditation on the possibilities for writing history from the bottom up as well as a frank discussion of the ways historians' fascination with personal narrative has colored their construction and presentation of history
