structural changes and life expectancy lead to many socioeconomic problems such as health costs in association with aging and pension systems that many societies fail to be prepared for This book contributes to the literature on macroeconomics based on microeconomics neoclassical growth theory new growth theory and family economics by integrating some important ideas in neoclassical growth theory and family economics This book extensively applies the ideas in the literature to deal with the complexity of population change Institutions and Economic Theory Eirik Grundtvig Furubotn, Rudolf Richter, 2000 A comprehensive introduction to and critical assessment of the theory and applications of the New Institutional Economics **Economic Theories, Protagonists and Facts** Maria Cristina Marcuzzo, 2024-12-18 This book brings together the work of Maria Cristina Marcuzzo and highlights her investigations into the history of economic thought and her quest for an alternative economic thinking Following an extended introduction that contextualised her ideas and highlights consistent themes throughout the volume it discusses the theoretical and methodological approaches that have come to define the history of economic thought as a discipline The work of David Ricardo is then debated alongside ideas of money and monetary systems Finally the impact of the Cambridge economists is presented with a particular focus on Luigi Pasinetti Joan Robinson Piero Sraffa and John Maynard Keynes This book combines theoretical discussions with historical analysis biographical narratives and original archival research to provide rich insights into the history and impact of economics It will be of interest to students and researchers working within the political economy and the history of economic thought
