Emergent Materialism A Proposed Solution To The Mind Body Problem:

Emergent Materialism Selton Luke Peters, 1995 An introduction to some of the major objections against traditional materialism Topics include the identity of mental and physical events the question of the existence of irreducibly psychic properties the function of consciousness and the problem of personal identity

Free Expression In The Age Of The Internet Jeremy Lipschultz, 2018-03-08 In *Free Expression in the Age of the Internet* Jeremy Lipschultz investigates the Internet and its potential for profound change analyzing the use of its technology from social political and economic perspectives Lipschultz provides new insights on traditional legal concepts such as marketplace of ideas social responsibility and public interest arguing that from a communication theory perspective free expression is constrained by social norms and conformity In *Free Expression in the Age of the Internet* Jeremy Lipschultz investigates the Internet and its potential for profound change analyzing the use of its technology from social political and economic perspectives Lipschultz provides new insights on traditional legal concepts such as marketplace of ideas social responsibility and public interest arguing that from a communication theory perspective free expression is constrained by social norms and conformity Lipschultz explores social limits on free expression by first examining history of print and electronic media law and regulation He utilizes the gatekeeping metaphor the spiral of silence and diffusion theory to explore current data on the Internet He uses *Reno v ACLU* 1997 as a case study of current First Amendment thinking This book includes recent evidence including samples of content from Internet gossip columnist Matt Drudge and the investigation of President Clinton as it unfolded on the World Wide Web The analysis is related to broader issues about Internet content including commercial and other communication The new technologies raise new questions about legal and social definitions of concepts such as privacy Free expression is explored in this book under the umbrella of a global commercial economy that places importance on legal rights such as copyright even where those rights limit free flow of ideas The Internet places free expression on two tracks On the one hand corporate players are developing cyberspace as a new mass media On the other hand the Internet is virtual space where individuals have the power to connect and communicate with others in ways never before seen This groundbreaking text advancing new media scholarship uses the most current case studies from the Internet to show free expression in practice today Lipschultz presents a relevant and efficacious social communication theory of free expression which critically examines the necessary factors involved in comprehensive policy analysis and enactment

Metaphysics of Consciousness Ramesh Chandra Pradhan, 2020-09-03 This book explores the transition from the mind to the Supermind within the scope of an evolutionary metaphysics The idea of Supermind has not been discussed so far in the mainstream philosophy of mind and consciousness This book will give a new approach to the study of consciousness from the Indian vedantic perspective which has introduced the idea of Supermind especially in the works of Sri Aurobindo The book also undertakes a sustained critique of the contemporary theories of mind which have promoted mostly a mechanistic and naturalistic theory of mind and consciousness

The book is meant for the researchers who are engaged in the study of consciousness and for those who are interested in the philosophy of mind in general This book will serve the purpose of the much needed counter perspective to the contemporary theories of mind working broadly within the materialist traditions The Philosophical Review Jacob Gould Schurman,James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 1927 An international journal of general philosophy **A**

Metaphysics for the Future Robert Allinson, 2024-11-01 This title was first published in 2001 This work is intended to serve not only as an expression of a new idea of a philosophy but as an apologia for philosophy as a legitimate and independent discipline in its own right It argues that in the 20th century truth has not been abandoned but merely modified The text proposes a return to truth and suggests that it is only after apprehending the truths of consciousness that the philosopher's mirror may become a kaleidoscope through which reality may be contemplated First order truth lies in the realm of discovery and discovery takes place only within the moment of subjective re enactment Modern Materialism and Emergent Evolution William McDougall, 1929 **The Eye and the Mind** C. Landesman, 2013-06-29 This book is a discussion of some of the major philosophical problems centering around the topic of sense perception and the foundations of human knowledge It begins with a characterization of our common sense understanding of the role of the senses in the acquisition of belief and it argues that scientific accounts of the processes of perception undermine salient parts of this understanding The naive point of view of direct realism cannot be sustained in the light of a scientifically instructed understanding of perception This critique of direct realism points to the correctness of the representative theory of perception characteristic of such early modern philosophers as Descartes and Locke and it also endorses the subjective turn that they defended It argues that these positions do not require introducing sense data into the picture and thus it avoids the intractable problems that the sense datum philosophy introduces In addition several versions of cognitive accounts of sense perception are criticized with the result that it is unnecessary to characterize sensory processes in intentional terms The book then turns to a leading question introduced into modern philosophy by Descartes and Locke the question of the accuracy of the information delivered by the senses to our faculty of belief In particular how accurate are our representations of the secondary qualities The case of color is considered in detail **International Journal of Ethics** , 1929 Includes section Book reviews *In Search of the Soul, Second Edition* Joel B. Green, 2010-11-01 Why A Search for the Soul Many Christians assume that it is biblically faithful and theologically noncontroversial to speak of humans having a soul Yet a wide range of biblical scholars are questioning whether we have correctly understood what the Bible means when it speaks of the soul And contemporary neuroscience is laying more and more questions at the doorstep of the church asking whether our human sense of self is intelligible on the basis of soul But for thoughtful Christians following science on this point looks like caving in to reductionism while denying science gives off the door of obscurantism In Search of the Soul provides a rare opportunity to listen in as four Christian philosophers set forth their best arguments for their distinct views and then respond to each other While each of these views calls for

careful framing and patient exposition they are labeled as follows SUBSTANCE DUALISM Stewart Goetz EMERGENT DUALISM William Hasker NONREDUCTIVE PHYSICALISM Nancey Murphy CONSTITUTION VIEW OF PERSONS Kevin Corcoran The editor introduces the debate by laying out the critical issues at stake and wraps it up by considering the implications for the Christian life particularly hospitality and forgiveness This is a book of timely interest to philosophers theologians psychologists and pastors Whatever conclusions readers may draw they will find here an instructive and engaging discussion of a controversy that will not go away any time soon Panpsychism and the Emergence of Consciousness Fabian Klinge,2020-08-31 In this book Fabian Klinge develops a novel approach for explaining phenomenal consciousness He defends a version of panpsychism that is the theory that some of the fundamental physical entities exhibit consciousness However in contrast to standard conceptions of the view the author does not take human consciousness to be grounded in but emergent from the consciousness of elementary particles In this form he argues panpsychism can overcome the doctrine's Achilles heel the combination problem without running into similarly severe problems thus rendering panpsychism a strong contender to its problem ridden rivals physicalism and dualism In addition the author provides a thorough analysis of the poorly studied concept of metaphysical emergence He argues that by refining some of the major contributions in the literature emergence can be made intelligible enough to serve as a basis for a credible solution proposal to the mind body problem In Search of the Soul Joel B. Green,Stuart L. Palmer,Kevin Corcoran,2005-01-01 Editors Joel B Green and Stuart L Palmer present differing evangelical perspectives on the body and soul mind and brain problem Stewart Goetz on substance dualism William Hasker on emergent dualism Nancey Murphy on nonreductive physicalism and Kevin Corcoran on the constitution view of persons The Soul of Theological Anthropology Joshua R. Farris,2016-11-25 Recent research in the philosophy of religion anthropology and philosophy of mind has prompted the need for a more integrated comprehensive and systematic theology of human nature This project constructively develops a theological accounting of human persons by drawing from a Cartesian as a term of art model of anthropology which is motivated by a long tradition As was common among patristics medievals and Reformed Scholastics Farris draws from philosophical resources to articulate Christian doctrine as he approaches theological anthropology Exploring a substance dualism model the author highlights relevant theological texts and passages of Scripture arguing that this model accounts for doctrinal essentials concerning theological anthropology While Farris is not explicitly interested in thorough critique of materialist ontology he notes some of the significant problems associated with it Rather the present project is an attempt to revitalize the resources found in Cartesianism by responding to some common worries associated with it **God, Science and Mind** Dennis Polis,2012-07-15 An exercise in Open Philosophy a worldview open to the full range of human experience including science spirituality and traditional philosophy Naturalism is exposed as a closed a priori worldview God is not an alternative to but the completion of scientific explanation The foundations and data of evolution do not show randomness but Mind in nature

Evolution aims at verifiable targets and develops means in advance of need While God is proven deductively the fine tuning argument makes a strong case despite the anthropic principle The rules of evidence are discussed critically before reviewing data on mind ranging from neuroscience connectionism cybernetics to introspection parapsychology near death experiences mysticism even I Thou relationships Current theories are inadequate to important data points Traditional philosophy suggests a single substance two subsystem theory integrating a data processing brain and an intentional immaterial soul to solve the mind body problem

Emergentist Marxism Sean Creaven,2013-04-15 In tackling emergentist Marxism in depth this well written volume demonstrates that critical realism and materialist dialectics are indispensable to theorizing the functioning of complex social and physical systems Author Sean Creaven investigates Marx s dialectics of being and consciousness forces and relations of production base and superstructure class structure and class conflict and demonstrates how they allow the social analyst to conceptualize geo history as embodying a tendential evolutionary directionality rather than as simply random or indeterminate in terms of its outcomes For those interested in social and political theory Marxism and communism and contemporary social theory this outstanding volume is an important read and a valuable resource

Being as Communion William A. Dembski,2016-04-15 For a thing to be real it must be able to communicate with other things If this is so then the problem of being receives a straightforward resolution to be is to be in communion So the fundamental science indeed the science that needs to underwrite all other sciences is a theory of communication Within such a theory of communication the proper object of study becomes not isolated particles but the information that passes between entities In Being as Communion philosopher and mathematician William Dembski provides a non technical overview of his work on information Dembski attempts to make good on the promise of John Wheeler Paul Davies and others that information is poised to replace matter as the primary stuff of reality With profound implications for theology and metaphysics Being as Communion develops a relational ontology that is at once congenial to science and open to teleology in nature All those interested in the intersections of theology philosophy and science should read this book
