Violent Acts and Urban Space in Contemporary Tel Aviv Tali Hatuka, 2010-05-01 Violent acts over the past fifteen years have profoundly altered civil rituals cultural identity and the meaning of place in Tel Aviv Three events in particular have shed light on the global rule of urban space in the struggle for territory resources and power the assassination of Prime Minister Rabin in 1995 in the city council square the suicidal bombing at the Dolphinarium Discotheque along the shoreline in 2001 and bombings in the Neve Shaanan neighborhood in 2003 Tali Hatuka uses an interdisciplinary framework of urban theory and sociopolitical theory to shed light on the discourse regarding violent events to include an analysis of the physical space where these events take place She exposes the complex relationships among local groups the state and the city challenging the national discourse by offering a fresh interpretation of contesting forces and their effect on the urban environment Perhaps the most valuable contribution of this book is its critical assessment of the current Israeli reality which is affected by violent events that continually alter the everyday life of its citizens Although these events have been widely publicized by the media there is scant literature focusing on their impact on the urban spaces where people live and meet In addition Hatuka shows how sociopolitical events become crucial defining moments in contemporary lived experience allowing us to examine universal questions about the way democracy ideology and memory are manifested in the city

Experience and Conflict: The Production of Urban Space Panu Lehtovuori, 2016-12-05 When designing, planning and building urban spaces, many contradictory and conflicting actors, practices and agendas coexist. This book propounds that at present, this process is conducted in an artificial reality. Concept City, characterized by a simplified and outdated conception of space, provides a constructive critique of the concepts underlying the practices of planning and architecture and, in order to facilitate more dynamic, inclusive and subtle practices, it formulates a new theory about space in general and

public urban space in particular. The central notions in this theory are temporality, experiment and conflict, which are grounded on empirical observations in Helsinki, Manchester and Berlin. While the book contextualizes Lefebvre's ideas on urban planning and architecture, it is in no way limited to Lefebvrian discourse but allows insights to new theoretical work, including that of Finnish and Swedish authors. In doing so, it suggests and develops exciting new approaches and tools leading to experiential urbanism.
