Emerson's Life in Science Laura Dassow Walls,2018-05-31 Ralph Waldo Emerson has traditionally been cast as a dreamer and a mystic concerned with the ideals of transcendentalism rather than the realities of contemporary science and technology In Laura Dassow Walls s view Emerson was a leader of the secular avant garde in his day He helped to establish science as the popular norm of truth in America and to modernize American popular thought In addition he became a hero to a post Darwinian generation of Victorian Dissenters exemplifying the strong connection between transcendentalism and later nineteenth century science In his early years as a minister Emerson read widely in natural philosophy or physics chemistry geology botany and comparative anatomy When he left the church it was to seek the truths written in the book of nature rather than in books of scripture While visiting the Paris Museum of Natural History during his first European tour Emerson experienced a revelation so intense that he declared I will be a naturalist Once he was back in the United States his first step in realizing this ambition was to deliver a series of lectures on natural science These lectures formed the basis for his first publication *Nature* 1836 and his writings ever after reflected his intense and continuing interest in science Walls finds that Emerson matured just as the concept of the two cultures emerged when the disciplines of literature and science were divorcing each other even as he called repeatedly for their marriage Consequently Walls writes half of Emerson s thought has been invisible to us science was central to Emerson to his language to the basic organization of his career In *Emerson s Life in Science* she makes the case that no study of literary history can be complete without embracing science as part of literature Conversely she maintains no history of science is complete unless we consider the role played by writers of literature who helped to install science in the popular imagination *International Life Writing* Paul Longley

Emerson and an interdisciplinary intervention in literary criticism This book draws on the methods and conclusions of the paradigm shifting Conceptual Metaphor Theory CMT which recognizes that metaphor is a cognitive form rather than a rhetorical or ornamental feature Closely reading Emerson's journals lectures and reassessing the major essays Emerson's Metaphors demonstrates that Emerson's prose thinks through its figurative language enabling the vital symbolic reconceptualizations of nature man and God that would prove so crucial for the emergence of American literature This monograph does not just have implications for Emerson scholarship but as the first full length study of a canonical writer to use CMT it provides a model for the interpretation of all literary works

Windolph, 2007 Examines Emersonian naturalism from the standpoint of nonlinearity offering new ways of reading and thinking about Emerson's stance toward nature and the influence of science on his thought Windolph breaks new ground by exploring how considerations of shape and the act of seeing underpin all of Emerson's theories about nature Provided by publisher

Xenocitizens Jason Berger, 2020-06-02 In *Xenocitizens* Jason Berger returns to the antebellum United States in order to challenge a scholarly tradition based on liberal humanist perspectives Through the concept of the xenocitizen a synthesis of the terms xeno which connotes alien or stranger and citizen which signals a naturalized subject of a state Berger uncovers realities and possibilities that have been foreclosed by dominant paradigms Innovatively re-orienting our thinking about traditional nineteenth century figures such as Ralph Waldo Emerson and Henry David Thoreau as well as formative writers such as William Wells Brown Martin R Delany Margaret Fuller and Harriet Beecher Stowe *Xenocitizens* glimpses how antebellum thinkers formulated in response to varying forms of oppression and crisis startlingly unique ontological and social models as well as unfamiliar ways to exist and to leverage change In doing so Berger offers us a different nineteenth century pushing our imaginative and critical thinking toward new terrain

Romantic Naturalists, Early Environmentalists Dewey W. Hall, 2016-04-08 In his study of Romantic naturalists and early environmentalists Dewey W Hall asserts that William Wordsworth and Ralph Waldo Emerson were transatlantic literary figures who were both influenced by the English naturalist Gilbert White In Part 1 Hall examines evidence that as Romantic naturalists interested in meteorology Wordsworth and Emerson engaged in proto environmental activity that drew attention to the potential consequences of the locomotive's incursion into Windermere and Concord In Part 2 Hall suggests that Wordsworth and Emerson shaped the early environmental movement through their work as poets turned naturalists arguing that Wordsworth influenced Octavia Hill's contribution to the founding of the United Kingdom's National Trust in 1895 while Emerson inspired John Muir to spearhead the United States National Parks movement in 1890 Hall's book traces the connection from White as a naturalist turned poet to Muir as the quintessential early environmental activist who camped in Yosemite with President Theodore Roosevelt Throughout Hall raises concerns about the growth of industrialization to make a persuasive case for literature's importance to the rise of environmentalism

Emerson's philosophy is his view as a naturalist that we are made of the same atoms as the world is. In counterpoint to this identity he noted the fluid evolution and diversity of combinations and configurations of those atoms. Thus he argued our relation and connection to the world are not occasional or recreational but everywhere and always and also reciprocal, ongoing and creative. He declared he would be a naturalist, which for him meant being a knowledgeable lover of nature. Emerson's famous insistence on an original relation to the universe centered on morally creative engagement with the environment. It took the form of a nature literacy that has become central to contemporary environmental ethics. The essential argument of this book is that Emerson's integrated philosophy of nature, ethics and creativity is a powerful prototype for a diverse range of contemporary environmental ethics. After describing Emerson's own environmental literacy and ethical, aesthetic and creative practices of relating to the natural world, Dunston delineates a web of environmental ethics that connects Emerson to contemporary eco-feminism, living systems theory, Native American science, Asian philosophy and environmental activism.

World Soul James Wilberding, 2021. Many philosophers and scientists over the course of history have held that the world is alive. It has a soul which governs it and binds it together. This suggestion, once so wide spread, may strike many of us today as strange and antiquated. In fact, there are few other concepts that on their face so capture the sheer distance between us and our philosophical inheritance. But the idea of a world soul has held so strong a grip upon philosophers' imaginations for over 2,000 years that it continues to underpin and even structure how we conceive of time and space. The concept of the world soul is difficult to understand in large part because over the course of history it has been invoked to very different ends and within the frameworks of very different ontologies and philosophical systems with varying concepts of the world soul emerging as a result. This volume brings together eleven chapters by leading philosophers in their respective fields that collectively explore the various ways in which this concept has been understood and employed, covering the following philosophical areas: Platonism, Stoicism, Medieval Indian or Vedantic Kabbalah, Renaissance, Early Modern, German Romanticism, German Idealism, American Transcendentalism and contemporary quantum mechanics and panpsychism theories. In addition, short reflections illuminate the impact the concept of the world soul has had on a small selection of areas outside of philosophy such as harmony, the biological concept of spontaneous generation, Henry Purcell, psychoanalysis and Gaia theories.

Environmental Evasion Lloyd Willis, 2012-01-02. How do we reconcile the abstract reverence for the natural world central to American literary history, beginning with Ralph Waldo Emerson's *Nature*, with over a century and a half of widespread environmental destruction? *Environmental Evasion* examines the environmental implications of literary and cultural productions by writers from James Fenimore Cooper and Henry Wadsworth Longfellow to Willa Cather, John Steinbeck, Ernest Hemingway and Zora Neale Hurston. Lloyd Willis provocatively argues that the environmentalist outlooks by Cooper and Longfellow were eclipsed by Ralph Waldo Emerson's abstract imperialist vision of nature. He demonstrates how many 20th century American writers have taken the Emersonian approach, participating in a

silent but extremely powerful form of evasive environmental politics in the ways in which they write about the natural world Attentive to the inherent political dimensions of all texts *Environmental Evasion* insists on the relevance of environmental history and politics to New Americanist approaches to the literary canon

The Cambridge Companion to Literature and Science Steven Meyer, 2018-05-03 In 1959 C P Snow lamented the presence of what he called the two cultures the apparently unbridgeable chasm of understanding and knowledge between modern literature and modern science In recent decades scholars have worked diligently and often with great ingenuity to interrogate claims like Snow's that represent twentieth and twenty first century literature and science as radically alienated from each other The Cambridge Companion to Literature and Science offers a roadmap to developments that have contributed to the demonstration and emergence of reciprocal connections between the two domains of inquiry Weaving together theory and empiricism individual chapters explore major figures Shakespeare Bacon Emerson Darwin Henry James William James Whitehead Einstein Empson and McClintock major genres and modes of writing fiction science fiction non fiction prose poetry and dramatic works and major theories and movements pragmatism critical theory science studies cognitive science ecocriticism cultural studies affect theory digital humanities and expanded empiricisms This book will be a key resource for scholars graduate students and undergraduate students alike
