Emotional Disorders in Children and Adolescents G. Pirooz Sholevar, Ronald M. Benson, Barton J. Blinder, 2013-10-22
Emotional Disorders in Children and Adolescents states that individual psychotherapy is a nonspecific label. It is done when two people interact in a prolonged series of emotionally charged encounters with the purpose of changing the behavior of the dyad. The motives and dynamics of individual psychotherapy are explained in detail as well as the history of the approach. The book discussed the concept of child psychoanalysis. This section includes its historical background, the similarities and differences between child and adult psychoanalysis, the age of the child that should be treated and frequency of treatment. The text also covers some techniques in the application of psychoanalysis. A broad section of the volume is focused on the modification of the child's behavior as a type of treatment. This chapter is followed by a section on the behavioral approaches in adolescent psychiatry. The book will provide useful information to psychologist, psychiatrist, behavioral specialist, students and researchers in the field of psychology.

Treating Personality Disorders in Children and Adolescents Efrain Bleiberg, 2002-01-01. This book offers a framework to make sense of childhood personality disorders, distinguish them from more frequently diagnosed childhood conditions and respond appropriately to neurobiological, psychodynamic and developmental perspectives. The author presents an effective treatment model grounded in research and clinical experience. The author first explores the nature and clinical presentation of childhood personality disorders. The book then takes the clinician step by step through offering multimodal interventions that incorporate individual psychotherapy, family treatment and pharmacotherapy. Emphasizing the importance of the therapeutic alliance, the book gives particular attention to ways that therapists can understand and work with their own emotional reactions in highly charged clinical situations.
