Emotions In Finance Distrust And Uncertainty In Global Markets:

Emotions in Finance Jocelyn Pixley, 2004-11-23 Fear and greed are terms that make light of the uncertainty in the finance world. Huge global financial institutions rely on emotional relations of trust and distrust to suppress the uncertainties. Many financial firms develop policies towards risk rather than accepting the reality of an uncertain future. They amass data in the futile hope of gaining certainty and to claim their options are more risk free than competitors. *Emotions in Finance* examines the views of experienced elites in the international financial world. It argues the current financial era is driven by a utopianism, a hope that the future can be collapsed into the present. It points out policy implications of this short term view at the unstable peak of global finance. This book provides a timely account of the influence of emotion and speculation on the world's increasingly volatile financial sector. The author includes absorbing interview material from public and private bankers in the United States, UK and Australia. [Emotions in Finance](#) Jocelyn Pixley, 2004-11-23 Publisher Description

New Perspectives on Emotions in Finance Jocelyn Pixley, 2012-12-12 The financial crisis that started in 2007 is a concern for the world. Some countries are in depression and governments are desperately trying to find solutions. In the absence of thorough debate on the emotions of money, bitter disputes, hatred and moralizing can be misunderstood. *New Perspectives on Emotions in Finance* carefully considers emotions often left unacknowledged in order to explain the socially useful versus de-civilising destructive nature of money. This book offers an understanding of money that includes the possible civilising sentiments. This interdisciplinary volume examines what is seemingly an uncontrollable, fragile world of finance and explains the panics of traders and immoral panics in banking, confidence of government and commercial decision makers, shame or cynicism of investors and asymmetries of impersonal trust between finance corporations and their many publics. Money is shown to rely on this abstract trust or faith, but such motivations are in crisis with angry conflicts over the power of disposition. Restraining influences on uncivilised emotions and rule breaking need democratic consensus due to enduring national differences in economic sentiments, even in ostensibly similar countries. Promising ideas for global reform are assessed from these cautionary interpretations. Instead of one correct vision, sociologists in this book argue that corporations and global dependencies are driven by fears and normless sentiments which foster betrayal. This book is not about individuals but habitus and market crudities. Human nature or greed cannot describe banks which do not feel because their motivations are not from personal psyches but organisational pressures and are liable to switch under money's inevitable uncertainties. This more inclusive social science studies emotions as a crucial factor among others to expand the informed public debate among policy makers, bankers, academics, students and the public. Trusting on the Edge Brown, Patrick, Calnan, Michael, 2012-04-18 Trust is fundamental to

everyday interactions and the functioning of society How trust develops or fails to develop within contexts of severe mental illness is a pertinent topic for social scientists and healthcare professionals not simply because it is an under researched area but because heightened uncertainty and amplified vulnerability amidst psychosis represent a crucible of the conditions where trust becomes relevant Grounded in research within this crucible this book explores a number of questions which are central to contemporary theoretical debates around the nature of trust The authors link these abstract concerns to empirical analysis involving interviews with service users practitioners and managers This book will appeal to anyone interested in the concept of trust including social science researchers and students as well as practitioners managers and policy makers working with vulnerable people *Imagining Britain's Economic Future, c.1800-1975* David Thackeray, Andrew Thompson, Richard Toye, 2018-04-04 Following the Brexit vote this book offers a timely historical assessment of the different ways that Britain's economic future has been imagined and how British ideas have influenced global debates about market relationships over the past two centuries The 2016 EU referendum hinged to a substantial degree on how competing visions of the UK should engage with foreign markets which in turn were shaped by competing understandings of Britain's economic past The book considers the following inter related questions What roles does economic imagination play in shaping people's behaviour and how far can insights from behavioural economics be applied to historical issues of market selection How useful is the concept of the official mind for explaining the development of market relationships What has been the relationship between expanding communications and the development of markets How and why have certain regions or groupings e.g the Commonwealth been unimagined losing their status as promising markets for the future *The Oxford Handbook of the Sociology of Finance* Karin Knorr Cetina, Alex Preda, 2012-11-29 The Handbook brings together leading international scholars to provide a comprehensive overview of research and theory on the sociology of finance and the workings of financial institutions and financial markets It will serve as a reference point for this rapidly expanding discipline *Governing Affects* Otto Penz, Birgit Sauer, 2019-12-06 *Governing Affects* explores the neoliberal transformation of state governance in Europe towards affective forms of dominance exercised by customer oriented neo bureaucracies and public service providers By investigating the rise of affective labour in contemporary European service societies and the conversion of state administrations into business like public services the authors trace the transformative power of neoliberal political thought as it is put into practice The book examines new affective modes of subjectivation and activation of public employees as well as their embodiment of affective requirements to successfully guide and advise citizens Neoliberalism induces a double agency in neo bureaucrats entrepreneurialism is coupled with affective skills for the purpose of governing clients in their own best interests These competences are unevenly distributed between the genders as their affective dispositions differ historically Drawing on the theoretical concepts of Foucault and Bourdieu the book offers innovative insights into recent processes of state transformation affective subjectivation and changes in labour relations By combining theory building on governance

with empirical research in key areas of state power the book will be of interest to scholars and researchers in a broad range of disciplines including political science political sociology and critical governance studies **The Ascent of Market**

Efficiency Simone Polillo, 2020-08-15 The Ascent of Market Efficiency weaves together historical narrative and quantitative bibliometric data to detail the path financial economists took in order to form one of the central theories of financial economics the influential efficient market hypothesis which states that the behavior of financial markets is unpredictable As the notorious quip goes a blindfolded monkey would do better than a group of experts in selecting a portfolio of securities simply by throwing darts at the financial pages of a newspaper How did such a hypothesis come to be so influential in the field of financial economics How did financial economists turn a lack of evidence about systematic patterns in the behavior of financial markets into a foundational approach to the study of finance Each chapter in Simone Polillo s fascinating meld of economics science and sociology focuses on these questions as well as on collaborative academic networks and on the values and affects that kept the networks together as they struggled to define what the new field of financial economics should be about In doing so he introduces a new dimension data analysis to our understanding of the ways knowledge advances There are patterns in the ways knowledge is produced and The Ascent of Market Efficiency helps us make sense of these patterns by providing a general framework that can be applied equally to other social and human sciences **Market Society** Ben

Spies-Butcher, Joy Paton, Damien Cahill, 2012-03-21 An exploration of the social structures at the heart of capitalist economies from feudal England through to the modern day *The Split Economy* Nimi Wariboko, 2020-11-01 Starting with Marx and Freud scholars have attempted to identify the primary ethical challenge of capitalism They have named injustice inequality repression exploitative empires and capitalism s psychic hold over all of us among other ills Nimi Wariboko instead argues that the core ethical problem of capitalism lies in the split nature of the modern economy an economy divided against itself Production is set against finance consumption against saving and the future against the present As the rich enjoy their lifestyle their fellow citizens live in servitude The economy mimics the structure of our human subjectivity as Saint Paul theorizes in Romans 7 the law constitutes the subject as split traversed by negativity The economy is split shot through with a fundamental antagonism This fundamental negativity at the core of the economy disturbs its stability and identity generating its destructive drive The Split Economy develops a robust theoretical framework at the intersection of continental philosophy psychoanalytic theory theology and political economy to reveal a fundamental dynamic at the heart of capitalism
