**Industrial Relations in Europe** Michael Gold, Manfred Weiss, 1999-07-05 Substantial progress has been made in the last 15 years in the areas of European economic social and monetary integration aided by social dialogue on employment and industrial relations at the international level To be truly effective the social dialogue has to be underpinned by an awareness of the different national industrial relations systems This two volume series sets out to provide information on the varied systems found across the EU describing and analysing the key elements and concepts of industrial relations in the different Member States from a comparative perspective The contributions focus on three principal aspects of comparative industrial relations an analysis of the strikingly similar pressures for industrial relations in each country the degree to which the institutional arrangements have retained their national identities despite such pressures and the evolution of industrial relations within this context Countries covered in this volume are Belgium Denmark Germany Greece Italy The Netherlands Portugal Spain      *Public Service Employment Relations in Europe* Stephen Bach, 1999 Written and edited by some of the country's primary authorities on public sector industrial relations this outstanding book provides an up to date analysis of the restructuring of public service employment relations in six European countries      **The Transformation of Employment**

**Relations in Europe** Jim Arrowsmith, Valeria Pulignano, 2013-09-11 Since the 1980s the process of European economic integration within a wider context of globalization has accelerated employment change and placed a new premium on flexible forms of work organization The institutions of employment relations specifically those concerning collective bargaining between employers and trade unions have had to adapt accordingly The Transformation of Employment Relations focuses not just on recent change but charts the strategic choices that have influenced employment relations and examines these key developments in a comparative perspective A historical and cross national analysis of the most important and controversial issues explores the motivation of the actors the implementation of change and its evolution in a diverse European context The book highlights the policies and the role played by different institutional and social actors employers management trade unions professional associations and governments and assesses the extent to which these policies and roles have had significant effects on outcomes This comparative analysis of the transformation of work and employment regulation within the context of a quarter century timeframe has not been undertaken in any other book But this is no comparative handbook in which changes are largely described on a country by country basis but instead The Transformation of Employment Relations is rather focused thematically As Europe copes with a serious economic crisis understanding of the dynamics of work transformation has never been more important      Public Service Management and Employment Relations in Europe

Stephen Bach, Lorenzo Bordogna, 2016-07-07 Has there been a transformation of public service employment relations in Europe since the crisis Public Service Management and Employment Relations in Europe examines public service employment relations after the economic crisis including analysis of more than thirty years of public service and workforce reform and addresses the interplay between an emerging post crisis public service sector and the consequences for the state employers and trade unions in core public services Written by leading national experts this book places the economic crisis in a longer timeframe and examines how far trends in public sector employment relations were reinforced or reversed by the crisis It provides an up to date analysis of the restructuring of public service employment relations in 12 major European countries including analysis of little studied central and Eastern European countries This book will be vital reading for researchers academics and PhD Students in the fields of Public Management Public Administration Employment Relations and Human Resource Management Industrial Relations in the New Europe Abraham Jan Steijn, 2007 The collection deserves to be made accessible to readers and the publisher should be congratulated on maintaining a steady stream of high quality publications on the European subject Steve Jefferys Industrial Relations Journal **Challenges of European Employment Relations** Roger Blanpain, Linda Dickens, 2008-08-29 Has European economic and market integration curtailed the autonomy of national industrial relations actors and institutions Or has it reinforced their roles in securing much needed economic adjustment This important book offers a deeply informed comparative perspective on these questions drawing on empirical research on changing conditions within and beyond the EU The book builds on papers presented at the 8th European Regional Congress of the International Industrial Relations Association held in the UK in September 2007 The authors are leading academic authorities from Austria Belgium Canada Denmark Germany The Netherlands Norway Spain and the United Kingdom With detailed attention to such pervasive factors as the consequences of EU enlargement the shift from manufacturing to services changes in the gender composition and demographic profile of the labour force and the growing influence of multinational companies the authors address such issues as the following response of national employment regulatory traditions to globalization privatization outsourcing and budgetary pressures emergence of new forms of competitive advantage for both employers and employees impact of EU mandated information and consultation mechanisms possibility of international union action and transnational solidarity flexicurity and the changing demographics of the labour force gender democracy in trade unions trade union mergers statutory minimum conditions as an alternative to collective bargaining regulation or culture change to promote equality treatment of posted and migrant workers within increasingly transnational labour markets growth in variable pay systems and possible rebirth of vocational training systems and apprenticeships Offering in depth comparative insights into the way in which national and international systems of employment relations are evolving rapidly in the face of cross cutting pressures for change this book illuminates a vastly complex state of affairs In practical terms its many insights into how current trends affect specific working conditions open

the way to new initiatives in developing and maintaining a just and equitable employment relations regime for Europe and beyond

American Multinationals in Europe Phil Almond, Anthony Ferner, 2006-07-20 Some of the key questions in employment relations comparative business and globalization revolve around the extent to which businesses embody a national business system and what happens when these employment models are exported to other national settings By exploring the variety of ways in which US multinationals deal with these issues and their reception when operating in Europe Phil Almond Anthony Ferner and their contributors examine the interaction between globalization and national Varieties of Capitalism Using the findings of a four year international exploration of the management of employment relations in US multinationals in the UK Germany Ireland and Spain this book examines what is distinctively American about these companies and how this notion is exported The process is shown to be one that is not a technical managerial one but one that is highly political and negotiated in which groups and individuals at different levels within the company try to influence the terms of transfer These questions are not only of theoretical importance but also of practical significance in terms of the transfer of management knowledge and best practice The book will be of interest to academics researchers and advanced students of HRM International Business and Organization Studies as well as HR practitioners concerned with US multinationals operating in Europe

**Economic Citizenship in the European Union** Paul Teague, 2005-10-25 Paul Teague explores the macro economic productive and institutional pressures faced by Europe s social model and assesses a number of economic and political programmes aimed at resolving the crisis It also considers the role of the European Union building a social dimension to the European economy The findings suggest that the future of traditional institutions of Social Europe is under threat However they also stress that we are not on the threshold of the Americanisation of European life This study finds that the influential political forces that reject the dismantling of Europe s social model should not be preoccupied with defending inherited institutions Instead this book argues that they should encourage the construction of new forms of social solidarity compatible with the complexities of modern economic life

posted workers The main objective of this book is to explore the dynamics of institutional change by showing how trans and supra national dynamics affect European industrial relations systems This volume will represent the state of the art in research on worker posting It will also contribute to debates on European integration social dumping labour market dualization and precariousness and will be of value to those with an interest employment relations law and regulation

**Comparative Employment Relations in Europe** Guglielmo Meardi, 2023-12-31 The current economic crisis with diverging employment outcomes in different countries has revealed the ongoing relevance of comparative industrial relations but also the need for its renewal The hitherto dominating approaches based on institutions and national models do not pay sufficient attentions to change and to international factors This book fills the gap by tracing the patterns of change in industrial relations in the six largest EU countries during the last twenty years under the pressure of three crucial international forces multinational companies labour migration and EU policies Written in an accessible language and enriched by empirical case studies it is aimed at undergraduate and postgraduate students researchers and practitioners
