## **Empty Spaces Empty Places:**

A Place More Void Paul Kingsbury, Anna J. Secor, 2021-02 A Place More Void takes its name from a scene in William Shakespeare's The Tragedy of Julius Caesar wherein an elderly soothsayer has a final chance to warn Caesar about the Ides of March Worried that he won't be able to deliver his message because of the crowded alleyways the soothsayer devises a plan to find and intercept Caesar in a place more void It is precisely such an elusive place that this volume makes space for by theorizing and empirically exploring the many yet widely neglected ways in which the void permeates geographical thinking This collection presents geography's most in depth and sustained engagements with the void to date demonstrating the extent to which related themes such as gaps cracks lacks and emptiness perforate geography's fundamental concepts practices and passions Arranged in four parts around the themes of Holes Absences Edges and Voids the contributions demonstrate the fecundity of the void for thinking across a wide range of phenomena from archives to alien abductions caves to cryptids and vortexes to vanishing points A Place More Void gathers established and emerging scholars who engage a wide range of geographical issues and who express themselves not only through archival literary and socio scientific investigations but also through social and spatial theory political manifesto poetry and performance art *Small Forgotten Places in the Hearth of Cities* Antonio Laurià, Luigi Vessella, 2022-03-22 This book is the result of a research project designed and carried out at the Department of Architecture University of Florence This book discusses urban public spaces and more specifically run down inactive micro spaces that are barely used due to their location dimensions morphology or semantic characteristics In literature these spaces are often defined as residual urban spaces A large abandoned industrial area on the outskirts of a town or a small interstitial space in a historical centre can be residual With respect to such a broad subject matter the book seeks to radically limit the field concentrating on public residual spaces found in the oldest parts of cities The book reflects on this theme and introduces a method for reading and assessment of the residuality of public spaces in historical contexts Residuality Assessment Process which was tested in the historical centre of Florence It is the authors view that residual spaces above all if designed according to a system logic can go from being problems to potential activators of urban and social regeneration processes offering a useful contribution to improve city life , *Out of Place* Talmadge Wright, 1997-01-01 Discusses the impact of inner city redevelopment programs and policies on the homeless and shows the methods used civil protests squatting and legal advocacy by the homeless to organize a tactical resistance to restructuring efforts Presents case studies of two different types of homeless organized resistance groups in Chicago and San Jose *Designing the City of Reason* Ali Madanipour, 2007-04-11 With a practical approach to theory Designing the City of Reason offers new perspectives on how differing belief systems and philosophical approaches impact on city design and development exploring how this has changed before during and after the impact of modernism in all its rationalism Looking at the connections between abstract ideas and material realities this book provides a social and historical account of ideas

which have emerged out of the particular concerns and cultural contexts and which inform the ways we live By considering the changing foundations for belief and action and their impact on urban form it follows the history and development of city design in close conjunction with the growth of rationalist philosophy Building on these foundations it goes on to focus on the implications of this for urban development exploring how public infrastructures of meaning are constructed and articulated through the dimensions of time space meaning value and action With its wide ranging subject matter and distinctive blend of theory and practice this book furthers the scope and range of urban design by asking new questions about the cities we live in and the values and symbols which we assign to them **Colin Gunton's Trinitarian Theology of Culture** Andrew

Picard,2024-06-27 Whilst upholding some of the criticisms of Colin Gunton's work this incisive book argues that there is a Hauptbriefe in Gunton reception that assumes his early classic works *The One the Three and the Many* and *The Promise of Trinitarian Theology* 1st ed are definitive of his project and fail to engage adequately with the progressions in Gunton's later thought Instead this book offers a fresh reading of Gunton by giving greater prominence to his later writings which are centred in the mediation of the Son and the Spirit in creation Andrew Picard argues that Gunton's trinitarian theology of culture emerges from his later trinitarian theology of mediation creation Christology pneumatology and ecclesiology Exploring these doctrinal foci enables an understanding of Gunton's account of faithful human culture as embodied worship a living sacrifice of praise which contributes to the divine redemption and perfection of creation It is the church's particular calling to embody such praise through its visible life in community The study concludes by intersecting Gunton's theology with the social sciences to critique ableism and consider the politics of the church's belonging in community Classical

Islamic Philosophy Luis Xavier López-Farjeat,2021-08-10 This thematic introduction to classical Islamic philosophy focuses on the most prevalent philosophical debates of the medieval Islamic world and their importance within the history of philosophy Approaching the topics in a comprehensive and accessible way in this new volume Luis Xavier Lopez Farjeat one of the co editors of *The Routledge Companion to Islamic Philosophy* makes classical Islamic philosophy approachable for both the new and returning student of the history of philosophy medieval philosophy the history of ideas classical Islamic intellectual history and the history of religion Providing readers with a complete view of the most hotly contested debates in the Islamic philosophical tradition Lopez Farjeat discusses the development of theology kalām and philosophy falsafa during the Abbasid period including the translation of Aristotle into Arabic the philosophy and theology of Islamic revelation logic and philosophy of language philosophy of natural science metaphysics psychology and cognition and ethics and political philosophy This volume serves as an indispensable tool for teachers students and independent learners aiming to discover the philosophical problems and ideas that defined the classical Islamic world Key Features Offers readers a broad thorough view of the history of Islamic philosophy by using a thematic approach Traces the dialogues between philosophers and theologians about important and controversial topics Offers both historical descriptions of the key debates in classical Islamic

philosophy and current interpretations by contemporary scholars Includes extensive lists for further reading at the end of each chapter directing curious students to the best avenues for further research

**Mobility of Visually Impaired People** Edwige Pissaloux,Ramiro Velazquez,2017-08-20 This book discusses the design of the new mobility assistive information and communication technologies ICT devices for the visually impaired The book begins with a definition of the space concept followed by the concept of interaction with a space during mobility and this interaction characteristics The contributors will then examine the neuro cognitive basis of space perception for mobility and different theories of space perception The text presents the existing technologies for space perception sense recovery with stem and iPS cells implants brain plasticity sensory substitution devices multi modal technologies etc the newest technologies for mobility assistance design the way the feedback on environment is conveyed to the end user Methods for formative and summative evaluations of the mobility devices will also be discussed The book concludes with a look to the future trends in research and technology development for mobility assistive information and communication technologies

**Public Space and the Challenges of Urban Transformation in Europe** Ali Madanipour,Sabine Knierbein,Aglaée Degros,2013-11-20 European cities are changing rapidly in part due to the process of de industrialization European integration and economic globalization Within those cities public spaces are the meeting place of politics and culture social and individual territories instrumental and expressive concerns Public Space and the Challenges of Urban Transformation in Europe investigates how European city authorities understand and deal with their public spaces how this interacts with market forces social norms and cultural expectations whether and how this relates to the needs and experiences of their citizens exploring new strategies and innovative practices for strengthening public spaces and urban culture These questions are explored by looking at 13 case studies from across Europe written by active scholars in the area of public space and organized in three parts strategies plans and policies multiple roles of public space and everyday life in the city This book is essential reading for students and scholars interested in the design and development of public space The European case studies provide interesting examples and comparisons of how cities deal with their public space and issues of space and society

**Space, Time, and Spacetime** Lawrence Sklar,2023-07-28 In this book Lawrence Sklar demonstrates the interdependence of science and philosophy by examining a number of crucial problems on the nature of space and time problems that require for their resolution the resources of philosophy and of physics The overall issues explored are our knowledge of the geometry of the world the existence of spacetime as an entity over and above the material objects of the world the relation between temporal order and causal order and the problem of the direction of time Without neglecting the most subtle philosophical points or the most advanced contributions of contemporary physics the author has taken pains to make his explorations intelligible to the reader with no advanced training in physics mathematics or philosophy The arguments are set forth step by step beginning from first principles and the philosophical discussions are supplemented in detail by nontechnical expositions of crucial features of

physical theories In this book Lawrence Sklar demonstrates the interdependence of science and philosophy by examining a number of crucial problems on the nature of space and time problems that require for their resolution the resources of philosophy and of physics

**DIV The Divine Ecology** Ian Mills,2004      **The Parallax View** Slavoj Zizek,2009-02-13 In i ek s long awaited magnum opus he theorizes the parallax gap in the ontological the scientific and the political and rehabilitates dialectical materialism The Parallax View is Slavoj i ek s most substantial theoretical work to appear in many years i ek himself describes it as his magnum opus Parallax can be defined as the apparent displacement of an object caused by a change in observational position i ek is interested in the parallax gap separating two points between which no synthesis or mediation is possible linked by an impossible short circuit of levels that can never meet From this consideration of parallax i ek begins a rehabilitation of dialectical materialism Modes of parallax can be seen in different domains of today s theory from the wave particle duality in quantum physics to the parallax of the unconscious in Freudian psychoanalysis between interpretations of the formation of the unconscious and theories of drives In The Parallax View i ek with his usual astonishing erudition focuses on three main modes of parallax the ontological difference the ultimate parallax that conditions our very access to reality the scientific parallax the irreducible gap between the phenomenal experience of reality and its scientific explanation which reaches its apogee in today s brain sciences according to which nobody is home in the skull just stacks of brain meat a condition i ek calls the unbearable lightness of being no one and the political parallax the social antagonism that allows for no common ground Between his discussions of these three modes i ek offers interludes that deal with more specific topics including an ethical act in a novel by Henry James and anti anti Semitism The Parallax View not only expands i ek s Lacanian Hegelian approach to new domains notably cognitive brain sciences but also provides the systematic exposition of the conceptual framework that underlies his entire work Philosophical and theological analysis detailed readings of literature cinema and music coexist with lively anecdotes and obscene jokes

**Newton** Andrew Janiak,2015-04-20 Newton is an evocative intellectual history of the life and ideas of Isaac Newton the natural philosopher covering his influential thoughts about philosophical problems our knowledge of nature and even the nature of the divine Offers a comprehensive and highly accessible introduction to the life and ideas of Isaac Newton emphasizing his influential contributions to the field of philosophy Covers the principal philosophical topics that captivated Newton s mind from our knowledge of nature to the nature of the divine Includes the most recent and innovative research regarding Newton s views on theology and philosophy Emphasizes the philosophical importance of Newton s work to the history of philosophy and his engagement with the ideas of both historic and contemporary figures such as Galileo and Descartes Leibniz and Locke

**The Inconvenient Lonnie Johnson** Julia Simon,2022-04-05 Lonnie Johnson is a blues legend His virtuosity on the blues guitar is second to none and his influence on artists from T Bone Walker and B B King to Eric Clapton is well established Yet Johnson mastered multiple instruments He recorded with jazz icons such as Duke Ellington and Louis Armstrong and he played vaudeville music ballads

and popular songs In this book Julia Simon takes a closer look at Johnson s musical legacy Considering the full body of his work Simon presents detailed analyses of Johnson s music his lyrics technique and styles with particular attention to its sociohistorical context Born in 1894 in New Orleans Johnson s early experiences were shaped by French colonial understandings of race that challenge the Black white binary His performances call into question not only conventional understandings of race but also fixed notions of identity Johnson was able to cross generic stylistic and other boundaries almost effortlessly displaying astonishing adaptability across a corpus of music produced over six decades Simon introduces us to a musical innovator and a performer keenly aware of his audience and the social categories of race class and gender that conditioned the music of his time Lonnie Johnson s music challenges us to think about not only what we recognize and value in the blues but also what we leave unexamined cannot account for or choose not to hear The Inconvenient Lonnie Johnson provides a reassessment of Johnson s musical legacy and complicates basic assumptions about the blues its production and its reception

**True Crime** Mark Seltzer, 2013-10-18 True crime is crime fact that looks like crime fiction It is one of the most popular genres of our pathological public sphere and an integral part of our contemporary wound culture a culture or at least cult of commiseration If we cannot gather in the face of anything other than crime violence terror trauma and the wound we can at least commiserate That is as novelist Chuck Palahniuk writes we can at least all be miserable together The murder leisure industry its media and its public these modern styles of violence and intimacy sociality and belief are the subjects of True Crime Observations on Violence and Modernity True Crime draws on and makes available to American readers and tests out work on systems theory and media theory for instance the transformative work of Niklas Luhmann on social systems and of Friedrich Kittler on the media apriori work yet to make its impact on the American scene True Crime is at once a study of a minor genre that is a scale model of modern society and a critical introduction to these forms of social and media history and theory With examples factual and fictional of the scene of the crime ranging from Poe to CSI from the true crime writing of the popular Japanese author Haruki Murakami to versions of the violence media complex in the work of the American novelist Patricia Highsmith and the Argentinian author Juan Jos Saer True Crime is a penetrating look at modern violence and the modern media and the ties that bind them in contemporary life

**The Routledge Companion to the Sound of Space** Emma-Kate Matthews, Jane Burry, Mark Burry, 2024-11-11 This companion explores a range of conceptual and practical relationships between sound and space across various disciplines providing insights from technical creative cultural political philosophical psychological and physiological perspectives The content spans a wide range of spatial typologies from large reverberant buildings to modest and intimate ones from external public squares to domestic interiors and from naturally formed environments to highly engineered spaces These compiled insights and observations explore the vast diversity of ways in which sonic and spatial realms interact This publication therefore forms important bridges between the intricate and diverse topics of technology philosophy composition performance and

spatial design to contemplate the potential of sound and space as tools for creative expression and communication as well as for technical innovation. It is hoped that by sharing these insights this book will inspire practitioners, scholars and enthusiasts to incorporate new perspectives and methodologies into their own work. Through a rich blend of theory, practice and critical reflection, this volume serves as a valuable resource for anyone interested in exploring the intricacy of relationships between space and sound, whether they are students, professionals or simply curious. Our companion provides a cross section through shared territories between sonic and spatial disciplines from architecture, engineering, sound design, music composition and performance, urban design, product design and much more.

**John Philoponus on Physical Place** Ioannis

Papachristou, 2021-06-15 This book examines the place of physical bodies, a major topic of natural philosophy that has occupied philosophers since antiquity. Aristotle's conceptions of place (*topos*) and the void (*kenon*) as expounded in the *Physics* were systematically repudiated by John Philoponus ca. 485–570 in his philosophical commentary on that work. The primary philosophical concern of the present study is the in-depth investigation of the concept of place established by Philoponus, putting forward the claim that the latter offers satisfactory solutions to problems raised by Aristotle and the Aristotelian tradition regarding the nature of place. Philoponus' account proposes a specific physical model of how physical bodies exist and move in place and regards place as an intrinsic reality of the physical cosmos. Due to exactly this model, his account may be considered as strictly pertaining to the study of physics, thereby constituting a remarkable episode in the history of philosophy and science.

**Malicious Objects, Anger Management, and the Question of Modern Literature** Jörg

Kreienbrock, 2013 Why do humans get angry with objects? Why is it that a malfunctioning computer, a broken tool or a fallen glass causes an outbreak of fury? How is it possible to speak of an inanimate object's recalcitrance, obstinacy or even malice? When things assume a will of their own and seem to act out against human desires and wishes rather than disappear into automatic, unconscious functionality, the breakdown is experienced not as something neutral but affectively as rage or as outbursts of laughter. Such emotions are always psychosocial, publicly rhetorically performed and therefore irreducible to a private feeling. By investigating the minutest details of life among dysfunctional household items through the discourses of philosophy and science as well as in literary works by Laurence Sterne, Jean Paul, Friedrich Theodor Vischer and Heimito von Doderer, Kreienbrock reconsiders the modern bourgeois poetics that render things the way we know and suffer them.

**Concepts of Space in Greek Thought** Keimpe Algra, 2016-06-21 Concepts of Space in Greek Thought studies ancient

Greek theories of physical space and place, in particular those of the classical and Hellenistic period. These theories are explained primarily with reference to the general philosophical or methodological framework within which they took shape. Special attention is paid to the nature and status of the sources. Two introductory chapters deal with the interrelations between various concepts of space and with Greek spatial terminology, including case studies of the Eleatics, Democritus and Epicurus. The remaining chapters contain detailed studies on the theories of space of Plato, Aristotle, the early Peripatetics

and the Stoics The book is especially useful for historians of ancient physics but may also be of interest to students of Aristotelian dialectic ancient metaphysics doxography and medieval and early modern physics

**The Poetics of Space and Place in Scottish Literature** Monika Szuba, Julian Wolfreys, 2019-04-01 This book addresses the poetics of space and place in Scottish literature Focusing chiefly on twentieth and twenty first century texts with acknowledgement of historical and philosophical contexts the essays address representation narrative form the work of the poetic perception and experience Major genres and forms are discussed and authors as diverse as George Mackay Brown Kathleen Jamie Ken McLeod and Kei Miller are presented through theoretically informed historically contextualized close readings Additionally considering the role of dialect and region in the poetry and fiction of modern Scotland the volume argues for an appreciation of the cultural diversity of Scottish writers while highlighting the overarching presence of a connection between self and world subject and place within Scottish literature
