Stepansky, Robert N. Emde, Robert John Harmon, Theodore J. Gaensbauer, 1976 **The Psychobiology of Affective Development (PLE: Emotion)** Nathan A. Fox, Richard Davidson, 2014-11-20 Originally published in 1984 this was the first volume on this topic to appear in an emerging area of study at the time The editors were selective in choosing their contributions to the volume to ensure that both the developmental and neuropsychological domains were well represented One of the major goals was to foster greater contact and cross fertilization between subdisciplines that they firmly believed should be more intimately connected The result is this title which can now be enjoyed in its historical context **Measuring Emotions in Infants and Children** Carroll Ellis Izard, Peter B. Read, 1982 Volume 1 brings together a strong group of researchers who have pioneered a wide variety of empirical approaches to the difficult problems of conceptualising and assessing emotion in infants and children The volume will be an invaluable resource for all those who study infants and children Volume 2 complements the first volume which gave new impetus to research on social and affective development adapted from vendor website The Course of Life: Infancy and early childhood , 1980 Measuring Emotions in Infants and Children: Volume 2 Carroll Ellis Izard, Peter B. Burgess, Kevin MacDonald, 2005 This new edition of Evolutionary Perspectives on Human Development is obligatory reading for anyone interested in the integration of evolutionary theory into developmental psychology It provides a valuable corrective to recent narrow approaches which argue that the human mind is constructed exclusively of domain specific mechanisms and which deemphasize the importance of human psychological and behavioral plasticity Anyone who reads this book will come away with a richer understanding of our shared human nature Bill Irons Northwestern University In this volume Burgess and MacDonald have brought together a distinguished group of psychologists and anthropologists to investigate how given our evolutionary heritage genetic make up and salient environment behavior cognition and emotion unfold from the human organism They make clear that both evolutionary functional and proximate behavioral perspectives are essential to understanding the human mind and its products Many of these essays should be required reading for sociobiologists evolutionary psychologists and evolutionary anthropologists and their ilk Jeffrey Kurland Penn State It s clear that evolutionary biology has a tremendous amount to offer when it comes to our understanding of human development and yet many experts in developmental psychology have remained impervious to these insights At last this may change Burgess and MacDonald have compiled a rich array of theory and data much of it contributed by the leading lights of evolutionary psychology or if you prefer sociobiology A very valuable collection and one that might help define a new and important field
