**Altruistic Emotion, Cognition, and Behavior (PLE: Emotion)** Nancy Eisenberg, 2014-11-20 Originally published in 1986 this book was an effort to integrate thinking and research concerning the role of emotion and cognition in altruistic behaviour Prior to publication there was a vast body of research and theorizing concerning the development and maintenance of prosocial including altruistic behaviour This book focusses primarily on a specific set of intrapsychic factors involved in prosocial responding especially emotions and cognitions believed to play a major role in altruistic behaviour In the final chapters these intrapsychic factors are also discussed in relation to a variety of other relevant factors including socialization and situational influences on altruism *Emotions, Cognition, and Behavior* Carroll E. Izard, Jerome Kagan, Robert B. Zajonc, 1984

The seventeen contributions to this volume demonstrate the enormous progress that has been achieved recently in our understanding of emotions Current cognitive formulations and information processing models are challenged by new theory and by a solid body of empirical research presented by the distinguished authors Addressing the problem of the relationship between developmental social and clinical psychology and psychophysiology all agree that emotion concepts can be operationally defined and investigated as both independent and dependent variables Cognitive and affective processes can no longer be studied in isolation taken together the chapters provide a useful map of an increasingly important and active boundary **Emotional Cognition** Simon C. Moore, Mike Oaksford, 2002-08-08 Emotional Cognition gives the reader an up to date overview of the current state of emotion and cognition research that is striving for computationally explicit accounts of the relationship between these two domains Many different areas are covered by some of the leading theorists and researchers in this area and the book crosses a range of domains from the neurosciences through cognition and formal models to philosophy Specific chapters consider amongst other things the role of emotion in decision making the representation and evaluation of emotive events the relationship of affect on working memory and goal regulation The emergence of such an integrative computational approach in emotion and cognition research is a unique and exciting development one that will be of interest to established scholars as much as graduate students feeling their way in this area and applicable to research in applied as well as purely theoretical domains Series B *Emotion, Cognition, and Behavior*
