Emotions In Ancient And Medieval Philosophy:

Emotions in Ancient and Medieval Philosophy Simo Knuuttila, 2004 The first part of the book covers the theories of the emotions of Plato and Aristotle and later ancient views from Stoicism to Neoplatonism Ch 1 and their reception and transformation by early Christian thinkers from Clement and Origen to Gregory of Nyssa Cassian and Augustine Ch 2 The basic ancient alternatives were the compositional theories of Plato and Aristotle and their followers and the Stoic judgement theory These were associated with different conceptions of philosophical therapy Ancient theories were employed in early Christian discussions of sin Christian love mystical union and other forms of spiritual experience The most influential theological themes were the monastic idea of supernaturally caused feelings and Augustine's analysis of the relations between the emotions and the will The first part of Ch 3 deals with the twelfth century reception of ancient themes through monastic theological medical and philosophical literature The subject of the second part is the theory of emotions in Avicenna's faculty psychology which to a great extent dominated the philosophical discussion of emotions in early thirteenth century This approach was combined with Aristotelian ideas in later thirteenth century particularly in Thomas Aquinas extensive taxonomical theory The increasing interest in psychological voluntarism led many Franciscan authors to abandon the traditional view that emotions belong only to the lower psychosomatic level John Duns Scotus William Ockham and their followers argued that there are also emotions of the will Chapter 4 is about these new issues introduced in early fourteenth century discussions with some remarks on their influence on early modern thought

A Cultural History of the Emotions in the Medieval Age Juanita Ruys, Clare Monagle, 2020-08-20 Our period opens at the end of the Roman Empire when intellectual currents are indebted to the Greek philosophical inheritance of Plato and Aristotle as well as to a Romanized Stoicism Into this mix entered the new and from 313CE imperially sanctioned religion of Christianity In art literature music and drama we find an increasing emphasis on the arousal of individual emotions and their acceptance as a means towards devotion In religion we see a move from the ascetic regulation of emotions to the affective piety of the later medieval period that valued the believer's identification with the Passion of Christ and the sorrow of Mary In science and medicine the nature and causes of emotions their role in constituting

the human person and their impact on the same became a subject of academic inquiry Emotions also played an increasingly important public role evidenced in populace wide events such as conversion and the strategies of rulership Between 350 and 1300 emotions were transformed from something to be transcended into a location for meditation upon what it means to be human **A History of Philosophy: History of ancient and medieval philosophy** Friedrich Ueberweg,1875

Nature and Functions of 35 Specific Emotions 22 chapters Part V Challenges Facing Emotion Theory 13 chapters Special Elicitors of Emotions Emotions and Their Relations to Other Elements of Mental Architecture Emotions in Children Animals and Groups Normative Aspects of Emotions Most of the major themes of contemporary emotion theory are covered in their historical philosophical and scientific dimensions This collection will be essential reading for students and researchers in philosophy psychology neuroscience sociology anthropology political science and history for decades to come Thinking about the Emotions Alix Cohen, Robert Stern, 2017-05-26 Philosophical reflection on the emotions has a long history stretching back to classical Greek thought even though at times philosophers have marginalized or denigrated them in favour of reason Fourteen leading philosophers here offer a broad survey of the development of our understanding of the emotions The thinkers they discuss include Aristotle Aquinas Ockham Descartes Malebranche Spinoza Hobbes Hume Shaftesbury Hutcheson Kant Schiller Schopenhauer Nietzsche James Brentano Stumpf Scheler Heidegger and Sartre Central issues include the taxonomy of the emotions the distinction between emotions passions feelings and moods the relation between the emotions and reason the relationship between the self and the emotions At a metaphilosophical level the collection also raises issues about the value of historical study of the discipline and what light it can shed on contemporary concerns Thinking about the Emotions is a fascinating and illuminating collective study of how philosophers have grappled with this most intriguing part of our nature as beings who feel as well as think and act **Emotion in Old Norse Literature** Sif Ríkharðsdóttir, 2017 Draws on Old Norse literary heritage to explore questions of emotion as both a literary motif and as a social phenomenon Authors throughout history have relied on the emotional make up of their readers and audiences to make sense of the behaviours and actions of fictive characters But how can a narrative voice contained in a text evoke feelings that are ultimately never real or actual but a figment of a text a fictive reality created out of words How does one reconcile interiority a presumed modern conceptualisation with medieval emotionality The volume seeks to address these questions It positions itself within the larger context of the history of emotion offering a novel approach to the study of literary representations of emotionality and its staging through voice performativity and narrative manipulation probing how emotions are encoded in texts The author argues that the deceptively laconic portrayal of emotion in the Icelandic sagas and other literature reveals an emotive script that favours reticence over expressivity and exposes a narrative convention of emotional subterfuge through narrative silences and the masking of emotion Focusing on the ambivalent borders between prose and poetic language she suggests that poetic vocalisation may provide a literary space within which emotive interiority can be expressed The volume considers a wide range of Old Norse materials from translated romances through Eddic poetry and slendingas gur sagas of Icelanders to indigenous romance Sif Ríkharðsdóttir is Professor of Comparative Literature at the University of Iceland and Vice Chair of the Institute of Research in Literature and Visual Arts Emotions in a Crusading Context, 1095-1291 Stephen J. Spencer, 2019-11-28 Emotions in a Crusading Context is the first book length study

of the emotional rhetoric of crusading It investigates the ways in which a number of emotions and affective displays primarily fear anger and weeping were understood represented and utilized in twelfth and thirteenth century western narratives of the crusades making use of a broad range of comparative material to gauge the distinctiveness of those texts crusader letters papal encyclicals model sermons chansons de geste lyrics and an array of theological and philosophical treatises In addition to charting continuities and changes over time in the emotional landscape of crusading this study identifies the underlying influences which shaped how medieval authors represented and used emotions analyzes the passions crusade participants were expected to embrace and reject and assesses whether the idea of crusading created a profoundly new set of attitudes towards emotions

Emotions in a Crusading Context calls on scholars of the crusades to reject the traditional methodological approach of taking the emotional descriptions embedded within historical narratives as straightforward reflections of protagonists lived feelings and in so doing challenges the long historiographical tradition of reconstructing participants beliefs and experiences from these texts Within the history of emotions Stephen J Spencer demonstrates that despite the ongoing drive to develop new methodologies for studying the emotional standards of the past typified by experiments in neurohistory the social constructionist or cultural historical approach still has much to offer the historian of medieval emotions

Emotions and Health, 1200-1700 Elena Carrera, 2013-07-04 *Emotions and Health 1200 1700* examines the Aristotelian and Galenic understandings of the passions or accidents of the soul as alterations of both mind and body across a wide range of medieval and early modern cultural discourses Aquinas s *Summa* canonization inquests medical and natural philosophical texts drama and the London Bills of Mortality The essays in this collection focus on notions such as death from sorrow physiological explanations of fear physicians advice on the harmful and beneficial effects of anger and of sex medical and philosophical constructions of the melancholic subject and theological and medical discussions on the impact of music in moderating the passions and maintaining health Contributors include Nicole Archambeau Elena Carrera Penelope Gouk Angus Gowland Nicholas E Lombardo William F MacLehose Michael R Solomon and Erin Sullivan

The Dark Side: Philosophical Reflections on the "Negative Emotions" Paola Giacomoni, Nicolò Valentini, Sara Dellantonio, 2021-04-02 This book takes the reader on a philosophical quest to understand the dark side of emotions The chapters are devoted to the analysis of negative emotions and are organized in a

historical manner spanning the period from ancient Greece to the present time Each chapter addresses analytical questions about specific emotions generally considered to be unfavorable and classified as negative The general aim of the volume is to describe the polymorphous and context sensitive nature of negative emotions as well as changes in the ways people have interpreted these emotions across different epochs The editors speak of the dark side of the emotions because their goal is to capture the ambivalent unstable and shadowy aspects of emotions A number of studies have taken the categorial distinction between positive and negative emotions for granted suggesting that negative emotions are especially significant for our psychological experience because they signal difficult situations For this reason the editors stress the importance of raising analytical questions about the valence of particular emotions and focussing on the features that make these emotions ambivalent how despite their negativity such emotions may turn out to be positive This opens up a perspective in which each emotion can be understood as a complex interlacing of negative and positive properties The collection presents a thoughtful dialogue between philosophy and contemporary scientific research It offers the reader insight by illuminating the dark side of the emotions
