The Role of Emotions in Preventative Health Communication Jessica Gall Myrick, 2015-09-17

Health related media permeate our modern experience from using an online search engine to reading a pamphlet about vaccinations at the doctor's office or watching a television news report on the dangers of sitting too much. This book makes the argument that if prevention focused health messages are to motivate behavior change they must tug at the heartstrings and researchers need to understand more precisely how different emotional reactions influence health message effects. In making this case this book takes a quantitative social science based approach to understanding the role of emotions in shaping individual level effects to preventative health messages disseminated through mass media channels. The book focuses on how discrete emotions evoked by preventative health media messages influence how audiences respond to those messages. Are they persuaded to change their behavior? Will they seek more information? Will they share information with others? Will they support prevention focused policies? While a rich literature exists on the effects of health related fear appeals on audiences researchers have yet to fully explore the role that other discrete emotions play in health communication processes and outcomes. This book fills that gap by providing an overview of the role of nine different emotions both positive and negative in various prevention focused health communication settings. It also introduces readers to commonly employed emotional theories and concepts and relates them to literature on prevention focused health and policy communication. In addition to reviewing and synthesizing the literature this book offers new directions to researchers hoping to improve the effectiveness of prevention focused health messages.

Affect and Emotion Ronald H. Humphrey, 2008-09-01

Affect and Emotion includes a variety of chapters by some of the most prominent scholars in the area of emotions and leadership as well as chapters by rising stars. These chapters chart the direction of future research in affect and leadership in four main areas. First, several of these chapters make a convincing argument that leaders use emotional labor and other forms of emotional displays to influence followers and team members. Leaders may use emotional labor to manage relational

identities or to create favorable impressions on followers and to create trust Leaders active emotional displays increase vision related performance and perception of transformational leadership Second one chapter reveals how emotions play an important role in leadership at every level from within person to organization wide leadership Leader s emotional labor plays an important role in several of these levels with the exact method of performing emotional labor varying by level A second chapter also examines levels of leadership with a particular examination of the effects of leader emotional labor on close and distant leadership Third several of the chapters examine emotions from the authentic leadership and positive leadership perspectives and two of these chapters focus on how psychological capital and authentic leadership skills help leaders be resilient and overcome obstacles Fourth two of the chapters show the role of affect and friendship ties to leadership research One of these chapters examines the need to develop psychometrically sound measures of affect and friendship whereas the other develops a model of how affect influences social network ties and informal leadership emergence Taken together these chapters illustrate four important research trends in emotions and leadership that are likely to grow in importance in the coming years
