*Empathy and the Practice of Medicine* Howard Marget Spiro, Mary G. McCrea Curnen, Enid Peschel, Deborah St. James, 1993-01-01 The book which includes essays by physicians philosophers and a nurse is divided into three parts one deals with how empathy is weakened or lost during the course of medical education and suggests how to remedy this another describes the historical and philosophical origins of empathy and provides arguments for and against it and a third section offers compelling accounts of how physicians empathy for their patients has affected their own lives and the lives of those in their care We hear for example from a physician working in a hospice who relates the ways that the staff try to listen and respond to the needs of the dying a scientist who interviews candidates for medical school and tells how qualities of empathy are undervalued by selection committees a nurse who considers what nursing can teach physicians about empathy another physician who ponders whether the desire to be empathic can hinder the detachment necessary for objective care and several contributors who show how literature and art can help physicians to develop empathy *Empathy and the Practice of Medicine* Howard Marget Spiro, 1993 A collection of essays written by physicians philosophers and a nurse seeks to restore empathy to medical practice describing how empathy is lost during a medical education and how this can be remedied

**Introductory Philosophy of Medicine** James A. Marcum, 2008-05-07 In this book the author explores the shifting philosophical boundaries of modern medical knowledge and practice occasioned by the crisis of quality of care especially in terms of the various humanistic adjustments to the biomedical model To that end he examines the metaphysical epistemological and ethical boundaries of these medical models He begins with their metaphysics analyzing the metaphysical positions and presuppositions and ontological commitments upon which medical knowledge and practice is founded Next he considers the epistemological issues that face these medical models particularly those driven by methodological procedures undertaken by epistemic agents to constitute medical knowledge and practice Finally he examines the axiological boundaries

and the ethical implications of each model especially in terms of the physician patient relationship In a concluding Epilogue he discusses how the philosophical analysis of the humanization of modern medicine helps to address the crisis of care as well as the question of What is medicine The book s unique features include a comprehensive coverage of the various topics in the philosophy of medicine that have emerged over the past several decades and a philosophical context for embedding bioethical discussions The book s target audiences include both undergraduate and graduate students as well as healthcare professionals and professional philosophers This book is the 99th issue of the Series Philosophy and Medicine and it can be considered a crown of thirty years of intensive and dynamic discussion in the field We are completely convinced that after its publication it can be finally said that undoubtedly the philosophy of medicine exists as a special field of inquiry

**Medical Humanities and Medical Education** Alan Bleakley, 2015-03-02 The field of the medical humanities is developing rapidly however there has also been parallel concern from sceptics that the value of medical humanities educational interventions should be open to scrutiny and evidence Just what is the impact of medical humanities provision upon the education of medical students In an era of limited resources is such provision worth the investment This innovative text addresses these pressing questions describes the contemporary territory comprising the medical humanities in medical education and explains how this field may be developed as a key medical education component for the future Bleakley a driving force of the international movement to establish the medical humanities as a core and integrated provision in the medical curriculum proposes a model that requires collaboration between patients artists humanities scholars doctors and other health professionals in developing medical students sensibility clinical acumen based on close noticing and sensitivity ethical professional and humane practice In particular this text focuses upon how medical humanities input into the curriculum can help to shape the identities of medical students as future doctors who are humane caring expressive and creative whose work will be technically sound but considerably enhanced by their abilities to communicate well with patients and colleagues to empathise to be adaptive and innovative and to act as medical citizens in shaping a future medical culture as a model democracy where social justice is a key aspect of medicine Making sense of the new wave of medical humanities in medical education scholarship that calls for a critical medical humanities Medical Humanities and Medical Education incorporates a range of case studies and illustrative and practical examples to aid integrating medical humanities into the medical curriculum It will be important reading for medical educators and others working with the medical education community and all those interested in the medical humanities

Humans are Underrated Geoffrey Colvin, 2015 improve patient outcomes and lower medical costs the U S Army which has revolutionized its training to focus on human interaction leading to stronger teams and greater success in real world missions and Stanford Business School which has overhauled its curriculum to teach interpersonal skills through human to human experiences As technology advances we shouldn t focus on beating computers at what they do we ll lose that contest Instead we must develop our most essential human abilities that teach our kids to

value not just technology but also the richness of interpersonal experience They will be the most valuable people in our world because of it

**The Story of Pain** Joanna Bourke, 2014 The story of pain and suffering since the eighteenth century Prize winning historian Joanna Bourke charts how our understanding of pain and how to cope with it has changed completely over the last three centuries

Care of the Psyche Stanley W. Jackson, 1999-01-01 In this book a distinguished historian of medicine surveys the basic elements that have constituted psychological healing over the centuries Dr Stanley W Jackson shows that healing practices whether they come from the worlds of medicine religion or philosophy share certain elements that transcend space and time Drawing on medical writings from classical Greece and Rome to the present as well as on philosophical and religious writings Dr Jackson shows that the basic ingredients of psychological healing which have survived changes of name the fall of their theoretical contexts and the waning of social support in different historical eras are essential factors in our modern psychotherapies and in healing contexts in general

Orthodox Christian Bioethics Rabee Toumi, 2020-10-07 This book advocates a substantive common ground in global bioethics It starts from an Orthodox Christian anthropology to highlight the relationship between hospitality dignity and vulnerability as the meeting point between strangers regardless of their value system The universal experience of suffering and death is the unifying starting point of that anthropology Therefore in medicine where physicians and patients meet as utter strangers not only as moral strangers hospitality highlights the human dignity and vulnerability of both parties and establishes gratitude compassion and solidarity as the constructive building blocks of a healing practice of medicine and a humane medical system locally and globally

**Cultural Sutures** Lester D. Friedman, 2004-05-06 Medicine and the media exist in a unique symbiosis Increasingly health care consumers turn to media sources from news reports to Web sites to tv shows for information about diseases treatments pharmacology and important health issues And just as the media scour the medical terrain for news stories and plot lines those in the health care industry use the media to publicize legitimate stories and advance particular agendas The essays in Cultural Sutures delineate this deeply collaborative process by scrutinizing a broad range of interconnections between medicine and the media in print journalism advertisements fiction films television shows documentaries and computer technology In this volume scholars of cinema studies philosophy English sociology health care education women s studies bioethics and other fields demonstrate how the world of medicine engages and permeates the media that surround us Whether examining the press coverage of the Jack Kevorkian euthanasia controversy pondering questions about accessibility accountability and professionalism raised by such films as Awakenings The Doctor and Lorenzo s Oil analyzing the depiction of doctors patients and medicine on E R and Chicago Hope or considering the ways in which digital technologies have redefined the medical body these essays are consistently illuminating and provocative Contributors Arthur Caplan Tod Chambers Stephanie Clark Brown Marc R Cohen Kelly A Cole Lucy Fischer Lester D Friedman Joy V Fuqua Sander L Gilman Norbert Goldfield Joel Howell Therese Jones Timothy Lenoir Gregory Makoul Marilyn Chandler McEntyre Faith McLellan

**Bioethics, Healthcare and the Soul** Henk ten Have, Renzo Pegoraro, 2021-09-16 This thought provoking book explores the connections between health ethics and soul It analyzes how and why the soul has been lost from scientific discourses healthcare practices and ethical discussions presenting suggestions for change Arguing that the dominant scientific worldview has eradicated talk about the soul and presents an objective and technical approach to human life and its vulnerabilities Ten Have and Pegoraro look to rediscover identity humanity and meaning in healthcare and bioethics Taking a multidisciplinary approach they investigate philosophical scientific historical cultural social religious economic and environmental perspectives as they journey toward a new global bioethics emphasizing the role of the moral imagination Bioethics Healthcare and the Soul is an important read for students researchers and practitioners interested in bioethics and person centred healthcare

**The Empathic Healer** Michael J. Bennett, 2001-04-27 Empathy has long been regarded as central to the art of medicine and especially to the practice of psychotherapy The ability of a therapist to appreciate the patient's state of mind and frame of reference is the foundation of a therapeutic alliance and key to the process of healing However these subjective aspects of practice are rendered suspect by today's emphasis on objectivity formal diagnosis with biological treatments and standardized methodologies that appear to be aimed more at disease than at the person who suffers from it Pressured by the practice climate and by the advances of science practitioners have become treatment specialists and the empathic healer has become an endangered species In this book the author establishes a new foundation for the use and value of clinical empathy that is based on a distinction between treatment and healing and a model for using psychotherapy as a component of an organized system of care focused attuned to the patient's presenting motive and consistent with our understanding of the relationship between mind and brain Practicing mental health professionals and students find the rationale for assessment and treatment planning in The Empathic Healer an invaluable aide as they seek to adapt to the marvelous discoveries about how the brain shapes and recovers from mental disorder and how an empathic environment fosters recovery and healing within and beyond the treatment setting Establishes the historical roots of the concept of clinical empathy and its relationship to healing Elaborates the ideological and environmental

factors that enhance or interfere with empathy Explores the biological importance of empathy as a feature of the normal human brain Argues for the integration of mind and brain in a new dualism Presents a vision of psychotherapy as an important component of an organized system of care Differentiates between the treating and healing functions and suggests how each relies on empathy Suggests how an endangered species may be preserved in the present technological era
