Heresiography in Context Jaap Mansfeld, 2016-06-21 The study of the Elenchos c 225 CE involves the whole range of ancient interpretative traditions concerned with Greek Philosophy from Aristotle to the Late Neoplatonists The present inquiry places Hippolytus important reports about the Greek philosophers in the context of these traditions and so is able to illuminate not only what he has to offer but also to increase our knowledge of the traditions he depends on For him the Pythagoreanizing current in Pre Neoplatonism is of paramount importance Accordingly he constructs a succession diadoche starting with Pythagoras and including Empedocles Heraclitus Plato Aristotle and the Stoics and argues that the diadoche of the Gnostic heresiarchs is parasitical on its Pythagorean predecessor A new assessment of the sources used the first serious attempt since that of Diels in 1879 hinges on an analysis of Hippolytus method of presentation which is a blend of cento and exegesis geared to his anti Gnostic purpose

Empedocles, 1981 The Cambridge History of Philosophy in Late Antiquity Lloyd P. Gerson, 2015-12-10 The Cambridge History of Philosophy in Late Antiquity comprises over forty specially commissioned essays by experts on the philosophy of the period 200 800 CE Designed as a successor to The Cambridge History of Later Greek and Early Medieval Philosophy edited by A H Armstrong it takes into account some forty years of scholarship since the publication of that volume The contributors examine philosophy as it entered literature

science and religion and offer new and extensive assessments of philosophers who until recently have been mostly ignored. The volume also includes a complete digest of all philosophical works known to have been written during this period. It will be an invaluable resource for all those interested in this rich and still emerging field.

Plato versus Parmenides Robert J. Roecklein, 2010-12-16. Plato versus Parmenides investigates the concept of genesis or coming into being, a problem that has absorbed the greatest philosophical thinkers. Robert J. Roecklein explores two philosophical giants who tackled this issue: Plato and Parmenides from Elea. Particularly interesting to Roecklein is how the respective arguments of reality or lack thereof of coming into being function as a political barometer. How Plato and Parmenides sketch foundations for political regimes. Plato and Parmenides, philosophers of immeasurable respect and influence, represented two sides of a fierce debate. On one side, Parmenides gives the famous argument that coming into being cannot possibly be a reality in nature. The other side, Plato, proves in his dialogue the Parmenides that coming into being is a very real thing in nature. He argues that perception does indeed provide accurate information about the external world. In *Plato versus Parmenides*, Robert J. Roecklein presents the great debate between these two schools and examines the disposition of other PreSocratic philosophers who were influenced by these great intellectual rivals.

Aristotle, Plato and Pythagoreanism in the First Century BC Malcolm Schofield, 2013-01-17. This book presents an up to date overview of the main new directions taken by ancient philosophy in the first century BC, a period in which the dominance exercised in the Hellenistic age by Stoicism, Epicureanism and Academic Scepticism gave way to a more diverse and experimental philosophical scene. Its development has been much less well understood but here a strong international team of leading scholars of the subject reconstruct key features of the changed environment. They examine afresh the evidence for some of the central Greek thinkers of the period as well as illuminating Cicero's engagement with Plato both as translator and in his own philosophising. The intensity of renewed study of Aristotle's *Categories* and Plato's *Timaeus* is an especially striking outcome of their discussions. The volume will be indispensable for scholars and students interested in the history of Platonism and Aristotelianism.

Bahai Scriptures Bahá'u'lláh, 1923. *Aëtiana V (4 vols.)* Jaap Mansfeld, David Runia, 2020-08-10. A new reconstruction and text of the *Placita* of Aëtius ca. 50 CE, accompanied by a full commentary and an extensive collection of related texts. This compendium, arguably the most important doxographical text to survive from antiquity, is known through the intensive use made of it by authors in later antiquity and beyond. Covering the entire field of natural philosophy, it has long been mined as a source of information about ancient philosophers and their views. It now receives a thorough analysis as a remarkable work in its own right. This volume is the culmination of a five-volume set of studies on Aëtius. 1996: 2020 *Aëtiana I* ISBN 9789004105805. 1996: II *Parts 1* set ISBN 9789004172067. 2008: III ISBN 9789004180413. 2009: IV ISBN 9789004361454. 2018: and V *Parts 1-4*. It uses an innovative methodology to replace the seminal edition of Hermann Diels, 1879.

Aquinas's Theory of Perception Anthony J. Lisska, 2016-06-09. Anthony J. Lisska presents a new analysis of Thomas Aquinas's theory of perception. While much work has

been undertaken on Aquinas's texts little has been devoted principally to his theory of perception and less still on a discussion of inner sense. The thesis of intentionality serves as the philosophical backdrop of this analysis while incorporating insights from Brentano and from recent scholarship. The principal thrust is on the importance of inner sense, a much overlooked area of Aquinas's philosophy of mind with special reference to the *vis cogitativa*. Approaching the texts of Aquinas from contemporary analytic philosophy, Lisska suggests a modest innate or structured interpretation for the role of this inner sense faculty. Dorothea Frede suggests that this faculty is an embarrassment for Aquinas; to the contrary, the analysis offered in this book argues that were it not for the *vis cogitativa*, Aquinas's philosophy of mind would be an embarrassment. By means of this faculty of inner sense, Aquinas offers an account of a direct awareness of individuals of natural kinds referred to by Aquinas as incidental objects of sense which comprise the principal ontological categories in Aquinas's metaphysics. By using this awareness of individuals of a natural kind, Aquinas can make better sense out of the process of abstraction using the active intellect (*intellectus agens*). Were it not for the *vis cogitativa*, Aquinas would be unable to account for an awareness of the principal ontological category in his metaphysics.

Aristotle's On Generation and Corruption I Book 1 Frans de Haas, Jaap Mansfeld, 2004-09-23 Jaap Mansfeld and Frans de Haas bring together in this volume a distinguished international team of ancient philosophers presenting a systematic chapter by chapter study of one of the key texts in Aristotle's science and metaphysics, the first book of *On Generation and Corruption*. In GC I Aristotle provides a general outline of physical processes such as generation and corruption, alteration and growth, and inquires into their differences. He also discusses physical notions such as contact, action and passion, and mixture. These notions are fundamental to Aristotle's physics and cosmology and more specifically to his theory of the four elements and their transformations. Moreover, references to GC elsewhere in the Aristotelian corpus show that in GC I Aristotle is doing heavy conceptual groundwork for more refined applications of these notions, for example, the psychology of perception and thought, and the study of animal generation and corruption. Ultimately, biology is the goal of the series of enquiries in which GC I demands a position of its own immediately after the *Physics*. The contributors deal with questions of structure and text constitution and provide thought-provoking discussions of each chapter of GC I. New approaches to the issues of how to understand first matter and how to evaluate Aristotle's notion of mixture are given ample space. Throughout, Aristotle's views of the theories of the Presocratics and Plato are shown to be crucial in understanding his argument.
