generalizations are tested with cross national data each case study in turn demonstrates a localized version of the larger framework using specific historical political outcomes as examples Local Parties in Political and Organizational Perspective argues that local political parties should be understood as Janus faced components of nationally encompassing organizations on the one hand and specific actors in community politics on the other As such local parties necessarily act as the primary democratic institutions that link ordinary citizens to local governmental institutions and transitively to the national political system By linking ordinary citizens and the most basic local organizations with national politics Local Parties in Political and Organizational Perspective adds significantly to the collective understanding of the nature and status of local parties in mature and developing democracies

Urban Democracy Oscar W. Gabriel, Vincent Hoffmann-Martinet, Hank V. Savitch, 2012-12-06 Among social scientists consensus exists on urbanization as an indispensable aspect of social modernization During the last century the process of industrialization was accompanied by a huge wave of migration from rural to urban areas The formation of big cities in turn made up the base for an increase of mass education as well as the spread of mass media The changes induced by urbanization did not only have a strong impact on the structure of the society but also did deeply change the way of social life By the end of the 21st century again a close link seems to exist between the socio economic transformation of the Western world on the one hand and a new stage in the process of urbanization on the other hand The service economy having replaced industrial production as the most important domain of economic life essentially needs the social and cultural infrastructure provided by urban or even

metropolitan areas Due to the development of fast and highly efficient systems of mass transportation processes of social cultural and economic exchanges between the different parts of the world but primarily between metropolitan areas The development of new media of communication has facilitated the exchange of information of any kind not only within a society but moreover between societies separated by a large territorial distance from each other

**Parties, Elections, and the Future of Canadian Politics** Amanda Bittner, Royce Koop, 2013-03-01 On 2 May 2011 Canadians watched as the Stephen Harper Conservatives won their first majority government Jack Layton led the NDP to its best performance in history and Michael Ignatieff and the federal Liberals had their worst showing to date For most casual observers this election marked a major shift in Canadian politics In reality the country's political landscape and national party system had been changing for quite some time Parties Elections and the Future of Canadian Politics offers the first comprehensive account of political change in Canada over the past two decades It explores developments in the political landscape from both historical and contemporary perspectives and speculates on the future of the national party system By documenting how parties and voters responded to new challenges between 1993 and 2011 this volume enhances our understanding of one of the most tumultuous periods in Canadian political history

**Elections in Australia, Ireland, and Malta under the Single Transferable Vote** Shaun Bowler, Bernard Norman Grofman, 2010-06-04 The Single Transferable Vote or STV is often seen in very positive terms by electoral reformers yet relatively little is known about its actual workings beyond one or two specific settings This book gathers leading experts on STV from around the world to discuss the examples they know best and represents the first systematic cross national study of STV Furthermore the contributors collectively build an understanding of electoral systems as institutions embedded within a wider social and political context and begins to explain the gap between analytical models and the actual practice of elections in Australia Ireland and Malta Rather than seeing electoral institutions in purely mechanical terms the collection of essays in this volume shows that the effects of electoral system may be contingent rather than automatic On the basis of solid empirical evidence the volume argues that the same political system can in fact have quite different effects under different conditions Contributors to the volume are Shaun Bowler David Farrell Michael Gallagher Bernard Grofman Wolfgang Hirczy Colin Hughes J Paul Johnston Michael Laver Malcom Mackerras Michael Maley Michael Marsh Ian McAllister and Ben Reilly Shaun Bowler is Professor of Political Science University of California Riverside Bernard Grofman is Professor of Political Science University of California Irvine

*Local Self-Government and the Right to the City* Warren Magnusson, 2015-06-01 Despite decades of talk about globalization democracy still depends on local self government In *Local Self Government and the Right to the City* Warren Magnusson argues that it is the principle behind claims to personal autonomy community control and national self determination and holds the promise of more peaceful politics Unfortunately state centred thinking has obscured understanding of what local self government can mean and hindered efforts to make good on what activists have called the right to the city In this collection of essays Magnusson

reflects on his own efforts to make sense of what local self government can actually mean using the old ideal of the town meeting as a touchstone Why cannot communities govern themselves Why fear direct democracy As he suggests putting more trust in the proliferating practices of government and self government will actually make cities work better and enable us to see how to localize democracy appropriately He shows that doing so will require citizens and governments to come to terms with the multiplicity indeterminacy and uncertainty implicit in politics and steer clear of sovereign solutions The culmination of a life s work by Canada s leading political theorist in the field Local Self Government and the Right to the City ranges across topics such as local government social movements constitutional law urban political economy and democratic theory

**Building Cities that Work** Edmund P. Fowler, 1993 Since 1945 North Americans have spent hundreds of billions of dollars on urban development literally transforming the landscape of the continent This development has been disastrous Edmund Fowler maintains because it is inordinately expensive destructive of the environment and disruptive of healthy social life and authentic politics Revealing the connections between our basic cultural beliefs and why we build the way we do he stresses that to build cities that work we must become aware of how our personal choices contribute to the form of the built environment
