**Hegemony and the Rise of Emerging Powers** Salvador Santino Regilme,James Parisot,2017-10-18 Over the last decade the United States position as the world's most powerful state has appeared increasingly unstable. The US invasions of Afghanistan and Iraq, non-traditional security threats, global economic instability, the apparent spread of authoritarianism and illiberal politics, together with the rise of emerging powers from the Global South, have led many to predict the end of Western dominance on the global stage. This book brings together scholars from international relations, economics, history, sociology, and area studies to debate the future of US leadership in the international system. The book analyses the past, present, and future of US hegemony in key regions: the Asia Pacific, Latin America, Middle East, Europe, and Africa, while also examining the dynamic interactions of US hegemony with other established, rising, and re-emerging powers such as Russia, China, Japan, India, Turkey, and South Africa. **American Hegemony and the Rise of Emerging Powers** explores how changes in the patterns of cooperation and conflict among states, regional actors, and transnational non-state actors have affected the rise of emerging global powers and the suggested decline of US leadership. Scholars, students, and policy practitioners who are interested in the future of the US-led international system, the rise of emerging powers from the Global South, and related global policy challenges will find this multidisciplinary volume an invaluable guide to the shifting position of American hegemony. **China And The Group 20: The Interplay Between A Rising Power And An Emerging Institution** Catrina Schlager,Dongxiao Chen,Alexander Rosenplanter,Haibing Zhang,2016-11-28 Since the great financial crisis in 2008, the Group 20 (G20) has played an increasingly important role in global economic governance as an emerging global macroeconomic coordination mechanism. China and the Group 20 provides experts' observations on the development of the G20, G20's influence on global economic governance, and China's role in this emerging institution. The first part of the book analyses important policy issues facing the G20 and global economic governance, including the G20's role in strengthening and promoting global macroeconomic coordination, reform of the international financial system, the stability and effectiveness of the international monetary system, the integration of international trade and investment regimes, the new agenda of international development, and the complex relations among the major powers. The second part focuses on China's relations with the United States, the EU, and the other BRICS countries and their implications to the G20's development. China, as the largest developing country and the second largest economy, has the responsibility to safeguard the general interests of developing countries on one hand and to cooperate with the developed countries to create an equal and open economic environment on the other hand. The book's chapters are contributed by experts from the main member countries of the G20.

*Japanese Industrial Targeting* William R. Nester,2016-07-27 Japan achieved

its present economic position by rejecting free trade theory and instead mastering neomercantilist policies which target strategic industries for development with a range of government sponsored cartels subsidies import barriers and export incentives These policies stimulated an economic growth rate which averaged ten percent before 1973 and five percent since rates four and two times greater than America's during the same periods This book analyzes the policy making process implementation successes occasional shortcomings and challenges posed by Tokyo's neomercantilist policies toward its trade rivals

**The Logic of International Restructuring** Winfried Ruigrok, Rob van Tulder, 2013-11-05 There is within the corporate world an evolving international restructuring race between industrial complexes that is set to intensify over the coming years An industrial complex consists of suppliers distributors governments financiers and trade unions It is the reorganisation of the relationship between the core firm and the above components that is set to change before very long In this book Winfried Ruigrok and Rob van Tulder address many current debates on topics such as Post Fordism globalisation and lean production They also identify a number of rival internationalisation strategies that have been adopted by different companies Moreover they present an abundance of new as well as historical data on the world's one hundred largest core companies This data shows that none of the largest core firms is truly global or borderless and that virtually all of them in their history have benefited decisively from Governmental trade or industrial policies The authors offer a highly interdisciplinary effort to link three previously isolated debates on industrial restructuring globalisation and international trade policies The Logic of International Restructuring is aimed at a wide academic post graduate and professional audience working in the areas of business economics organisational studies and international relations

**Spillovers from Japan's Unconventional Monetary Policy to Emerging Asia** Mr. Giovanni Ganelli, Nour Tawk, 2016-05-20 We use a Global VAR model to study spillovers from the Bank of Japan's quantitative and qualitative easing QQE on emerging Asia 1 Our main result is that despite an appreciation of their currencies vis vis the yen the impact on emerging Asia's GDP tended to be positive and

significant Our results suggest that the positive effect of QQE on expectations by improving confidence more than offset any negative exchange rate spillover due to expenditure switching from domestic demand to Japanese goods They also suggest that spillovers from QQE might have worked mainly through the impact of expectations and improved confidence captured by increases in equity prices rather than through balance sheet adjustments which might have been captured by movements in the monetary base

Taggart Murphy,1997 Discusses how America went from being the world s largest creditor to world s largest debtor in the eight years between 1980 and 1988 due to excessive borrowing from Japan during the Reagan presidency

**Foreign Aid and Emerging Powers** Iain Watson,2014-07-11 Current debates on emerging powers as foreign aid donors often fail to examine the myriad geopolitical geoeconomic and geocultural tensions that influence policies of Official Development Assistance ODA This book advocates a regional geopolitical approach to explaining donor donor relationships and provides a multidisciplinary critical assessment of the contemporary debates on emerging powers and foreign aid bringing together economic and geopolitical approaches in the light of the 2015 completion of the Millennium Development Goals MDGs Moving away from established debates assessing the advantages and disadvantages of foreign aid this book challenges the current geopolitical assumptions of the emerging powers concerning issues such as south south solidarity shared development experience and multipolarity It analyses how donor governments sell aid to recipients through enabling different cultural assumptions and soft power narratives of national identity and provides empirical evidence on agendas such as aid effectiveness aid for trade public private partnerships and green growth aid The book examines the role of and relationships between the leading traditional and emerging power Asian donors specifically and explores the different and contested perspectives and patterns of ODA policy through an alternative account of emerging power foreign aid to leading African and Asian recipients This book provides a valuable resource for postgraduate students and practitioners across disciplines such as development economics and geopolitics of development uniquely approaching the debate from the perspective of emerging powers and donors
