May 25 1803 April 27 1882 was an American essayist lecturer and poet who led the transcendentalist movement of the mid

19th century He was seen as a champion of individualism and a prescient critic of the countervailing pressures of society and he disseminated his thoughts through dozens of published essays and more than 1 500 public lectures across the United

States Emerson gradually moved away from the religious and social beliefs of his contemporaries formulating and expressing the philosophy of transcendentalism in his 1836 essay Nature Following this work he gave a speech entitled The American

Scholar in 1837 which Oliver Wendell Holmes Sr considered to be America s intellectual Declaration of Independence

Emerson wrote most of his important essays as lectures first and then revised them for print His first two collections of essays Essays First Series 1841 and Essays Second Series 1844 represent the core of his thinking They include the well

known essays Self Reliance The Over Soul Circles The Poet and Experience Together with Nature these essays made the decade from the mid 1830s to the mid 1840s Emerson s most fertile period Emerson wrote on a number of subjects never

espousing fixed philosophical tenets but developing certain ideas such as individuality freedom the ability for humankind to realize almost anything and the relationship between the soul and the surrounding world Emerson s nature was more

philosophical than naturalistic Philosophically considered the universe is composed of Nature and the Soul Emerson is one of several figures who took a more pantheist or pandeist approach by rejecting views of God as separate from the world He

remains among the linchpins of the American romantic movement and his work has greatly influenced the thinkers writers and poets that followed him When asked to sum up his work he said his central doctrine was the infinitude of the private man

Emerson is also well known as a mentor and friend of Henry David Thoreau a fellow transcendentalist
