*Emerson's Life in Science* Laura Dassow Walls, 2018-05-31 Ralph Waldo Emerson has traditionally been cast as a dreamer and a mystic concerned with the ideals of transcendentalism rather than the realities of contemporary science and technology In Laura Dassow Walls's view Emerson was a leader of the secular avant garde in his day He helped to establish science as the popular norm of truth in America and to modernize American popular thought In addition he became a hero to a post Darwinian generation of Victorian Dissenters exemplifying the strong connection between transcendentalism and later nineteenth century science In his early years as a minister Emerson read widely in natural philosophy or physics chemistry geology botany and comparative anatomy When he left the church it was to seek the truths written in the book of nature rather than in books of scripture While visiting the Paris Museum of Natural History during his first European tour Emerson experienced a revelation so intense that he declared I will be a naturalist Once he was back in the United States his first step in realizing this ambition was to deliver a series of lectures on natural science These lectures formed the basis for his first publication *Nature* 1836 and his writings ever after reflected his intense and continuing interest in science Walls finds that Emerson matured just as the concept of the two cultures emerged when the disciplines of literature and science were divorcing each other even as he called repeatedly for their marriage Consequently Walls writes half of Emerson's thought has been invisible to us science was central to Emerson to his language to the basic organization of his career In *Emerson's Life in Science* she makes the case that no study of literary history can be complete without embracing science as part of literature Conversely she maintains no history of science is complete unless we consider the role played by writers of literature who helped to install science in the popular imagination

Sealts,1996 These lucid essays though varied in subject have the commonality of an emphasis on teaching The first essay entitled Emerson as Teacher demonstrates how Emerson provoked and inspired and educated his students and his students students     Space in America Klaus Benesch,Kerstin Schmidt,2005 America s sense of space has always been tied to what Hayden White called the narrativization of real events If the awe inspiring manifestations of nature in America Niagara Falls Virginia s Natural Bridge the Grand Canyon etc were often used as a foil for projecting utopian visions and idealizations of the nation s exceptional place among the nations of the world the rapid technological progress and its concomitant appropriation of natural spaces served equally well as David Nye argues to promote the dominant cultural idiom of exploration and conquest

From the beginning American attitudes towards space were thus utterly contradictory if not paradoxical a paradox that scholars tried to capture in such hybrid concepts as the middle landscape Leo Marx an engineered New Earth Cecelia Tichi or the technological sublime David Nye Not only was America s concept of space paradoxical it has always also been a contested terrain a site of continuous social and cultural conflict Many foundational issues in American history the dislocation of Native and African Americans the geo political implications of nation building immigration and transmigration the increasing division and clustering of contemporary American society etc involve differing ideals and notions of space Quite literally space and its various ideological appropriations formed the arena where America s search for identity national political cultural has been staged If American democracy as Frederick Jackson Turner claimed is born of free land then its history may well be defined as the history of the fierce struggles to gain and maintain power over both the geographical social and political spaces of America and its concomitant narratives The number and range of topics interests and critical approaches of the essays gathered here open up exciting new avenues of inquiry into the tangled contentious relations of space in America Topics include Theories of Space Landscape Nature Technoscape Architecture Urban Utopia Literature Performance Film Visual Arts *Nineteenth Century Prose* ,2003 **Emerson, Romanticism, and Intuitive Reason** Patrick J. Keane,2005 Comparative study in transatlantic Romanticism that traces the links between German idealism British Romanticism Wordsworth Coleridge Carlyle and American Transcendentalism Focuses on Emerson s development and use of the concept of intuitive Reason which became the intellectual and emotional foundation of American Transcendentalism Provided by publisher
