Passion killers: The art of passion killing in the age of stress and anxiety Phillip Walden Bowen, 2021-09-07 There is growing pressure and stress placed on organisations to fight for customers and service product placement in an increasingly competitive global marketplace It has therefore never been more important to get the best out of the workforce To achieve this the role of the leader can be a fundamental factor in organisational success or failure Leaders need to have the requisite skills to reflect the demands placed upon them in the 21st century There are the accidental managers who just drop into the role of leadership and others who may develop skills and knowledge in readiness for a leadership role There are also those who may have the innate ability to lead Within the mix are those who are characterised by traits associated with the dark triad or who may use pathocratic influence on others to conform reinforcing values or lack of values associated with toxic leadership They create damage and harm They become passion killers The result can lead to a pathocracy This book discusses the role emotional intelligence plays in helping people deal with stressful and challenging experiences suggesting different ways to cope The author reflects on the values that are integral to the success or failure of an organisation Passion is identified as an added value that can differentiate one organisation from another If passion is harmed it can affect motivation creativity output performance and productivity Therefore this book provides the reader with examples of passion killing while making suggestions as to factors that can be adopted to engage and encourage passion Conclusions are drawn and recommendations made to support those faced with passion killers This book is aimed at those of all ages and

educational backgrounds interested in developing their leadership knowledge and skills It is also aimed at those interested in learning more about differences in personality emotional intelligence stress coping values and the importance of understanding the impact of passion killers *Measuring Multiple Intelligences and Moral Sensitivities in Education* Kirsi Tirri,Petri Nokelainen,2012-01-01 In this book we introduce several sensitivity measures in educational contexts that can be used in research education and self evaluations In Chapter 1 we discuss the framework of Howard Gardner s Multiple Intelligences theory and introduce our Multiple Intelligences Profiling Questionnaire We present the psychometrical qualities of the instrument with empirical data sets of children youth and adults In Chapter 2 the Spiritual Sensitivity Scale is introduced with the theoretical framework it is connected to The existence of spiritual intelligence has been a widely debated issue and not everybody is ready to call advanced thinking in religious or spiritual domains as intelligence This has guided us to use the term sensitivity which is easier to justify than intelligence in these areas of human behavior In Chapter 3 we introduce the Environmental Sensitivity Scale which is quite close to the possible intelligence of naturalist suggested by Gardner In Chapter 4 Ethical Sensitivity Scale is introduced followed by Emotional Leadership Questionnaire in Chapter 5 All these scales have a solid theoretical framework and earlier empirical work to support the instrument building Chapter 6 introduces Intercultural and Interreligious Sensitivity Scales with their theoretical frameworks and earlier empirical work Following each chapter we have included a ready to use version of the questionnaire and SPSS syntax to compute factors A commentary by Dr Seana Moran compliments the book and challenges the readers to further reflect the meaning of education in supporting holistic development of learners in their life long journey We have authored this book to contribute to this goal and hope it will be used in the hands of researchers teachers and students in their mutual effort to grow and to learn new things in life **Contemporary Intellectual Assessment** Dawn P. individual Rather than material success popularity or power the investigations reported in this volume suggest that personally constructed goals intrinsic motivation and a sense of autonomy are much more important The chapters indicate that hardship and suffering do not necessarily make us unhappy and they suggest therapeutical implications for improving the quality of life Specific topics covered include the formation of optimal childhood values and habits as well as a new perspective on aging This volume provides a powerful counterpoint to a mistakenly reductionist psychology They show that subjective experience can be studied scientifically and measured accurately They highlight the potentiality for autonomy and freedom that is among the most precious elements of the human condition MOreover they make a convincing case for the importance of subjective phenomena which often affect happiness more than external material conditions After long decades during which psychologists seemed to have forgotten that misery is not the only option the blossoming of Positive Psychology promises a better understanding of what a vigorous meaningful life may consist of
