Emotions across Cultures David Konstan, 2022-06-21 It is now recognized that emotions have a history In this book eleven scholars examine a variety of emotions in ancient China and classical Greece in their historical and social context A general introduction presents the major issues in the analysis of emotions across cultures and over time in a given tradition Subsequent chapters consider how specific emotions evolve and change For example whereas for early Chinese thinkers worry was a moral defect it was later celebrated as a sign that one took responsibility for things In ancient Greece hope did not always focus on a positive outcome and in this respect differed from what we call hope Daring not to do or undaring was itself an emotional value in early China While Aristotle regarded the inability to feel anger as servile the Roman Stoic Seneca rejected anger entirely Hatred and revenge were encouraged at one moment in China and repressed at another Ancient Greek responses to tragedy do not map directly onto modern emotional registers and yet are similar to classical Chinese and Indian descriptions There are differences in the very way emotions are conceived This book will speak to anyone interested in the many ways that human beings feel

Metaphors of ANGER across Languages: Universality and Variation Zoltan Kövecses, Réka Benczes, Veronika Szelid, 2024-11-04 Anger is one of the basic emotions of human emotional experience informing and guiding many of our choices and actions Although it has received considerable scholarly attention in a number of disciplines including linguistics a basic question has still remained unresolved why do variations in the folk model of anger exist across languages if it is indeed a basic emotion rooted in largely universal bodily experience By drawing on a wide selection of comparable linguistic data from dozens of languages including a number of less researched languages this volume provides the most comprehensive account of what is universal and what is variable in the folk model of anger and why It also investigates the role that metonymies might play in the emergence of anger related metaphors and in what ways context influences or shapes anger metaphors and thereby the resulting folk model of anger No such volume exists in the cognitive linguistic literature on anger or on emotions for that matter The book is thus an essential contribution to the study of anger and will serve as basic reading for any researcher interested in how the conceptualization of anger is constructed via the interplay of bodily experience language and the larger cultural context

A Prototype Approach to Hate and Anger in the Hebrew Bible Deena Grant,2023-06-09 This innovative book applies findings from the field of cognitive linguistics to the study of emotions in the Hebrew Bible The book draws on the prototype approach to conceptual categories to help interpret emotion language in biblical passages Contemporary scholarship has come to recognize that biblical emotion terms do not necessarily possess exact equivalents within our modern lexicons even if some of these terms express or appear to express concepts similar to those conveyed by modern emotion language In particular the book focuses on שׂנא and רָחַם which are almost always equated in modern English with hate and anger However the ancient Hebrew roots evoke varied and robust emotion scripts that are quite different than their English counterparts We see how the prototype script model may help to expose the unique nuances of שׂנא and רָחַם and put into profile elements of these emotions that may otherwise go unnoticed Overall the study demonstrates that even though modern emotion terms cannot fully capture the ancient emotional experience our shared use of language to evoke meaning offers us entrance into the emotional world represented in the Hebrew Bible

Bilingual Couples in Conversation Silja Ang-Tschachtli, 2022-01-31 This book provides a detailed linguistic

analysis of the communication between highly proficient bilingual couples each consisting of a native speaker of English and of Swiss German. Combining the accounts of ten couples on their language use with an analysis of their actual linguistic behaviour, several areas of the partners' speech and interaction were closely examined. These include their language choice and language mixing, attitudes, expression of emotions, swearing, as well as their humour and laughter. In addition, the influence of the bilinguals' mother tongue and gender on their language use was explored.
