Emperor Of Scent:

The Emperor of Scent Chandler Burr, 2003-01-21 For as long as anyone can remember a man named Luca Turin has had an uncanny relationship with smells He has been compared to the hero of Patrick Suskind's novel *Perfume* but his story is in fact stranger because it is true It concerns how he made use of his powerful gifts to solve one of the last great mysteries of the human body how our noses work Luca Turin can distinguish the components of just about any smell from the world's most refined perfumes to the air in a subway car on the Paris metro A distinguished scientist he once worked in an unrelated field though he made a hobby of collecting fragrances But when as a lark he published a collection of his reviews of the world's perfumes the book hit the small insular business of perfume makers like a thunderclap Who is this man Luca Turin they demanded and how does he know so much The closed community of scent creation opened up to Luca Turin and he discovered a fact that astonished him no one in this world knew how smell worked Billions and billions of dollars were spent creating scents in a manner amounting to glorified trial and error The solution to the mystery of every other human sense has led to the Nobel Prize if not vast riches Why Luca Turin thought should smell be any different So he gave his life to this great puzzle And in the end incredibly it would seem that he solved it But when enormously powerful interests are threatened and great reputations are at stake Luca Turin learned nothing is quite what it seems Acclaimed writer Chandler Burr has spent four years chronicling Luca Turin's quest to unravel the mystery of how our sense of smell works What has emerged is an enthralling magical book that changes the way we think about that area between our mouth and our eyes and its profound secret hold on our lives

anyone who has ever wondered about smell still the most mysterious of the senses *The Smell Culture Reader* Jim Drobnick, 2024-11-01 Smell is fundamental to experience but mired in paradox Stigmatized as animalistic it nonetheless feeds a vast fragrance and marketing industry Considered ephemeral scents have survived throughout the ages in a number of religious practices The Smell Culture Reader provides a much needed overview of what is arguably the most elusive sense From hygiene to aromatherapy the fetid to the fragrant smells are shown to be much more than just an adornment or a nuisance Addressing this engaging sense in redolent detail The Smell Culture Reader demonstrates how essential smell is to sexuality social status personal identity and cultural tradition *Brain Sense* Faith Hickman Brynie, 2009-09-28 Complex and crucially important the senses collect the massive amount of information we need to navigate daily life and serve as a filter between our inner selves and the larger world But the science of how the senses work has been little understood until now New research is rapidly uncovering fascinating insights into how the brain processes sensory information It s not simply a matter of the brain controlling the senses the senses actually stimulate brain development For example the brain s sound processing centers mature properly only when sound impulses trigger them to do so which is why cochlear implants are best used before the age of three Brain Sense reveals this and a wealth of findings on how the brain and senses interact as it examines each of the five major senses touch smell taste vision and hearing With eloquent writing and gripping stories the author deploys a rare gift for explaining complex scientific ideas in a way that is clear and comprehensible She introduces the scientists at the forefront of brain sense studies neurologists brain mappers bio chemists physicians cognitive psychologists and others as well as real life people who are contributing to the research and benefiting from its practical applications such as haptic devices to assist people who have lost limbs or rehabilitative software for those who have suffered impairments to their motion vision You ll find new research that explains Why placebos work by changing the way the brain processes pain How humans respond to pheromones in the same manner as other animals How taste is highly influenced by expectations of taste Why color significantly aids the ability to remember an object How the capacity for language is already at work in newborn babies What happens in the brain to produce sensory experiences such as d j vu and phantom limb pain And much more Expansive and enlightening Brain Sense shows us that the brain is both flexible and variable and the reality that we construct based on inputs gathered from the senses differs from person to person It sheds a much needed light on the elusive workings of the extraordinary human brain **Shadowscents** P.
