**Empire's Labor** Adam D. Moore, 2019-11-15 In a dramatic unveiling of the little known world of contracted military logistics Adam Moore examines the lives of the global army of laborers who support US overseas wars Empire's Labor brings us the experience of the hundreds of thousands of men and women who perform jobs such as truck drivers and administrative assistants at bases located in warzones in the Middle East and Africa He highlights the changes the US military has undergone since the Vietnam War when the ratio of contractors to uniformed personnel was roughly 1 6 In Afghanistan it has been as high as 4 1 This growth in logistics contracting represents a fundamental change in how the US fights wars with the military now dependent on a huge pool of contractors recruited from around the world It also Moore demonstrates has social economic and political implications that extend well beyond the battlefields Focusing on workers

from the Philippines and Bosnia two major sources of third country national TCN military labor Moore explains the rise of large scale logistics outsourcing since the end of the Cold War describes the networks infrastructures and practices that span the spaces through which people information and goods circulate and reveals the experiences of foreign workers from the hidden dynamics of labor activism on bases to the economic and social impacts these jobs have on their families and the communities they hail from Through his extensive fieldwork and interviews Moore gives voice to the agency and aspirations of the many thousands of foreigners who labor for the US military Thanks to generous funding from UCLA and its participation in TOME Toward an Open Monograph Ecosystem the ebook editions of this book are available as Open Access volumes from Cornell Open [cornellpress cornell edu cornell open](http://cornellpress.cornell.edu/cornell-open) and other repositories

**New Neoliberalism and the Other** Giuseppe Cocco, Bruno Cava, 2018-02-19 The exhaustion of neoliberal globalization is marked by three great tendencies or inflections the first is the scornful failure of the South American attempt to construct a neo developmentalist exit the second is the increasingly unavoidable Chinese effect macro and micro dynamics within globalization the third is the combination of austerity policies and monetary emissions Quantitative Easing that characterize for instance the financial conduct of the Central European Bank The dramatic failure to renew traditional state interventionism in the sphere of Pink Tide in Latin American politics in particular with the violent recession of the biggest economy on the Latin American continent Brazil shows and confirms that the escape from neoliberal regulation does not pass through the return of the traditional role of the state At the same time the Chinese economy came to play a double role On one hand it appears to represent the great and irreversible novelty of neoliberal globalization particularly when our point of perspective is South America While almost nothing remains of the legacy of the center left leaning regimes the last South American decade appears to have genuinely been a Chinese decade The Chinese advance is seen especially by voices of the critical globalization studies as a new outside of Empire as something that stands for an alternative path even if it is nothing more than an old new outside Meanwhile the role played by the financial sector continues to be regarded per se as the fundamental problem of contemporary capitalism For some this is a case of a deviation from an otherwise good capitalism the misleading result of a fictitious and unreal sphere as opposed to the sphere of material economy of good old bosses and hard workers while for others it is a case of one of the moral characteristics of Western civilization infinite debt and capitalism happens to be its modern drift
