Empirical Studies Of Commercial Policy:

Empirical Studies of Commercial Policy Robert E. Baldwin, 2007-12-01 The need for careful research on trade policy is particularly acute and this volume empirically addresses these and many other important issues The contributors offer studies which integrate the institutional details of current trade policy with creative economic analyses Marked by a shift from a traditional reliance on simulation models these papers take their inspiration from recent changes in the assumptions traditionally underlying research in international trade theory No longer are government policies viewed as being somehow given to the researcher in part 1 Analyses with a Political Economy Perspective four papers treat such policies as endogenous and explicable in terms of political economy Neither are product and factor markets seen as perfectly competitive instead the three papers in part 2 Trade Policy Effects under Imperfectly Competitive Market Conditions assume that firms consider the actions of other companies when formulating their decisions In part 3 A New Measure of Trade Restrictiveness and Estimates of Trade Policy Effects with CGE Models the first essay explores the quantitative restrictions on cheese to develop and implement a new model of restrictive trade Two final contributions address problems for which simulation modeling is especially useful The first considers the effectiveness of an import surcharge in reducing the U S trade deficit and the second treats the welfare effects of liberalization in South Korea where increasing returns to scale are significant These innovative studies focus on economic behavior that will provide valuable insights for policymakers academic economists and students

Empirical Studies of Commercial Policy Robert E. Baldwin, 1991 **Trade Policy Issues and Empirical Analysis** Robert E. Baldwin, 2008-04-15 Interest in U S trade policy has been stimulated in recent years by the massive American trade deficit by the belief that intervention by foreign governments in international markets has given other countries a competitive edge over the United States and by concern about the increase in protectionism among industrial countries In turn major analytical developments in international economics have revolutionized trade theory broadening its scope both by introducing in a more formal manner such concepts as imperfect competition increasing returns product differentiation and learning effects and by including the study of political and economic factors that shape trade policy decisions This collection of papers the result of a conference held by the NBER applies these new trade theories to existing world cases and also presents complementary empirical studies that are grounded in more traditional trade theories The volume is divided into four parts The papers in part 1 consider the problem of imperfect competition empirically assessing the economic effect of various trade policies introduced in industries in which the new trade theory seems to apply Those in part 2 isolate the effects of protection from the influences of the many economic changes that accompany actual periods of protection and also examine how the effects from exogenous changes in economic conditions vary with the form of protection Part 3 provides new empirical evidence on the effect of foreign production by a country's firms on the home country's exports Finally in part 4 two key bilateral issues are analyzed recent U S Japanese trade tensions and the incident involving the threat of the

imposition of countervailing duties by the United States on Canadian softwood lumber

China's Commercial Health Insurance China Development Research Foundation, 2020-08-18 This book examines the financing of China's health system argues that present arrangements are not adequate and proposes an increased role for commercial health insurance as a way of overcoming the difficulties Highlighting that China's present social medical insurance system can only cover basic medical services with the results that many Chinese people with higher income are going abroad for high quality medical services and that doctors are not bringing in the salaries and obtaining the social status they expect the book suggests that commercial health insurance offers a possible solution in that it can help meet the demand of higher income groups for better healthcare services while at the same time increasing the income of more competent medical professionals The book goes on to consider the current state of China's commercial insurance industry outlining the various challenges that the industry needs to overcome if it is to fulfil an increased role challenges such as greater specialization increased capacity structural reform improved regulation and closer integration with China's medical reform programme
