Labour Market and Social Protection Reforms in International Perspective Giuliano Bonoli, 2017-07-05. Social protection systems and labour markets have undergone major changes in the past two decades. Welfare states are being reformed, scaled back, and modernised; labour markets at the same time are more precarious, more feminised, more unequal, and throughout the OECD area older. The interaction between labour markets and social protection has become increasingly crucial to the social and economic policy mix concerning unemployment, the transformation of work, the new poverty, and even demographics. Against this background, an interdisciplinary team of leading labour market and social protection experts from various OECD countries examine the multifaceted aspects of the changing relationship between social protection systems and labour markets. They identify and analyse key emerging issues such as the link between employment and social protection, financing the adaptation of social protection systems to women's career patterns, and the development of new forms of social protection that aim at promoting employment. With practical policy guides and recommendations using case studies and comparative chapters, this will be engaging reading for policy makers, social actors, and academics alike.

International and Comparative Labour Law Arturo Bronstein, 2017-09-16 A stimulating authoritative account of international employment law written by a leading figure who for many years has shaped global policy striving to implement fairer working conditions worldwide We are expertly guided through the context and development of labour law making this book ideal for study or research *Voices at Work* Alan Bogg, Tonia Novitz, 2014-04-03 This edited collection is the culmination of a comparative project on Voices at Work funded by the Leverhulme Trust 2010 2013 The book aims to shed light on the problematic concept of worker voice by tracking its evolution and its complex interactions with various forms of law Contributors to the volume identify the scope for continuity of legal approaches to voice and the potential for change in a sample of industrialised English speaking common law countries namely Australia Canada New Zealand UK and USA These countries facing broadly similar regulatory dilemmas have often sought to borrow and adapt certain legal mechanisms from one another The variance in the outcomes of any attempts at borrowing seems to demonstrate that despite apparent membership of a common law family there are significant differences between industrial systems and constitutional traditions thereby casting doubt on the notion that there are definitive legal solutions which can be applied through transplantation Instead it seems worth studying the diverse possibilities for worker voice offered in divergent contexts not only through traditional forms of labour law but also such disciplines as competition law human rights law international law and public law In this way the comparative study highlights a rich multiplicity of institutions and locations of worker voice configured in a variety of ways across the English speaking common law world This book comprises contributions from many leading scholars of labour law politics and industrial relations drawn from across the jurisdictions and is therefore an exceedingly comprehensive comparative study It is addressed to academics policymakers legal practitioners legislative drafters trade unions and interest groups alike Additionally while offering a critique of existing laws this book proposes alternative legal tools to promote engagement with a multitude of voices at work and therefore foster the effective deployment of law in industrial relations **The Age of Dualization** Patrick Emmenegger, Silja Häusermann, Bruno Palier, Martin Seeleib-Kaiser, 2012-08-01 Poverty increased inequality and social exclusion are back on the political agenda not only as a consequence of the Great Recession of 2008 but also because of a seemingly structural trend towards increased inequality in advanced industrial societies that has persisted since the 1970s Policies in labor markets social policy and political representation are strongly linked in the creation widening and deepening of insider outsider divides a process

known as dualization. While it is certainly not the only driver of increasing inequality, its development across multiple domains makes dualization one of the most important current trends affecting developed societies. The comparative perspective of this book provides insights into why Nordic countries witness lower levels of insider-outsider divides, whereas in continental liberal and southern welfare states they are more likely to constitute a core characteristic of the political economy. Most importantly, the comparisons presented in this book point to the crucial importance of politics and political choice in driving and shaping the social outcomes of deindustrialization. While increased structural labor market divides can be found across all countries, governments have a strong responsibility in shaping the distributive consequences of these labor market changes. Insider-outsider divides are ultimately the result of political choice. A landmark publication, this volume is geared for faculty and graduate students of economics, political science, social policy, and sociology, as well as policymakers concerned with increasing inequality in a period of deep economic and social crisis. *OECD Economic Surveys: New Zealand 2013*
