value profitability and organizational structure **Regionalization and Labour Market Interdependence in East and Southeast Asia** Duncan Campbell, Asma Lateef, Aurelio Parisotto, Anil Verma, 2016-01-06 How can we account for the dynamic growth of East and Southeast Asian countries Much of the debate has turned on the question of the state versus the market as exclusive and often competing explanations of the successful performance of individual countries This book explores the distinctively interdependent nature of the East and Southeast Asian experience As firms create a regional organization of production the growing interdependence of national labour markets is one major outcome **Non-Standard Employment in Europe** Max Koch, Martin Fritz, 2013-10-03 Postwar employment standards are being undermined and non standard employment is becoming more common While scholars have pointed to negative consequences of this development this volume also discusses the evidence for a new and socially inclusive European employment standard **Economy, Work, and Education** Catherine Casey, 2016-07-27 Economy Work and Education Critical Connections addresses effects of neoliberal capitalism in particular regard to work and education It reveals limits and paradoxes in macroeconomic policy imperatives toward knowledge based economies and learning societies and elaborates ensuing critical concerns and dilemmas It concludes with an exploration of innovative conceptions of social citizenship which may stimulate sources of a revitalization of work and education beyond singular economic imperatives **Comparing Welfare Capitalism** Bernhard Ebbinghaus, Philip Manow, 2004-01-14 This book challenges the popular thesis of a downward trend in the viability of welfare states in competitive market economies With approaches ranging from historical case studies to cross national analyses the contributors explore various aspects of the relationships between welfare states industrial relations financial government and production systems Building upon and combining comparative studies of both the varieties of capitalism and the worlds of welfare state regimes the book considers issues such as the role of employers and unions in social policy the interdependencies between financial markets and pension systems the current welfare reform process It sheds new light on the tenuous relationship between social policies and market economies and provides thought provoking reading for students and scholars of Comparative Politics Public Policy the Welfare State and Political Economy **The Oxford Handbook of Employment Relations** Adrian Wilkinson, Geoffrey Wood, Richard Deeg, 2014-03-13 There have been numerous accounts exploring the relationship between institutions and firm practices However much of this literature tends to be located into distinct theoretical traditional silos such as national business systems social systems of production regulation theory or varieties of capitalism with limited dialogue between different approaches to enhance understanding of institutional effects Again evaluations of the relationship between institutions and employment relations have tended to be of the broad brushstroke nature often founded on macro data and with only limited attention being accorded to internal diversity and details of actual practice The Handbook aims to fill this gap by bringing together an assembly of comprehensive and high quality chapters to enable understanding of changes in employment relations since the early 1970s Theoretically based

chapters attempt to link varieties of capitalism business systems and different modes of regulation to the specific practice of employment relations and offer a truly comparative treatment of the subject providing frameworks and empirical evidence for understanding trends in employment relations in different parts of the world Most notably the Handbook seeks to incorporate at a theoretical level regulationist accounts and recent work that link bounded internal systemic diversity with change and at an applied level a greater emphasis on recent applied evidence specifically dealing with the employment contract its implementation and related questions of work organization It will be useful to academics and students of industrial relations political economy and management

Globalization and Patterns of Labour Resistance edited by Jeremy Waddington seek to remedy this deficiency by presenting contemporary research on the relationship between the globalization of production and the regulation of labour. It considers the ways in which national and supra national regimes of labour regulation are being actively reconstructed in the context of the internationalization of production. The contributors analyze the implications of changes in different national labour regimes for relations between state capital and labour and for class and gender segmentation and discuss the scope and limits of recent initiatives in the implementation of international labour standards.

The New Job Contract Barbara Hilbert Andolsen, 2009-10-01

Unemployment is down but so is job security. Mergers, spin offs and strategic realignments can change corporations practically overnight. Whole industries can decline as stock prices fall and capital is routed electronically to the next big venture. Careers can end suddenly and incomes drastically fall. Emphasizing the increasing inequity among women workers, some advance rapidly in their careers while those at society's margins barely get by. Barbara Hilbert Andolsen's study is the first feminist analysis to connect religious understandings of economic justice with the issues facing both workers and the wider community. Expanding her scope to address all workers, she urges the knowledge elites to lessen the distance between themselves and the unskilled and poor in order to forge solidarity between common concerns. The New Job Contract investigates the buyouts and restructurings to expose the underlying economic transition afoot and the broader implications for society and families.
