Empowerment in Construction 4.0 by the CDR-Approach Bianca Christina Weber-Lewerenz, 2024-09-01 This is a publication based dissertation The book examines the promotion of innovation in construction 4.0 through the CDR approach This opens up a new scientific research field for digital breakthroughs It raises awareness explains and enables access to innovative technologies such as digitalization and AI in the construction industry and highlights the associated ethical aspects This research comes to the conclusion that the human factor forms the basis for designing a socially sustainable digital transformation The new findings show how innovative technology can support people more efficiently productively safely and meaningfully It specifically addresses responsibility in the corporate environment and develops the key factors for success without neglecting the necessary legal political social and educational framework The aim of this book is to improve and strengthen the transfer of knowledge between research and practice on the basis of scientific communication without language barriers In this way the book offers broader access for readers not only for experts researchers designers implementers doers and visionaries The book encourages an interdisciplinary integrative and constructive dialogue in order to avoid disciplinary silo thinking The diversity of potential and innovations in the industry is offset by the industry's enormous responsibility to use sustainable human controlled AI to achieve the 17 UN SDGs and climate goals and to increase its global competitiveness on the basis of a European quality seal Surprise and aha effects are inevitable The book invites key players everyone involved and everyone who sets new standards to help shape the digital change in the construction industry and become innovative The book promotes a new culture of thinking and learning and strengthens the entrepreneurial will to innovate Opening a new gap in scientific knowledge with this book ultimately leads to a new discipline In addition it expands the interdisciplinary dialogue around the globe to find new ways to assume corporate digital responsibility and adapt the framework conditions The book provides new ideas for defining individual digital corporate strategies *Project Management in Construction* Anthony Walker, 2015-01-30 As with all previous editions of Project Management in Construction this sixth edition focuses on systems theory as the approach suitable for organizing and managing people skilled in the design and completion of construction projects It discusses the many competing paradigms and alternative perspectives available for example in relation to differentiation and integration as well as the emerging study of temporary organizations and its relevance to construction project management Whilst encompassing the need to develop further theoretical aspects of construction project organization theory this edition has also enhanced the application of organization

studies to practical issues of construction project management More emphasis has been placed on the added complexity of construction project management by issues surrounding clients and stakeholders and the control and empowerment of project participants Additional focus has been placed on sustainability issues as they impinge on construction project management on reworked views on supply chain management and on developments in partnering together with clarification of the shifting terms and definitions relating to construction organization structures and their uses Human Resource Management in Construction Projects Martin Loosemore, Andrew Dainty, Helen Lingard, 2003 This book is aimed at project managers and students of project management who until now have been handed the responsibility for human resource management without adequate knowledge or training

Moving the Construction Safety Climate Forward in Developing Countries Tchad Jatau, Fidelis Emuze, John Smallwood, 2023-04-28 The construction industry in developing economies is responsible for creating deliverables such as infrastructure and housing while providing a means of livelihood to an ever increasing number of management and frontline workers However in many parts of the world injuries and fatalities have continued to damage the industry's image This book intends to meet the needs of many construction managers who though technically informed struggle with managing frontline workers especially regarding motivating positive safety outcomes It discusses the challenges experienced in the industry and how site management may navigate them to improve safety performance in the workplace By documenting the experiences of site management in developing countries this book intends to contribute to the education of professionals on evolving better safety environments on construction sites It considers the safety climate in a high risk work environment administrative procedures and the implementation mechanisms The book also documents findings from existing literature about developing countries in contrast to what is obtainable in developed countries Each chapter features context specific explanations from empirical research conducted in developing countries Key safety climate issues are contextualised considering the challenges faced in developing countries alongside current trends that will help chart future directions that will promote continuous improvement of safety outcomes of construction projects This book is essential reading for construction managers researchers and academics in the field of safety management infrastructure delivery and project management

Diversity in Construction - The Gamechangers Bianca Christina Weber-Lewerenz, 2024-12-24 The book explains why innovation and new digital technologies in the construction industry and beyond are largely dependent on a new culture of thinking Personal experience reports from user practice and insights into research show the many human and technical potentials that have so far been insufficiently utilised The book provides examples of how digital change can be shaped in a meaningful and constructive way It looks back at the historical development of diversity in construction and highlights entrepreneurial paths towards a more diverse working culture but also identifies the problem areas that hinder the innovation process A variety of calls for action are derived from the inventory Where do we stand and the question Where do we want need to go Diversity is the key to success This

realisation is important in order to set the course for an innovative sustainable construction industry now The book identifies the key factors and core competences at all levels that are decisive for promoting diversity and innovation If it utilises these consistently the construction industry can take on a pioneering role at home and abroad *Construction Workforce Management in the Fourth Industrial Revolution Era* Lerato Aghimien, Clinton Ohis Aigbavboa, Douglas Aghimien, 2024-02-12 Through a critical review of existing related theories and models the authors address gaps in existing workforce management studies and propose a conceptual model to improve the management of workers in the construction industry

Organizational Behaviour In Construction Anthony Walker, 2011-06-20 The core of all successful organizations is the effectiveness with which people work together Individuals have differing characteristics and personalities and the manner in which they interact is the key to meeting organizational objectives This is the case for all organizations but particularly so in construction which is distinctly different from other industries Construction is complex and highly differentiated with a wide range of specialists with disparate professional skills working in a highly integrated way to deliver projects successfully Understanding how the people involved in construction behave and work together is necessary for projects to have successful outcomes Organizational behaviour is an established field in mainstream management literature but general treatments cannot reflect the specific issues and idiosyncrasies of the construction industry and the people who inhabit it Organizational Behaviour in Construction addresses the behaviour of individuals and groups within the different organizations which come together on construction projects and within the organizations created to manage projects It describes how their behaviour impacts on the performance of construction organizations and their contribution to the project as a whole Drawing on mainstream organizational literature but putting it into the specific context of construction and containing many illustrations drawn from the industry this book will be required reading for all senior undergraduate and postgraduate students of construction as well as middle and senior management in the industry *Self-Construction and the Formation of Human Values* Teodros Kiros, 2001-01-30 This volume presents a theoretical defense of the potential of ordinary individuals to construct values and through them to become self empowering responsible participants in a democratic community Rather than conceiving of power as domination the author identifies true power as self empowerment a notion based on self construction He proposes the vision of an authentically free self filled with a compassion that is a composite of reason and feeling Such a composite self does not consciously manipulate language truth and desire to dominate and subordinate other individuals but uses them to construct values and norms that can enrich others To support his argument the author draws on both classical and contemporary philosophers as well as on literary sources Language Policy and Identity Construction Eric A. Anchimbe, 2013-01-07 The dis empowerment of languages through language policy in multilingual postcolonial communities often shapes speakers identification with these languages their attitude towards other languages in the community and their choices in interpersonal and intergroup communication Focusing on the dynamics of

Cameroon's multilingualism this book contributes to current debates on the impact of political language policy on daily language use in sociocultural and interpersonal interactions multiple identity construction indigenous language teaching and empowerment the use of Cameroon Pidgin English in certain formal institutional domains initially dominated by the official languages and linguistic patterns of social interaction for politeness respect and in group bonding Due to the multiple perspectives adopted the book will be of interest to sociolinguists applied linguists pragmaticians Afrikanists and scholars of postcolonial linguistics

Lean Construction Management Shang Gao, Sui Pheng Low, 2014-05-23 The book presents a mixed research method adopted to assess and present the Toyota Way practices within construction firms in general and for firms in China specifically The results of an extensive structured questionnaire survey based on the Toyota Way styled attributes identified were developed and data collected from building professionals working in construction firms is presented The quantitative data presented in the book explains the status quo of the Toyota Way styled practices implemented in the construction industry as well as the extent to which these attributes were perceived for lean construction management The book highlights all the actionable attributes derived from the Toyota Way model appreciated by the building professionals but alerts the readers that some attributes fell short of implementation Further findings from in depth interviews and case studies are also presented in the book to provide to readers an understanding how these Toyota Way practices can be implemented in real life projects Collectively all the empirical findings presented in this book can serve to enhance understanding of Toyota Way practices in the lean construction management context The readers are then guided through to understand the gaps between actual practice and Toyota Way styled practices and the measures that they may undertake to circumvent the challenges for implementation The book also presents to readers the SWOT analysis that addresses the strengths weaknesses opportunities and threats towards the implementation of the Toyota Way in the construction industry The book prescribes the Toyota Way model for use in construction firms to strategically implement lean construction management The checklist presented in the book enables readers to draw lessons that may be used additionally as a holistic assessment tool for measuring the maturity of firms with respect to their Toyota Way implementation Consequent to this management would then be in a better position to develop plans for Toyota Way implementation by focusing on weak areas strengthening them and thus increasing the likelihood of success in the implementation of the Toyota Way In a nutshell this book provides a comprehensive and valuable resource for firms not only in the construction industry but also businesses outside of the construction sector to better understand the Toyota Way and how this understanding can translate to implementation of lean construction business management to enhance profitability and survivability in an increasingly competitive global market place
