in the labor market With this emphasis on vulnerability and a lens that is sensitive to gender differences and inequities the contributors to this volume use data from the most recent wave of a unique longitudinal survey to illuminate different aspects of Egyptians lives The aspects they explore include labor supply behavior the ability to access good quality and well paying jobs the evolution of wages and wage inequality the school to work transition of youth the decline in public sector employment international and internal migration the situation of rural women access to social protection food security vulnerability to shocks and coping mechanisms health status and access to health care services These analyses are prescient in understanding the axes of vulnerability in Egyptian society that became all too salient during the COVID 19 pandemic
