Global Family Capitalism Paloma Fernández Pérez, 2024-12-23. Emphasizing the diversity of regional and national models, this book explores the history of transformation of family businesses around the world during the twentieth and early twenty-first centuries. Expert contributors explore place-based family capitalism and the local embeddedness of family businesses, looking at how and why this family capitalism was transformed during the globalization and de-globalization periods in the last century. It explores the variation in the adaptations and transformation undertaken by family businesses in response to changes in technology, globalization, ideology and institutions, as well as world wars, pandemics and economic crises. The book also evaluates the relationship between changes in the internal organization and strategies of family businesses with external forces such as the political ideologies, changing ideas about the very nature of what constitutes a family, and changes in how the State has perceived families and family businesses in the world. The book also shows that despite all profound transformations in family capitalism, these businesses have remained resilient entrepreneurial forces and strong creators of wealth and employment. This book will be of great interest to readers in business and economic history, family business and entrepreneurship.

La empresa de familia en América Latina Horacio A. Irigoyen, 2005. **Marketing internacional en América latina** Harold Silva Guerra, 2021-01-06. Con un enfoque práctico, el lector puede introducirse en el mundo del marketing internacional. La metodología contempla tres aspectos esenciales que facilitan el aprendizaje: la teoría, los casos y los talleres. Producto de la experiencia del autor como docente de marketing internacional por más de veinte años en la Escuela de Negocios de la Universidad del Norte en Barranquilla, Colombia, los casos describen las problemáticas de las empresas latinoamericanas dedicadas al comercio internacional y las diferentes experiencias y barreras que han encontrado en el escenario internacional. Aunque se encuentran en una misma región, los casos de las empresas latinas contextualizan a los estudiantes y docentes sobre nuestros distintos estilos de vida y de la diversidad de nuestra cultura empresarial.
