Fallacy Of Wildlife Conservation:

The Fallacy of Wildlife Conservation John Livingston, 1981-01-01 **The Fallacy of Wildlife Conservation [sound Recording]** John A. Livingston, 1981 *The John A. Livingston Reader* John Livingston, 2013-03-05 Canada's pioneering radical naturalist now back in print John A Livingston is Canada's Rachel Carson His cogent brilliant writing on the effects of man on nature has defined an entire generation of environmentalists and is required reading for anyone who wants to understand the underpinnings of today's issues Radical when first published in the early 1970s and 1980s Livingston's arguments that we must find new approaches to our perception of nature and our place within it or face the irreversibility of our destruction of nature now reads prophetically The Reader brings two of Livingston's poetic and provocative books back into print for a new generation of readers and features an appreciation by Graeme Gibson **The John A. Livingston**

Reader John Livingston, 2007-01-23 Canada's pioneering radical naturalist now back in print John A Livingston is Canada's Rachel Carson His cogent brilliant writing on the effects of man on nature has defined an entire generation of environmentalists and is required reading for anyone who wants to understand the underpinnings of today's issues Radical when first published in the early 1970s and 1980s Livingston's arguments that we must find new approaches to our perception of nature and our place within it or face the irreversibility of our destruction of nature now reads prophetically The Reader brings two of Livingston's poetic and provocative books back into print for a new generation of readers and features an appreciation by Graeme Gibson **Wildlife Production Systems** Robert J. Hudson, K. R. Drew, L. M. Baskin, 1989-06 This book first published in 1989 examines the controversial position of commercial utilisation in relation to wildlife conservation Production of large mammals has earned respectability as an agricultural strategy and its evaluation has been listed as a priority requirement in the World Conservation Strategy However many authorities question whether wildlife production is a viable economic and environmental strategy and suggest that it runs counter to its claimed purpose This book evaluates this controversy by chronicling the changing role of wildlife and by reflecting on the implications of these trends The book should be of interest to people both applauding and deploring the use of wildlife in this economic role

Wildlife Resources Harald H. Roth, Günter Merz, 2013-06-29 The general interest and attention paid to the use of the renewable natural resources of the world have increased greatly during the last decades This is due to the environmental dilemma into which mankind has got itself by the total disregard of ecological facts and laws the underpricing of natural resources and the overemphasis on economic development coupled with unimpeded rapid population growth and the preponderance of materialistic consumption oriented attitudes The management and use of natural resources such as forests grasslands rivers and lakes were formerly considered purely in a financial context whereas latterly a consciousness of their social function and the indirect economic benefits which can be derived from them has developed Thus as regards these traditional resources multi use concepts comprising economically oriented utilisation as well as recreational educational and

social use have become widely accepted Conservation of natural resources for sustainable consumptive as well as non consumptive uses has been recognised as a key element for maintaining economic development all over the world Fortunately the industrialised countries have started to apply this principle themselves and in their technical and financial aid to the developing Third World countries This is manifest from policy documents such as the World Bank Policy on Development of Wild Lands issued in 1987

Environmentalism And Political Theory Robyn Eckersley, 2023-01-06 This book represents the consolidation of a new field of political enquiry that is becoming an increasingly important component of political studies throughout the world Eckersley's interdisciplinary study builds bridges between environmental philosophy ecological thought and political enquiry using a range of new insights from environmental philosophy to outline a particular Green political perspective Aims to provide a detailed and comprehensive examination of the impact of environmentalism on contemporary political thought

The Subjugation of Canadian Wildlife Max Foran, 2018-04-10 Hardly a day goes by without news of the extinction or endangerment of yet another animal species followed by urgent but largely unheeded calls for action An eloquent denunciation of the failures of Canada's government and society to protect wildlife from human exploitation Max Foran's *The Subjugation of Canadian Wildlife* argues that a root cause of wildlife depletions and habitat loss is the culturally ingrained beliefs that underpin management practices and policies Tracing the evolution of the highly contestable assumptions that define the human wildlife relationship Foran stresses the price wild animals pay for human self interest Using several examples of government oversight at the federal provincial and territorial levels from the Species at Risk Act to the Biodiversity Strategy Protected Areas Network and provincial management plans this volume shows that wildlife policies are as much or more about human needs priorities and profit as they are about preservation Challenging established concepts including ecological integrity adaptive management sport hunting as conservation and the flawed belief that wildlife is a renewable resource the author compels us to recognize animals as sentient individuals and as integral components of complex ecological systems A passionate critique of contemporary wildlife policy *The Subjugation of Canadian Wildlife* calls for belief change as the best hope for an ecologically healthy wildlife rich Canada

The Rediscovery of the Wild Peter H. Kahn, Jr., Patricia H. Hasbach, 2013-01-25 A compelling case for connecting with the wild for our psychological and physical well being and to flourish as a species We often enjoy the benefits of connecting with nearby domesticated nature a city park a backyard garden But this book makes the provocative case for the necessity of connecting with wild nature untamed unmanaged not encompassed self organizing and unencumbered and unmediated by technological artifice We can love the wild We can fear it We are strengthened and nurtured by it As a species we came of age in a natural world far wilder than today's and much of the need for wildness still exists within us body and mind *The Rediscovery of the Wild* considers ways to engage with the wild protect it and recover it for our psychological and physical well being and to flourish as a species The contributors offer a range of perspectives on the wild discussing such topics as the evolutionary

underpinnings of our need for the wild the wild within including the primal passions of sexuality and aggression birding as a portal to wildness children s fascination with wild animals wildness and psychological healing the shifting baseline of what we consider wild and the true work of conservation *Game in the Garden* George Colpitts,2010-10-01 Frontier and pioneer societies provide numerous unexplored avenues of social history *Game in the Garden* identifies the imaginative use of wild animals in early western society In what is now western Canada humans have long used wildlife in order to survive their surroundings better understand their natural world and form aspects of their identity The shared use of wild animals has helped to determine social relations between Native peoples and newcomers In later settlement periods controversy about subsistence hunting and campaigns of local conservation associations drew lines between groups in communities particularly Native peoples immigrants farmers and urban dwellers In addition to examining grassroots conservation activities Colpitts identifies early slaughter rituals iconographic traditions and subsistence strategies that endured well into the interwar years in the twentieth century Drawing primarily on local and provincial archival sources he analyzes popular meanings and booster messages discernible in taxidermy work city nature museums and promotional photography Environmental historians Native studies specialists history students conservationists nature enthusiasts and general readers alike will find fascinating how western attitudes to wild animals changed according to subsistence and economic needs and how wildlife helped to determine the social relations among people in western Canada **Conservation and Environmentalism** Robert C. Paehlke,2013-04-03 Focusing on both problems and solutions this authoritative reference work maintains a healthy balance between science and the social sciences in its coverage of all aspects of the environment The book is arranged alphabetically and is divided into three major sections Ecology Pollution and Sustainability The list of 240 contributors reads like a who s who of the world s leading conservation and environmental professionals Best Reference Source Outstanding Reference Source *Conservation and Environmentalism* Robert Paehlke,1995 Focusing on problems and solutions this authoritative reference work covers all aspects of the environment from the Everglades to the Himalayas from legislation in Australia to pollution problems in Eastern Europe from tropical rain forests to the Porcupine Caribou herd of the Alaskan and Canadian Arctic Some of the best known environmental professionals from 14 countries around the world have written original articles for this multidisciplinary Encyclopedia including Norman Myers Eugene C Hargrove Reed F Noss Max Oelschlaeger J Baird Callicott George Sessions M S Swaminathan Gilbert F White Michael E Kraft Michael P Cohen Paul Ekins and many others BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *The Oxford Handbook of Animal Studies* Linda Kalof,2017-02-01 Intellectual struggles with the animal question how humans can rethink and reconfigure their relationships with other animals first began to take hold in the 1970s Over the next forty years scholars from a wide range of fields would make sweeping reevaluations of the relationship between humans and other animals The Oxford Handbook of Animal Studies brings these diverse evaluations together for the first time paying special attention to the

commodification of animals the degradation of the natural world and a staggering loss of animal habitat and species extinction and the increasing need for humans to coexist with other animals in urban rural and natural contexts Linda Kalof maps these themes into the five major categories that structure this volume Animals in the Landscape of Law Politics and Public Policy Animal Intentionality Agency and Reflexive Thinking Animals as Objects in Science Food Spectacle and Sport Animals in Cultural Representations and Animals in Ecosystems Written by international scholars with backgrounds in philosophy law history English art sociology geography archaeology environmental studies cultural studies and animal advocacy the thirty chapters in this handbook investigate key issues and concepts central to understanding our current relationship with other animals and the potential for coexistence in an ecological community of living beings **The**

Natural Alien Lorne Leslie Neil Evernden, 1993-01-01 In this eloquent and sympathetic book Evernden evaluates the international environmental movement and the underlying assumptions that could doom it to failure Beginning with a simple definition of environmentalists as those who confess a concern for the non human he reviews what is inherent in industrial societies to make them so resistant to the concerns of environmentalists His analysis draws on citing such diverse sources as Merleau Ponty Heidegger and TIME and examines how we tend to think about the world and how we might think about it The book does not offer solutions to environmental questions but it does offer the hope that there can be new ways of thinking and flexibility in human environmental relations Although humans seem alienated from our the natural world we can develop a new understanding of self in the world The second edition has a new preface and an epilogue in which Evernden analyses the latest environmental catch phrase sustainable development **Natural Selections** Alan Andrew MacEachern, 2001 During the Depression the Canadian National Parks Branch was under pressure to make the park system truly national to bring the advantages of parks to all provinces In Atlantic Canada however it found itself dealing with an environment that was far different from what it was accustomed to in Western Canada The land areas were smaller flatter and having been settled for generations could hardly be considered wild Wildlife was smaller and less numerous

Canadian Issues in Environmental Ethics Wesley Cragg, Allan Greenbaum, Alex Wellington, 1997-06-10 Is it possible to design a forest policy that satisfies ethical and environmental concerns and is acceptable to business labour and First Nations representatives What is the best path through the tangle of ethical issues surrounding the collapse of the east coast fishery What sort of obligations does a rich nation such as Canada have to satisfy the claims of global environmental justice These are the sorts of issues in applied ethics that are tackled in this collection of essays the vast majority of which have been written especially for this volume It is the first Canadian collection of its kind The book is divided into sections detailing with such topics as the environment and the economy ethical issues relating to non human animals issues of gender and issues relating to native peoples Most of the authors are philosophers though specialists in geography geology and the social sciences are also among the contributors Frequent reference is made to theoretical ethical concerns but the focus

throughout is on applied ethics and a variety of case studies are included Examples include essays on animal rights and the case of native hunters surface mining in Northern Ontario the Quebec arctic and fishing communities in the Maritimes Comparisons are frequently drawn to policies and ethical questions arising in other countries most prominently the United States **Canada's Storytellers | Les grands écrivains du Canada** Andrew David Irvine,2021-03-24 For over three quarters of a century the Governor General's Literary Awards have been awarded annually in a variety of evolving categories Fifteen Governors General have served as their patron The impressive list continues to grow apace between 1936 and 2018 the awards recognized 719 books in English and French and have been presented to 580 authors illustrators and translators This beautifully illustrated bilingual compendium presents the biographies of all 580 award laureates many accompanied by stunning archival portraits This is the final instalment in Andrew Irvine's remarkable and comprehensive research into what has become a touchstone of Canada's literary culture Together with Canada's Best and The Governor General's Literary Awards of Canada A Bibliography this work provides readers with a definitive overview of this literary prize By itself Canada's Storytellers is an invaluable reading companion for anyone wanting to be introduced to many of our most influential authors illustrators and translators working in both French and English over the past decades It belongs on the shelf of every enthusiast of Canadian literature Bilingual edition Bayou Sauvage National Wildlife Refuge (N.W.R.) Master Plan ,1994

The Love of Nature and the End of the World Shierry Weber Nicholzen,2003-02-28 A psychological exploration of how the love of nature can coexist in our psyches with apathy toward environmental destruction Virtually everyone values some aspect of the natural world Yet many people are surprisingly unconcerned about environmental issues treating them as the province of special interest groups Seeking to understand how our appreciation for the beauty of nature and our indifference to its destruction can coexist in us Shierry Weber Nicholzen explores dimensions of our emotional experience with the natural world that are so deep and painful that they often remain unspoken The Love of Nature and the End of the World is a gathering of meditations and collages Its evocations of our emotional attachment to the natural world and the emotional impact of environmental deterioration are meant to encourage individual and collective reflection on a difficult dilemma Nicholzen draws on work in environmental philosophy and ecopsychology the writings of psychoanalytic thinkers such as Wilfred Bion Donald Meltzer and D W Winnicott and ideas from Buddhist and Sufi traditions She shows how our emotional responses to the vulnerabilities of the natural world range from intense caring and compassion through grief and outrage to diffuse depression Individual chapters focus on silence and the process whereby we move from the unspoken to the spoken the love of nature the perceptual reciprocity with the natural world to which we might mature beauty in the human and natural realms the psychological impact of the destruction of the natural world and reflections on the future

Radical Ecopsychology, Second Edition Andy Fisher,2013-01-01 Expanded new edition of a classic examination of the psychological roots of our ecological crisis
