Urban Cascadia and the Pursuit of Environmental Justice Nik Janos, Corina McKendry, 2021-10-26 How histories of environmental inequalities and settler colonialism undercut a famously green region In Portland's harbor environmental justice groups challenge the EPA for a more thorough cleanup of the Willamette River Near Olympia the Puyallup assert their tribal sovereignty and treaty rights to fish Seattle housing activists demand that Amazon pay to address the affordability crisis it helped create Urban Cascadia the infrastructure social networks built environments and non human animals and plants that are interconnected in the increasingly urbanized bioregion that surrounds Portland Seattle and Vancouver enjoys a reputation for progressive ambitions and forward thinking green urbanism Yet legacies of settler colonialism and environmental inequalities contradict these ambitions even as people strive to achieve those progressive ideals In this edited volume historians geographers urbanists and other scholars critically examine these contradictions to better understand the capitalist urbanization of nature the creation of social and environmental inequalities and the movements to fight for social and environmental justice Neither a story of green disillusion nor one of green boosterism *Urban Cascadia and the Pursuit of Environmental Justice* reveals how the region can address broader issues of environmental justice Indigenous sovereignty and the politics of environmental change

The Infrastructure of Play Dennis R. Judd, 2015-02-12 Using in depth case studies this volume shows how the infrastructure of tourism has transformed cities throughout North America It makes clear that the modern urban environment is being thoroughly altered to emphasize the growing tourism sector in such areas as renovated waterfronts

Gaining Ground Nancy S. Seasholes, 2018-04-13 Why and how Boston was transformed by landmaking Fully one sixth of Boston is built on made land Although other waterfront cities also have substantial areas that are built on fill Boston probably has more than any city in North America In *Gaining Ground* historian Nancy Seasholes has given us the first complete account of when why and how this land was created The story of landmaking in Boston is presented geographically each chapter traces landmaking in a different part of the city from its first permanent settlement to the present Seasholes introduces findings from recent archaeological investigations in Boston and relates landmaking to the major historical developments that shaped it At the beginning of the nineteenth century landmaking in Boston was spurred by the rapid growth that resulted from the burgeoning China trade The influx of Irish immigrants in the mid nineteenth century prompted several large projects to create residential land not for the Irish but to keep the taxpaying Yankees from fleeing to the suburbs Many landmaking projects were undertaken to cover tidal flats that had been polluted by raw sewage discharged directly onto them removing the pestilential exhalations thought to cause illness Land was also added for port developments public parks and transportation facilities including the largest landmaking project of all the airport A separate chapter discusses the technology of landmaking in Boston explaining the basic method used to make land and the changes in its

various components over time The book is copiously illustrated with maps that show the original shoreline in relation to today's streets details from historical maps that trace the progress of landmaking and historical drawings and photographs

Global Port Cities in North America Boris Vormann, 2014-11-27 As the material anchors of globalization North America's global port cities channel flows of commodities capital and tourists This book explores how economic globalization processes have shaped these cities political institutions social structures and urban identities since the mid 1970s Although the impacts of financialization on global cities have been widely discussed it is curious that how the global integration of commodity chains actually happens spatially creating a quantitatively new global organization of production distribution and consumption processes remains understudied The book uses New York City Los Angeles Vancouver and Montreal as case studies of how once redundant spaces have been reorganized and crucially reinterpreted so as to accommodate new flows of goods and people and how in these processes social environmental and security costs of global production networks have been shifted to the public

Vancouver in the early decades of the 20th century a young city experiencing a turbulent adolescence Louis Taylor or LD as he was known arrived in Vancouver from Chicago in 1896 at the age of 39 He got involved in the newspaper business first as an executive with The Daily Province then as proprietor of The World during which time he built the World Tower which remains one of Vancouver's landmark buildings now better known as the Sun Tower He launched his political career in 1902 when he ran successfully for licence commissioner it was the first of 26 civic elections in which he ran including 20 for mayor In his early political life he was considered the workers friend and was opposed by the city's business elite who portrayed him as corrupt He also had a reputation for being soft on crime and was implicated in a 1928 police investigation that lost him an election But his achievements included the establishment of the airport a town planning commission and the water board His private life however was another story a virtual soap opera that mirrored the ups and downs of his political career his wife was addicted to opium and he found himself mired in bigamy and divorce scandals As Vancouver grew from small frontier town to a major international port city LD saw the city through the Depression and in a sense Vancouver grew up under his tutelage LD Mayor Louis Taylor and The Rise of Vancouver vividly documents the life of a man who dominated the city for years *The Canadian Historical Review*, 1920 Includes section Recent publications relating to Canada

Vancouver's Glory Years Heather Conn, Henry Ewert, 2003 This book reveals one of the greatest eras in Vancouver's history an era before automobiles when people regardless of race religion or social status rode together in the same shared vehicles From the 1890s to 1915 state of the art electric street cars and interurbans carried citizens from downtown to the farthest reaches of the Lower Mainland Vancouver's early people's vehicles with affordable fares carved an exciting new future for the city of 10 000 residents who otherwise had only their feet a bicycle or a costly horse and carriage ride for transportation through the muddy urban streets The way the city developed was dependent on public transit and even modern transit is very much indebted to the earliest plans As well as a history of transit this book explores the dramatic ways Vancouver was changing at the turn of the 20th century It reveals the individuals and the groups who were involved in carving the city from the wilderness and creating a glamorous metropolis Over 150 archival images of classic streetcars and conductors city streets and buildings reveal Vancouver as it was then *Canadiana*, 1985 **SPAFA Journal**, 1991
