Familial Cancer:

Familial Cancer H. Müller, W. Weber, 1985-12-03 Familial Cancer and Prevention Joji Utsunomiya, John J. Mulvihill, Walter Weber, 1999-04-27 A New Strategy Toward Cancer Control Still in its infancy the familial hereditary approach to cancer control is proving to be one of the most potent strategies in the war on cancer Over the past few years the human genome project has generated an abundance of valuable information on the genetic origins of a range of cancers Tests now exist for several hereditary tumor promoting genetic mutations including those found in BRCA genes associated with breast cancer as well as mutations of HNPCC genes which have been linked to colon cancers and many more are anticipated in the near future Armed with the information yielded by these tests physicians have already saved countless lives through preventative counseling early detection and more highly focused intervention strategies Inspired by the proceedings of the UICC 1997 Symposium on Familial Cancer and Prevention held in Kobe Japan this volume provides clinicians and researchers with a detailed review of the latest developments at the front lines of the familial cancer prevention movement In a series of edited contributions leading researchers and clinicians from around the globe summarize their experiences and analyze current and emerging trends in Information gathering and history taking Risk assessment Genetic testing for colorectal endocrine breast and other familial cancers Diagnosis prognosis and management of an array of familial cancers Genetic counseling for familial cancers Up to date authoritative and comprehensive Familial Cancer and Prevention is an important working resource for clinicians cancer researchers and epidemiologists **Familial Cancer Management** Walter Weber, John J. Mulvihill, M.D., Steven A. Narod, 1996-01-24 Familial Cancer Management addresses familial cancer patterns a rapidly expanding field of investigation resulting from recent significant advances in molecular genetics It encompasses etiological and pathological aspects of familial cancer clustering the description of frequent and important family syndromes diagnostic procedures and principles of counseling prevention and management This unique and thorough text also discusses important ethical and legal issues and identifies familial cancer assessment services Familial Cancer Management is written for health care professionals enabling them to identify and manage familial cancer occurrences Familial Cancer Control Walter Weber, 2012-12-06 The European School of Oncology came into existence to respond to a need for information education and training in the field of the diagnosis and treatment of cancer There are two main reasons why such an initiative was considered necessary Firstly the teaching of oncology requires a rigorously multidisciplinary approach which is difficult for the Universities to put into practice since their system is mainly disciplinary orientated Secondly the rate of technological development that impinges on the diagnosis and treatment of cancer has been so rapid that it is not an easy task for medical faculties to adapt their curricula flexibly With its residential courses for organ pathologies and the seminars on new techniques laser monoclonal antibodies imaging techniques etc or on the principal therapeutic controversies conservative or mutilating surgery primary or adjuvant chemotherapy radiotherapy alone or

integrated it is the ambition of the European School of Oncology to fill a cultural and scientific gap and thereby create a bridge between the University and Industry and between these two and daily medical practice One of the more recent initiatives of ESO has been the institution of permanent study groups also called task forces where a limited number of leading experts are invited to meet once a year with the aim of defining the state of the art and possibly reaching a consensus on future developments in specific fields of oncology
