Chronically Ill Children and Their Families Nicholas Hobbs, James M. Perrin, Henry T. Ireys, 1985 Families Living with Chronic Illness and Disability Paul W. Power, Arthur E. Dell Orto, 2004-07-20 To help families manage an intense medical related event Power and Dell Orto propose that a family oriented life and living perspective should be combined with a family intervention philosophy Stressing acknowledgment of the adverse effects of the illness and an affirmation approach to family struggle and opportunities the authors explore issues relevant to treatment family adaptation quality of life and family survival A unique feature of the text includes the organization of the chapters around thought provoking personal statements followed by questions experiential tasks designed to stimulate thought and discussion This book is must reading for health and allied health professionals including physicians nurses rehabilitation counselors social workers psychologists and family advocates and will serve as a useful textbook for professionals in training Families, Illness, And Disability John Rolland, 1994-06-09 Practitioners will learn how to help families live well despite physical limitations and the uncertainties of threatened loss how to encourage empowering rather than shame based illness narratives how to rewrite rigid caregiving scripts how to encourage intimacy and maximize autonomy for all family members In the Shadow of Illness Myra Bluebond-Languer, 2020-06-30 A revealing account of how families adapt to living with a chronically ill child What is it like to live with a child who has a chronic life threatening disease What impact does the illness have on well siblings in the family Myra Bluebond Languer suggests that understanding the impact of the illness lies not in identifying deficiencies in the lives of those affected but in appreciating how family members carry on with their lives in the face of the disease s intrusion The Private Worlds of Dying Children Bluebond Languer's previous book now considered a classic in the field explored the world of terminally ill children In her new book she turns her attention to the lives of those who live in the shadow of chronic illness the parents and well siblings of children who have cystic fibrosis Through a series of narrative portraits she draws us into the daily lives of nine families of children at different points in the natural history of the illness from diagnosis through the terminal phase In these portraits as family members talk about their experiences in their own words we see how parents well siblings and the ill children themselves struggle in different ways to contain the intrusion of the disease into their lives Bluebond Langner looks at how parents adjust their priorities and their idea of what constitutes a normal life how they try to balance the needs of other family members while carring for the ill child and how they see the future This context helps us understand how well siblings view the illness and how they relate to their ill sibling and parents Since the issues raised are not unique to cystic fibrosis but are common to other chronic and life threatening illnesses this book will be of interest to all who study care for or live with the seriously ill **How Do Families Cope with Chronic Illness?** Family Research Consortium. Wright, Maureen Children, Families and Chronic Disease Roger Bradford, 2002-01-04 Chronic childhood disease brings Leahev, 1987 psychological challenges for families and carers as well as the children Roger Bradford explores how they cope with these challenges the psychological and social factors that influence outcomes and the ways in which the delivery of services can be improved to promote adjustment Drawing on concepts from health psychology and family therapy the author proposes a multi level model of care which takes into account the child the family and the wider care system and how they interrelate and influence each other Family Therapy and Chronic Illness, Treatment for the chronically ill has traditionally focused on physical factors and symptoms despite the fact that chronic illness also affects life in an emotional and spiritual way The approach toward treatment described in this volume addresses all aspects of a patient s life including their interpersonal experiences and relationships presenting family therapists and family physicians as part of the same treatment team This volume thus provides a foundation for understanding the role illness plays in family systems. The meaning an individual gives to an illness is profoundly influenced by and influences that person s social world In turn social culture and social networks both shape and are shaped by the individual s experiences Exploring how the meaning of chronic illness is defined tells us much about the individual s interpersonal relations and the resultant meaning given to the person s illness As a consequence family therapy must be an integral part of the treatment plan for chronically ill patients Family Therapy and Chronic Illness

approaches chronic illness from a leading edge perspective This approach enables therapists to listen attentively to complicated narratives Because these stories feelings and emotions are difficult to describe the clients have demanding telling tasks while therapists have demanding listening tasks This book sends an important message not just about the chronically ill but also about their families therapists and doctors and how they can work together to develop the best treatment plan possible Joan D Atwood is the director and founder of Marriage and Family Therapists of New York and Professor of Marriage and Family Therapy at Hofstra University Concetta Gallo is an associate in the Office of Higher Education at the New York State Education Department in New York City How Do Families Cope With Chronic Illness? Robert E. Cole, David Reiss, 2013-05-13 Because chronic disorder is becoming an ordinary feature of family life and development understanding its impact has become critical This volume and the conference proceedings it reports represents a major effort to examine the family s response to chronic physical or psychopathological illness in one or more of its members Recent data are revising our notions of chronic illness Evidence is mounting that chronic psychiatric disorders reflect in part abnormalities of brain structure and function In this sense they are in part medical disorders On the other hand a number of traditionally labeled medical disorders produce a broad range of psychological symptoms and are exquisitely sensitive to psychosocial influences Families undergo a complex process of adaptation during which their response to stress and their fundamental beliefs about learning and parenting change These beliefs endure and are difficult to alter By examining the processes in a wide range of chronic conditions this volume helps to identify the common underlying processes of adaptation The first three chapters concern the families responses to disorders that are distinctly medical the next three focus on families responses to grey zone disorders or anomalies that appear early in life minor physical anomalies and communication handicaps and one chapter focuses exclusively on schizophrenia The last chapter reflects an effort to develop a model based on the experience of researchers with both psychiatric and medical illness

Death and Chronic Illness in the Family Peter Titelman, Sydney K. Reed, 2018-07-27 What does it mean to be present and accounted for when a family member is facing chronic illness or death How does one define a self in relation to the ill or dying member and the family Rooted in Murray Bowen's family systems theory this edited volume provides conceptual ideas and applications useful to clinicians who work with families facing chronic illness or the death of a member The text is divided into four parts Part I provides a detailed overview of Bowen's theory perspectives on chronic illness and death and includes Murray Bowen's seminal essay Family Reaction to Death In Parts II and III chapter authors draw upon Bowen theory to intimately explore their families reactions to and experiences with death and chronic illness The final part uses case studies from contributors clinical practices to aid therapists in using Bowen systems perspectives in their work with clients The chapters in this volume provide a rich and broad range of clinical application and personal experience by professionals who have substantial knowledge of and training in Bowen theory Death and Chronic Illness in the Family is an essential

Mcdaniel, Jeri Hepworth, William J. Doherty, H. Mcdaniel, 2009-08-05. In the narrative of every human life and family illness is a prominent character Even if we have avoided serious illness ourselves we cannot escape its reach into our circle of family and friends Illness brings us closer to one another through caregiving and separates us through disability and death yet little attention has been paid to personal and family illness in psychotherapy Rather therapists tend to focus on the psychosocial realm leaving the biological realm to other physicians and nurses Susan H McDaniel Jeri Hepworth and William J Doherty invited therapists who work with individuals and families experiencing chronic illness and disability to describe clinical cases that illustrate their approach to medical family therapy Contributors then were asked to share a personal story about their experiences with illness and to explain how those experiences affect the way they work with their clients Vivid case studies dealing with a range of illnesses including cancer infertility schizophrenia AIDS heart disease diabetes asthma and multiple sclerosis show how the therapists own experiences of illness are relevant to their care of others and how these experiences can be used to form a healing bond in therapy Poignant honest and illuminating The Shared Experience of Illness allows us to understand more fully the relationship between the personal and the professional **Children and Families in Health** and Illness Marion E.
