Families in East and West Reuben Hill, René König, 2020-03-09 No detailed description available for Families in East and West **Families in East and West** Reuben Hill, René König, 1970 The family life cycle in European societies Jean

Cuisenier, 2019-07-22 No detailed description available for The family life cycle in European societies Families in East and West René König, 1970 **Family Dynamics and Intergenerational Relations** Sunil K. Verma, A.

Satyanarayana, 2018-01-01 Indian society is at the crossroad between the dynamism of modernization and stability of tradition This is best reflected in the changing nature of intergenerational relations IGR in Indian families The changes have attracted widespread attention from policy makers to public intellectuals with some vociferously opposing the effects of modernity and some supporting the shift as rise of the individual This book is a psychological mapping of interactions and relationships among different generations in terms of attitudes beliefs values and familial role obligations The integration of psychological anthropological and sociological perspectives enriches the content and provides a holistic view to readers

Cross-cultural Perspectives on Families, Work, and Change Katja Boh, Giovanni B. Sgritta, Marvin B. Sussman, 1989 An intriguing study on families and their changing roles Cross Cultural Perspectives on Families Work and Change provides fresh viewpoints on factors that have an impact on family life and relationships This thematic volume with chapters from scholars in Italy Australia Israel Jordan West Germany Yugoslavia Norway and Finland is truly international and covers a variety of substantive concerns Among these is the concern for new familial models which will meld both the individual and the whole into a viable family entity capable of providing for the wishes needs and aspirations of the whole and individual members of a family Discussing various concepts relating to family structure in lieu of the recent shift toward gender equity and the greater acceptance of varied forms of families and lifestyles this book carefully links the most supportive and nurturing components of modern society with tried and true components of traditional cultures and systems The chapters take a conceptual approach focusing on applications and future needs policies and problems surrounding the family Cross Cultural Perspectives on Families Work and Change represents the increasing shift of mothers to professionals with chapters on increasing female employment and its effect on family life The much needed search for explanations of family and society change and for new family models is a common thread throughout the book In reading this insightful work family and marriage counselors students and academicians in family studies researchers social workers and psychologists will see new ways of perceiving families in their critical roles over generations of time **Caregiving Systems** Steven H. Zarit, Leonard I. Pearlin, K. Warner Schaie, 2019-02-21 Caregiving has emerged as a critical issue in the second half of the life cycle With the growth of the older population there have been dramatic increases in the number of people needing care and assistance The responsibility for care typically falls on families at a time when they have limited resources to meet these needs At a societal level the need for care for growing numbers of disabled elders poses a major challenge for how to organize supportive

services in an efficient and responsive system Bringing together multiple perspectives on caregiving the authors explore informal and formal family caregiving and the pivotal issue of how these systems interface and interact An overview of this variation is provided by examining family caregiving from three perspectives the effects of culture on helping patterns and family responsibility how different disabilities affect patterns of family care and longitudinal perspectives on the impact that caregiving has on family members

Family Development in Three Generations Reuben Hill, 2017-07-12 Family Development in Three Generations is an unusual kind of multi generational gathering the result of a massive in depth research effort It is based upon Hill s personal interviews conducted with over 300 families during the course of a year The discussion results from these interviews from the statistical information that they produced and from Hill s consultation with five other fellow researchers This scholarly contribution to the family field thoroughly analyzes the complexities of the modified generational network As a multi generational study it is pervaded by the vigorous spirit that usually characterizes such research In his preface to Family Development in Three Generations Reuben Hill invites the reader to drop in on any generational gathering where you will hear how much better or worse life was in grandfather s day than today Such discussions are usually controversial and center upon shared experiences Such rhetoric polemic and energy sustain conversations among generations Family Development in Three Generations penetrates to the life center of intimate change in American society It is a wide ranging volume that presents varied and highly significant insights into many fields Scholars will find it a vital contribution to their knowledge of the subject and laymen will find it full of valuable information that they can profitably apply to their own families The work is widely recognized as a classic in longitudinal analysis of family life

The Human Meaning of Social Change Angus and Converse, Philip E. Campbell, Angus Campbell, Philip E. Converse, 1972-03-30 This book is a companion piece to Sheldon and Moore s Indicators of Social Change Whereas Indicators of Social Change was concerned with various kinds of hard data typically sociostructural this book is devoted chiefly to so called softer data of a more social psychological sort the attitudes expectations aspirations and values of the American population The book deals with the meaning of change from two points of view First it is interested in the human meaning which people attribute to the complex social environment in which they find themselves their understanding of group relations the political process and the consumer economy in which they participate Secondly it discusses the impact that the various alternatives offered by the environment have on the nature of their lives and the fulfillment of those lives The twelve essays which make up the volume deal successively with the major domains of life Each author sets forth an inclusive statement of the most significant dimensions of psychological change in a specific area of life to review the state of present information and to project the measurements needed to improve understanding of these changes in the future

Convergence or Divergence? Simon Langlois, Theodore Caplow, 1994-11-16 Trends in fertility decline intergenerational relations religion and secularization ecological movements employment and labour market changes personal authority and

social conflict are examined This analysis shows an unmistakable convergence of social trends except in the domain of religion But when the interconnection of these trends within each national society is examined unexpected divergences are revealed There are parallel trends in demography organization of production national institutions social practices and life style and divergent trends in social inequality social movements and local institutions Barriers between social classes have eroded and something that might be called multidimensional stratification has emerged the diminution of violence in social conflicts implies an increasing volume of negotiation and all forms of personal authority have been weakened The transformation of the family structure is no doubt one of the most important changes in western civilization The cross national analyses of recent social trends help us to assess both convergence and divergence and to identify emergent singularities Does convergence of trends mean these societies face a common destiny With respect to trends so strong that they act as exogenous variables the answer is yes However with respect to the responses those trends elicit in the context of a particular society the answer is no Massive convergence of trends does not mean that societies face a uniform future

The Partition Motif in Contemporary Conflicts Smita Tewari Jassal,Eyal Ben-Ari,2007-01-12 Papers presented at the Conference on Memory and the Partition Motif in Contemporary Conflicts held in July 2005 **Housing and Family**

Wealth Ray Forrest,Alan Murie,2025-11-18 Originally published in 1995 this innovative collection provides a multidisciplinary and cross national perspective on the links between housing personal wealth and the family in contemporary society Reasserting the role of the family and informal networks in housing provision it counteracts a tendency to view housing issues in the narrow terms of market and state provision The contributions include analyses from the USA Japan Hong Kong Greece France Sweden and Hungary and this highly international perspective allows the book to address important policy questions and offer new theoretical insights into the way housing is embedded in the wider social structure By moving away from the more usual highly ethnocentric discussion of today s housing issues the book aims to provide a more sociological account of the relationship between housing and wealth and the social structures within which that relationship is founded Today it can be read in its historical context **Japanese Management in Evolution** Tsutomu

Nakano,2017-07-20 Japanese Management in Evolution illustrates the significant changes that have been taking place in Japanese business by focusing on emerging industries in the relatively neglected service and creative sectors as well as other key industries and to put those changes in historical perspective by providing an overview of business development since World War II By employing state of the art research techniques and unconventional innovative approaches in analysing Japanese management including network and discourse analysis ethnographic explorations and more the book reveals historical developments and in depth analyses of established and emerging composition of sectors and industries where cultural capital matters Throughout the book the common theme conveyed to readers is a consistently strong message that the change is ongoing and the evolution of management style is real in the Japanese context The book would be of great

interest to researchers academics and practitioners in fields of global management international management and Asian capitalism

Marriage, Work, and Family Life in Comparative Perspective Noriko O. Tsuya, Larry L. Bumpass, 2003-12-31

When we compare Eastern and Western societies we find similar economic and social forces at work But the impact of these on family life reflects differences in cultural history and social context This volume examines family change in Korea Japan and the United States allowing us to contrast the collective emphasis of a Confucian social heritage with the individualism of the West An impressive group of demographers and family sociologists considers such questions as How do family patterns vary within countries and across societies How essential are marriage and parenthood How do levels of contact between middle aged adults and their parents who live elsewhere differ in East Asian countries and the U S How does female employment vary based on family factors and do these factors affect employment across societies Policy makers and demographic and family researchers both in the U S and Asia will find this book a vital resource for understanding the dynamics of family life in contrasting modern societies Contributors Larry L Bumpass Yong Chan Byun Minja Kim Choe Karen Oppenheim Mason Ronald R Rindfluss Noriko O Tsuya

Family and Support Systems across the Life Span Suzanne K. Steinmetz, 2013-06-29

A Delicate Choreography David Sabeen, 2023-10-24 The origins of the incest taboo have puzzled many of the most influential minds of the West from Plutarch to St Augustine St Thomas Aquinas Martin Luther David Hume Lewis Henry Morgan Sigmund Freud Emile Durkheim Edward Westermarck and Claude Lévi Strauss This book puts the discussion of incest on a new foundation It is the first attempt to thoroughly examine the rich literature from philosophical theological and legal treatises to psychological and biological genetic studies to a wide variety of popular

cultural media over a long period of time The book offers a detailed examination of discursive and figurative representations of incest during five selected periods from 1600 to the present The incest discussion for each period is complemented with a presentation of dominant kinship structures and changes without arguing for causal relations Part I deals with the legacy of ecclesiastical marriage prohibitions of the Middle Ages Historians dealing with the Reformation have wondered about the political and social implications of theological debates about the incest rules the Enlightenment opted for sociological considerations of the household and a new anthropology based on the passions Baroque discourse focused upon sexual relations among kin by marriage while Enlightenment and Romantic discussions worried the intimacy of siblings The first section of Part II deals with the six decades around 1900 during which European and American cultures obsessed about the sexuality of women Almost everyone concurred in the idea that mother made the family what it was that she configured the household kept the lines of kinship vibrant and stood at the threshold as stern gatekeeper and many thought that she managed these tasks through her sexuality and an eroticized relationship with sons Another story line taken up in the section Intermezzo this one about the physical and mental consequences of inbreeding appeared after 1850 To what extent do close kin marriages pose risks for progeny At its center lay the incest problematic now restated Is avoidance of kin genetically programmed Do all cultures know about risks of consanguinity As for the twenty first century evolutionary and genetic assumptions are challenged by a living world population containing roughly one billion offspring of cousin marriages Part III deals with one of the perhaps most remarkable reconfigurations of Western kinship in the aftermath of World War I The shift from an endogamous to an exogamous alliance system centered on the nuclear family An historical anomaly this family form began to dissolve almost as soon as it came together and in the process shifted the focus of incest concerns to a new pairing father and daughter By the 1970s when the father daughter problematic swept all other considerations of incest aside that relationship had come to be modeled for the most part around power and its abusive potential As for incest its representations in the last three decades of the twentieth century no longer focused on biologically damaged progeny but rather on power abuses in the nuclear family sexual abuse By the mid 1990s Western culture at least partly redirected its gaze away from father and daughter towards siblings especially towards brothers and sisters and the sexual boundaries and erotics of their relationships Correspondingly siblings became a model organism for psychotherapy evolutionary biology and the science of genetics
