Economic Restructuring and Family Well-Being in Rural America Kristin E. Smith, Ann R. Tickamyer, 2011-01-01 Rural areas have been hit hard by economic restructuring Traditionally male jobs with good pay and benefits such as in manufacturing have declined dramatically only to be replaced with low paying service oriented jobs jobs that do not offer benefits or wages sufficient to raise a family Concurrently rural areas have experienced changes in family life namely an increase in women s labor force participation a decline in married couple families and a rise in cohabitation and single parent families How have rural families coped with these social and economic changes Economic Restructuring and Family Well-Being in Rural America documents the intertwined changes in employment and family and explores the outcomes for family well being in rural America Here a multidisciplinary group of scholars examines the impacts of economic restructuring on rural Americans and provides policy recommendations for addressing the challenges they face In addition to the editors the contributors are Cynthia D Anderson Guangqing Chi Alisha Coleman Jensen Katherine Jewsbury Conger Nicole D Forry Deborah Roempke Graefe Steven Michael Grice Andrew Hahn Debra Henderson Eric B Jensen Leif Jensen Marlene Lee Daniel T Lichter Elaine McCrate Diane K McLaughlin Margaret K Nelson Domenico Parisi Liliokanaio Peaslee Jed Pressgrove Jennifer Sherman Anastasia Snyder Susan K Walker and Chih Yuan Weng Global Aging and Challenges to Families Vern Bengtson, 2018-01-16 The recent explosion in population ageing across the globe represents one of the most remarkable

demographic changes in human history Population ageing will profoundly affect families Who will care for the growing numbers of tomorrows very old members of societies Will it be state governments The aged themselves Their families The purpose of this book is to examine consequences of global aging for families and intergenerational support and for nations as they plan for the future

Global Aging and Its Challenge to Families Vern L. Bengtson, Ariela Lowenstein, The recent explosion in population aging across the globe represents one of the most remarkable demographic changes in human history There is much concern about population aging and its consequences for nations for governments and for individuals It has often been noted that population aging will inevitably affect the economic stability of most countries and the policies of most state governments What is less obvious but equally important is that population aging will profoundly affect families Who will care for the growing numbers of tomorrow s very old members of societies Will it be state governments The aged themselves Their families The purpose of this volume is to examine consequences of global aging for families and intergenerational support and for nations as they plan for the future Four remarkable social changes during the past fifty years are highlighted

- 1 Extension of the life course A generation has been added to the average span of life over the past century
- 2 Changes in the age structures of nations Most nations today have many more elders and many fewer children than fifty years ago
- 3 Changes in family structures and relationships Some of these differences are the result of trends in family structure notably higher divorce rates and the higher incidence of childbearing to single parents
- 4 Changes in governmental responsibilities In the last decade governmental responsibility appears to have slowed or reversed as states reduce welfare expenditures How will families respond to twenty first century problems associated with population aging Will families indeed be important in the twenty first century or will kinship and the obligations across generations become increasingly irrelevant replaced by personal communities This volume goes a considerable distance to answer these critical issues for the twenty first century

How Families Still Matter Vern L. Bengtson, Timothy J. Biblarz, Robert E. L. Roberts, 2002-10-17 *How Families Still Matter* casts doubt on the conventional wisdom about family decline during the last decades of the twentieth century The authors draw from the longest running longitudinal study of families in the world the

Longitudinal Study of Generations conducted at the University of Southern California to discover whether parents are really less critical in shaping the life choices and achievements of their children than they were a generation ago They compare the influence of parents on self confidence values and levels of achievement on the Baby Boomer generation with that of Baby Boomer parents on their own Generation X children The findings may surprise many readers Generation X youth showed higher levels of education career attainments and self esteem than their parents as youth and similar values were found across generations They indicate the resilience of family bonds across generations even against the backdrop of massive social and family changes since the 1960s Resources in Education ,1997 *Kinship and Cohort in an Aging Society* Merrill Silverstein,Roseann Giarrusso,2013-09-01 According to family sociologist Vern Bengtson generations within families are important sources of influence change and development Kinship and Cohort in an Aging Society brings together scholars whose common link is their intellectual intersection with the work of Vern Bengtson an esteemed family sociologist whose accomplishments include foundational theoretical contributions to the study of families and intergenerational relations as well as the development of the widely used Longitudinal Study of Generations data set The study began in 1971 and is the basis for Bengtson s highly influential concept and measurement model the intergenerational solidarity conflict paradigm This book serves as an excellent compendium of original research that examines how Bengtson s solidarity model a theory that informs nearly all intergenerational and gerontology sociology work performed today continues to be relevant to scholars and practitioners Written by internationally recognized scholars the book s fifteen chapters are mapped to five major thematic areas to which Bengtson s research contributed family connections grandparents in a changing demographic landscape generations and cohorts micro macro dialectics religion and families in the context of continuity change and conflict and global cross national and cross ethnic concerns Key strengths of the book include the diversity of foci and data sources and the strong attention given to global and international issues Kinship and Cohort in an Aging Society will appeal to scholars working in sociology psychology gerontology family studies and social work *Nesne 19* Kolektif,2021-04-30 Nesne Psikoloji Dergisi 19 Men in Families Alan Booth,Ann C. Crouter,1998-01-01 Recently the roles of fathers and husbands in families have been recognized as important issues They appear in legislation aimed at deadbeat dads social movements including the Million Man March and Promise Keepers in the development of advocacy groups and in think tanks Therefore contemporary research on men in family relationships has very mixed results Some studies show that fathers have small effects on child development and in preventing antisocial behavior whereas others suggest no effects Other research claims that the primary importance of men in families is in their role as providers Although some studies state that the husbands and fathers most vital work occurs in new families others indicate that it is when their offspring reach adolescence Confusing the issue even further labor market trends predict that men s family roles may diminish Based on the presentations and discussions from a recent national symposium on men in families held at The Pennsylvania State University

this book addresses these issues This is the only book that deals with men s involvement in families in a comprehensive way Although several books focus on fathers alone or on a broader family perspective this is the first book that deals with a variety of family roles on an interdisciplinary basis Although most of the writers are psychologists or sociologists there are key figures in history and anthropology who also make important contributions As such this volume will be useful to scholars students policy specialists and family program administrators
