Farm Families and Change in 20th-Century America Mark Friedberger,2021-10-21 The farm family is a unique institution perhaps the last remnant in an increasingly complex world of a simpler social order in which economic and domestic activities were inextricably bound together In the past few years however American agriculture has suffered huge losses and family farmers have seen their way of life threatened by economic forces beyond their control At a time when agriculture is at a crossroads this study provides a needed historical perspective on the problems family farmers have faced since the turn of the century For analysis Mark Friedberger has chosen two areas where agriculture retains major importance in the local economy Iowa and California s Central Valley Within these two geographic areas he examines farm families with regard to their farming methods land tenure inheritance practices use of credit and community relations These aspects are then compared to assess change in rural society and to discern trends in the future of family farming Despite the shocks endured by family farmers at various times in this century Friedberger finds that some families have remained remarkably resilient These families evinced a strong commitment to their way of life They sought to own their land they maintained inheritance from one generation to the next they were generally conservative in using credit and they preferred to diversify their enterprises These practices served them well in good times and in bad Innovative in its use of a combination of documentary sources quantitative methods and direct observation this study makes an important contribution to the history of American agriculture and of American society

Economic Development and Women in the World Community Hans C. Blomqvist, Kartik Roy, Clement A. Tisdell, 1996-02-16 After reviewing theories about how women are likely to fare as a result of economic development the editors and their contributors focus on the socioeconomic status of women and changes in it as a result of processes of economic development in individual countries in five continents Economic development is supposed to remove impediments to the improvement in women s status In some developing countries researchers have found that instead of lessening the forces of restrictions economic development may in fact have strengthened them The editors call for a greater involvement of

women as active participants in the process of dismantling social legal and institutional barriers to women s development

Social and Emotional Adjustment and Family Relations in Ethnic Minority Families Ronald D. Taylor, Margaret C.

Wang, Margaret C Wang, 2013-11-26 This collection of essays addresses issues related to the intersection of family relationships and several contexts for the social and emotional development of ethnic minority adolescents The papers are organized in sections under subtitles which reflect three contextual frames through which these issues may be examined The first section focuses on the relationship between economic factors and resources on the one hand and family relations as environments for development on the other The next part focuses on family and peer networks and relations as contexts for the emotional and social development of adolescents The last section takes neighborhood and school as contexts for and determinants of social and emotional adjustment in adolescence Like much of the extant work and current thought concerning development in ethnic minority children and adolescents the authors have highlighted the more stressful and negative aspects of these several contexts There are a few explicit and several implicit references made to supportive and more positive contexts and manifestations of relationships which frame the developmental experiences of ethnic minority adolescents These serve as a reminder that many ethnic minority adolescents do overcome the odds against success and grow into healthy and wholesome adults However in large measure this book is a contribution to our understanding of the problematic circumstances under which a significant segment of the population exists reminding us that life for ethnic minority adolescents is difficult The fact that some of these young people manage to overcome the negative and stressful aspects of their experiences and defy the implicit prediction of failure to thrive is truly remarkable
