A.D.A.M. Illustrated Family Health Guide ,2006 **Listening in Medicine** Michael Livingston,2005 Current medical teaching neglects the tale the patient tells or fails to tell I offer evidence suggesting such tales or narratives are central to understanding medicine **Written Communication in Family Medicine** Robert Taylor,K.A. Munning,2012-12-06 This work presents the knowledge and skills necessary for successful written communication in family medicine It is intended for use by teachers of family medicine who as part of their academic responsibilities are called upon to produce written documents in a wide variety of areas The book has also been written to serve as a resource for leaders presenting faculty development activities in various aspects of written communication including writing for publication administrative and educational communication and other topics of interest to academicians The Task Force on Professional Communication Skills was formed in 1981 as an initiative of the Board of Directors and the Communications Committee of the Society of Teachers of Family Medicine STFM In early meetings the Task Force defined its goal as improvement of the communication skills both written and oral of STFM members A survey of Task Force members revealed that the greatest challenges lay in the area of written communication skills although the needs are not confined to medical article and book writing but extend to the full range of academic communication The Task Force set as its first task the creation of a monograph on written communication in family medicine **Textbook of Family Medicine** Robert E. Birrer,2012-12-06 Now more than ever Family Medicine is alive and well in the United States The base of this medical

specialty has traditionally been in the smaller cities suburban communities and rural areas of this country Over the past decade however there has been a resurgence of interest in primary care in our major metropolitan areas as a solution to the high tech subspecialty pace of the tertiary care environment A rebirth of urban family medicine has accompanied these pioneering efforts To date the accomplishments are substantial and the prospects are bright There is still a long way to go and there are a significant number of hurdles to cross Although diseases are generally the same wherever you are their effects as illness on the individual and the family are strongly influenced by the environment and social milieu Urban families have distinctive and diverse problems cultural economic and ethnic Training programs situated in the large cities must recognize these issues and include special emphasis on the situations that the family physician is likely to encounter during and after his training There is very little research literature on the background and nature of special urban problems and these areas are the subject of several chapters of this long overdue volume devoted specifically to urban family medicine Dr Birrer has persuaded true experts to share their knowledge with the reader
