ministers whose focus was on spirituality doctors who emphasized medical aspects of child and adult health and public health professionals and home economists concerned with fighting disease who emphasized cleanliness order fighting germs and eliminating rodents and insects There are also philosophers who drew from ancient texts when discussing family life and a count who assembled a group of German intellectual elites to address various topics An insightful essay of this type is by Marta Karlweis 1926 in which she notes There is no other fetish that society holds to so firmly as the conception woman with all its usual associations of infantilism and dependence The child requires protection is a minor and consequently a serf but above all it possesses no spiritual existence Neither doctorates or other distinctions nor the right to vote have as yet been able to dispel this sweet idea of the childishness of woman which man cherishes p

The Handbook of Contemporary Families explores how families have changed in the last 30 years and speculates about future trends. Editors Marilyn Coleman and Lawrence H. Ganong along with a multidisciplinary group of contributors critique the approaches used to study relationships and families while suggesting modern approaches for the new millennium. The Handbook looks at how changes within the contemporary family have been reflected in family law, family education and family therapy. Features of this Handbook: Examines a diverse array of families and relationships in which people live including chapters on alternative lifestyles, gay and lesbian relationships, economically distressed families, religion and families, racial and ethnic diversity, a feminist vision for families, older families and the effect of computers and other technology on family relationships.
