Glennon,2018 Provides a comprehensive critical and case focused introduction to family law Hayes Williams Family Law helps students to gain a firm understanding of family law principles the developing law and key reform debates **Issues in Medical Law and Ethics** Derek Morgan,2012-12-06 Thirty years ago English jurist Patrick Devlin wrote Is it not a pleasant tribute to the medical profession that by and large it has been able to manage its relations with its patients without the aid of lawyers and law makers Medical interventions at the beginnings and the endings of life have rendered that assessment dated if not defeated This book picks up some of the most important of those developments and reflects on the legal and social consequences of this metamorphosis over the past ten years and will be of interest to students of law sociology and ethics who want a considered and critical introduction to and reflection on key issues in these pivotal moments of human life

The Child and the European Convention on Human Rights Ursula Kil Kelly,2024-11-01 The European Convention on Human Rights is the most successful system for the enforcement of human rights in the world However to date its full potential for protecting children s rights has not been explored as attention has focused on the UN Convention on the Rights of the Child This unique book provides the first analysis of the extensive case law of the Commission and the Court of Human Rights on all issues concerning children and their rights This study is important as a study of the regional protection of children s rights and moreover the case law itself can be directly applied in the legal system of nearly every European country including the UK The book includes chapters on the rights of the child under the European Convention on Human Rights in relation to education protection from abuse the right to identity child care juvenile justice health care and immigration and the family It also explores the potential of the Strasbourg mechanism for the protection of children s rights and thus provides a practical and vital guide to the study and use of the European Convention in the broad area of children s rights Law and Parenthood Chris Barton,Gillian Douglas,1995-05 Most academic literature focuses on the position of the child in relation to the parent or the state In reality the law is more concerned with the role and function of parents and this new book addresses the key issues of parental rights and responsibilities *The Troubled Helix* Theresa Marteau,Martin Richards,1996 This wide ranging and compelling account surveys the exciting opportunities and difficult problems which arise from the new human genetics The availability of increasingly sophisticated information on our genetic make up presents individuals and society as a whole with difficult decisions Although it is hoped that these advances will ultimately lead the way to the effective treatment and screening for all diseases with a genetic component at present many individuals are condemned to a life sentence in the knowledge that they have or will develop an incurable genetic disease **Genetic Counselling** Angus Clarke,2006-12-05 Contributions to this study are drawn both from health professionals engaged in genetic counselling and from observers and critics with backgrounds in law philosophy biology and the social sciences This diversity will enable health professionals to examine their activities with a fresh eye and will help the observer critic to understand the ethical problems that arise in genetic counselling practice rather than in imaginary encounters Most

examinations of the ethical issues raised by genetics are concerned in a broad sense with the application of new technology to human reproduction This volume focuses on genetic counselling and screening as such providing valuable insights for the health professional social scientist philosopher lawyer and bioethicist **Current Catalog** National Library of Medicine (U.S.),1993 First multi year cumulation covers six years 1965 70 Obstetrics in the 1990s T. Chard,M. P. M. Richards,1992 This book reviews some of the current questions and debates in obstetrics The reactions of patients to screening for fetal abnormalities and antenatal diagnosis public concern over assisting fertilization the rise in caesarean sections and the role of the midwife are just some of the topics discussed bythe authors The book gives a good analysis of what are the principal developments and ethical concerns for obstetricians in the 1990s **Family Law** ,1997 Responsible Parents and Parental Responsibility Rebecca Probert,Stephen Gilmore,Jonathan Herring,2009-05-06 This book examines the idea of parental responsibility in English law and what is expected of a responsible parent The scope of parental responsibility a key concept in family law is undefined and often ambiguous Yet to date more attention has been paid to how individuals acquire parental responsibility than to the question of the rights powers duties and responsibilities they have once they obtain it This book redresses the balance by providing the first sustained examination of the different elements of parental responsibility bringing together leading scholars to comment on specific aspects of its operation The book begins by exploring the conceptual underpinnings of parental responsibility in the context of parents and children s rights The analysis highlights the inherent constraints and limitations of parental responsibility and how its scope has deliberately been curtailed in certain contexts The book then considers what parental responsibility allows and requires in specific areas for example naming a child education religious upbringing medical treatment corporal punishment dealing with any contracts entered into or property owned by the child representing the child in legal proceedings consenting to a child s marriage or civil partnership and the law s response to the death of a child In the final section the idea of the responsible parent is considered in the contexts of child support contact tort and criminal law This title is included in Bloomsbury Professional s Family Law online service **The New Genetics and the Public's Health** Alan R. Petersen,Robin Bunton,2002 This volume addresses the emerging social and political consequences of the new genetics and provides a critique of current research and practice in public health **Reproducing Narrative** Michael Thomson,2018-12-20 First published in 1998 Reproducing Narrative sets out to interrogate a number of medico legal reproductive discourses Recognizing that these dialogues are heavily imprecated in broader social political and economic discourses it is contended that responses to reproductive issues are influenced and possibly determined by non reproductive concerns both at a parochial and more general level Whilst a number of such influential narratives are recognized the book concentrates on the narratives of gender which appear implicit within the discourses and practices considered Given the productive nature of discourse and the traditional premising of gender on sexual difference it becomes apparent that the explicit figuring of the female reproductive body becomes a means of realizing

the implicit gender narratives within these discourses Privileged medico legal discourses become understood as a technology of gender an important site at which gender is constituted *Feminist Perspectives on Child Law* Jo Bridgeman, Daniel Monk, 2013-03-04 Whilst there many publications dealing with children from both legal and theoretical perspectives the child is persistently represented and discussed as a gender neutral or pre gender and pre sexual object This text uses feminist perspectives to explore more rarely addressed aspects of childhood *The SAGE Encyclopedia of LGBTQ Studies* Abbie E. Goldberg, 2016-04-13 This far reaching and contemporary new Encyclopedia examines and explores the lives and experiences of Lesbian Gay Bisexual Transgender and Queer LGBTQ individuals focusing on the contexts and forces that shape their lives The work focuses on LGBTQ issues and identity primarily through the lenses of psychology human development and sociology emphasizing queer feminist and ecological perspectives on the topic and addresses questions such as What are the key theories used to understand variations in sexual orientation and gender identity How do Gay Straight Alliances GSA affect LGBTQ youth How do LGBTQ people experience the transition to parenthood How does sexual orientation intersect with other key social locations such as race to shape experience and identity What are the effects of marriage equality on sexual minority individuals and couples Top researchers and clinicians contribute to the 400 signed entries from fields such as Psychology Human Development Gender Queer Studies Sexuality Studies Social Work Sociology The SAGE Encyclopedia of LGBTQ Studies is an essential resource for researchers interested in an interdisciplinary perspective on LGBTQ lives and issues
