## **Family And Peer Influences On Adolescent Substance Use:**

Family and Peer Influences on Adolescent Substance Use Michael Windle, 1999-12-31 Alcohol and other substance use among adolescents has been increasingly recognized as a potential deterrent to healthy adolescent development because the abusive use of such substances may seriously undermine the successful resolution of major developmental life tasks. The articles in this special issue illuminate the multiple family and peer influences that impact adolescent substance use and abuse. Collectively they emphasize the need for greater integration of developmental theory and application in our attempts to understand the multiple factors and processes that influence the pervasive use and abuse of substances by adolescents. Importantly, the application of a developmental perspective to the study of family and peer processes as contributors to adolescent substance use will facilitate efforts to inform social policy decision making as it relates to substance use preventive and treatment interventions at both the micro and macro levels.

*The Family Context of Adolescent Drug Use* Robert H. Coombs, 2019-11-12 Here is an essential volume for educators, social workers, health care professionals, and parents who are frustrated by the consuming power of drugs over the lives of young people and looking for answers to this enormous problem. In this unique and highly practical volume, experts concentrate on the family, the foundation of mental health and social control as the most positive force in the prevention of adolescent drug use. Despite the war on drugs, young people in large numbers continue to use substances. This instructive guide focuses on educating and strengthening families, which makes stronger children who are less likely to use drugs instead of the traditional efforts based on rehabilitation instead of prevention. It offers instructive background information about societal forces that affect families and make it difficult to raise drug-free youngsters. Family differences are discussed, such as family structure, parenting styles, ethnic and cultural characteristics. Contributors thoroughly examine practical, effective interventions at home, at school, and with peers that are positive rather than negative, instructional rather than punitive, and preventive instead of remedial.
