Psychological Ownership in Family Businesses Fabian

Bernhard, 2011 This book includes three essays covering the ownership perceptions individuals experience in family businesses. It advances current knowledge on the organizational factors antecedent to individuals' psychological ownership as well as the attitudinal and behavioral consequences. Investigating overly strong psychological ownership, the first essay provides insights into the phenomenon of aging family business owner managers who face difficulties in letting go, i.e. passing on leadership to their successors. The second essay offers a study of family business owner managers' leadership styles and their influence on nonfamily employees' psychological ownership of the family business as well as individuals' motivation and performance. Given the special situation of nonfamily members working in family businesses, the third essay examines the effects of employees' and nonfamily managers' justice perceptions on both the ownership experience and commitment to the family business. The works presented in this book built a basis for several publications such as articles in the *Journal of Family Business Strategy* and *Group Organization Management*. Furthermore, they have been presented at various international conferences, have been nominated for a most creative paper award and have contributed to the Academy of Management Best Paper Proceedings. The findings not only constitute valuable additions to current research in management and organizational psychology but can also provide benefit for those interested in family businesses. Managers, owners and consultants working in or for family businesses would likely gain from the practical implications.
